It is the policy of the Iowa Department of Education not to discriminate on the basis of race, creed, color, sex, sexual orientation, gender identity, national origin, gender, disability, religion, age, political party affiliation, or actual or potential parental, family or marital status in its programs, activities, or employment practices as required by the Iowa Code sections 216.9 and 256.10(2), Titles VI and VII of the Civil Rights Act of 1964 (42 U.S.C. § 2000d and 2000e), the Equal Pay Act of 1973 (29 U.S.C. § 206, et seq.), Title IX (Educational Amendments, 20 U.S.C. §§ 1681 – 1688) Section 504 (Rehabilitation Act of 1973, 29 U.S.C. § 794), and the Americans with Disabilities Act (42 U.S.C. § 12101, et seq.).

If you have questions or grievances related to compliance with this policy by the Iowa Department of Education, please contact the legal counsel for the Iowa Department of Education, Grimes State Office Building, 400 E 14th St, Des Moines IA 50319-0146, telephone number 515/281-5295, or the Director of the Office for Civil Rights, U.S. Department of Education, 111 N. Canal Street, Suite 1053, Chicago, IL 60606-7204.

ACKNOWLEDGEMENTS

Many people contributed to *The Annual Condition of Iowa's Community Colleges: 2010*. The project was supervised by Dr. Roger Utman and Colleen Hunt. The report was compiled and written by Vladimir Bassis, Kent Farver, Jenny Foster, Tom Schenk Jr., Jeremy Varner, and Amy Vybiral. Geoff Jones also assisted in the compilation of data. Xiaoping Wang assisted in matching Community College MIS data with Project EASIER. Gail Sullivan provided helpful comments. Stephanie Weeks thoroughly edited this document and provided invaluable feedback.

The authors sincerely thank everyone who assisted with this report.

IOWA'S COMMUNITY COLLEGES

"The mission of the community colleges of Iowa in the 21st century is to provide exemplary educational and community services to meet the needs and enhance the lives of Iowans."

SOURCE: "Shaping the Future: A Five-Year Plan for the Community Colleges of Iowa, 2006-2011"

Community colleges have an "open door" policy, which means that nearly everyone who applies may be accepted.

Each of the 15 community colleges offers comprehensive programs including Arts and Sciences, College Transfer (Parallel) courses, Career and Technical Education programs, training and retraining programs for the workforce of Iowa's businesses and industries, and a variety of adult education and non-credit courses for residents of each community college district.

History of Iowa's Community Colleges

Mason City schools established the first two-year postsecondary educational institution in Iowa in 1918. At the time this junior college was organized, there was no law authorizing two-year postsecondary educational programs. Mason City Junior College proved to be successful and was accredited by the North Central Association of Colleges and Schools in 1919.

Additional public junior colleges were organized beginning in 1920, and the movement spread rapidly, until, by 1930, at least 32 towns and cities in Iowa had organized public junior colleges as part of their public school systems.

In 1927, the 42nd General Assembly passed the first law authorizing the establishment of public junior colleges. The law permitted the establishment of schools offering instructional programs at a level higher than an approved four-year high school course. The colleges had to be dually authorized by the voters and approved by the State Superintendent of the Iowa Department of Public Instruction (now the Director of the Iowa Department of Education). Such colleges were able to include postsecondary courses of one or two years. The Superintendent was authorized to prepare standards and to provide adequate inspection of these junior colleges.

The Iowa public junior college movement reached its crest in 1927 when nine public junior colleges were

organized. After the year 1930, no public junior colleges were organized until 1946, when Clinton Junior College was founded. In 1931, the 44th General Assembly approved the first restriction to the development of public junior colleges, prohibiting the establishment of a public junior college in any school district having a population of less than 20,000. The 49th General Assembly in 1941 reduced the population requirement to 5,000.

Between the years 1918 and 1953, a total of 35 different public junior colleges were established through the operation of public school districts. Some of these colleges closed, although 10 of the closed colleges later reopened. The enrollment trend steadily increased over the years with the exception of the World War II years. During the 1955-66 decade, which immediately preceded the initiation of a community college system, enrollment almost quadrupled. By 1965, 16 public junior colleges were operating in Iowa and the total enrollment during the fall semester of the 1965-66 school year was 9,110. Local public school districts operated colleges; a dean who reported directly to the local superintendent administered each. These institutions offered arts and sciences programs equivalent to the first two years of the baccalaureate program and a limited number of occupational programs and adult education opportunities.

In 1958, Congress initiated a development parallel to the public junior college movement. Title VIII of the National Defense Education Act (NDEA) made federal funds available to states on a matching basis to develop area vocational programs. To implement this legislation, the Iowa State Board of Education modified the state vocational education plan to make local school districts and Iowa State University eligible to operate as "area schools." This legislation included a specific allocation of funds to develop area vocational programs under NDEA's Title VIII, a designation of area vocational-technical high schools, and the authorization for tuition-paying students to attend these schools and programs.

The Iowa State Board of Education eventually designated a total of 15 schools as area vocational-technical high schools. These schools were also designated as area schools for the purposes of Title VIII, and were to be used to initiate programming for the Manpower Development and Training Act. A total of 1,816 full-time day students enrolled in postsecondary vocational programs for the 1965-66 school year; the majority entered programs administered by agencies operating the area vocational-technical high schools or programs.

Even though public junior colleges and area vocational-technical high schools offered some opportunities for arts and sciences and preparatory vocational education, enrollment opportunities were limited for most Iowans. In 1959, the 58th General Assembly appropriated \$25,000 to the Iowa Legislative Research Bureau to conduct a policy study of the needs of higher education in Iowa. Included in this report was a recommendation to establish regional community colleges. The report also recommended the state pay at least half the cost of building and operating these colleges. As a result of this study, the General Assembly directed the Iowa Department of Public Instruction (later renamed the Department of Education in July 1985) to conduct a two-year study of the need to develop a statewide system of public community colleges.

The department submitted its report, "Education Beyond High School Age: The Community College," to the General Assembly in December 1962. The report made recommendations and proposed enabling legislation. It recommended restructuring the county educational system and forming 16 area education districts whose boundaries should be drawn along existing school district lines. These districts were intended to replace the county boards of education and provide programs and services that would complement those provided by local school districts. It was envisioned that the area districts would also serve as a legal structure through which a statewide system of community colleges could be developed.

In 1963, the 60th General Assembly took no action on the report. An interim legislative committee concluded that it would be appropriate to put vocational and two-year college education together in a single comprehensive system, but separated the county board consolidation issue (area education agencies were later established by the legislature in 1974). Staff of the Iowa Department of Public Instruction worked closely with various groups throughout the state, and arrived at conclusions similar to those of the interim committee. Passage of the Vocational Education Act of 1963 provided additional impetus to this planning.

After receiving the interim committee's report in 1964, the 61st General Assembly in 1965 enacted legislation that permitted the development of a

statewide system of two-year postsecondary educational institutions, identified as "merged area schools." The Iowa Department of Public Instruction was to direct the operation of the development of merged area schools as either area community colleges or area vocational schools.

Legislation authorizing merged area schools, which are now referred to as "community colleges," provided for fiscal support for these institutions through a combination of student tuition and federal, state, and local funds. These resources included a local three-quarter mill levy on the property within the merged area for operational purposes, and an additional three-quarter mill levy for the purchase of sites and construction of buildings. State general aid was distributed to community colleges on the basis of \$2.25 per day for the average daily enrollment of full-time equivalent students who were residents of Iowa. The 63rd General Assembly changed this formula in 1969 to determine enrollment and state aid on the basis of actual contact hours of instruction. Individual colleges were granted authority to establish tuition rates, except that tuition was not to exceed the lowest tuition rate charged by any one of Iowa's three Regent Universities.

Legislation approved in 1965 was enthusiastically received. The Iowa Department of Education received the first plan for a community college on July 5, 1965; one day after the legislation was effective. Plans for the other community colleges followed in quick succession. Although the original plans called for 20 areas, the number was quickly reduced to 16 and later one area was split among adjacent areas. Fourteen (14) community colleges were approved and organized in 1966, and a 15th in January 1967. Fourteen of these community colleges began operation during the 1966-67 school year.

Seven (7) districts were originally approved as Area Community Colleges: (current names)

- North Iowa Area Community College
- Iowa Lakes Community College
- Iowa Central Community College
- Iowa Valley Community College District
- Eastern Iowa Community College District
- Des Moines Area Community College
- Southeastern Community College

Eight (8) were approved as Area Vocational Schools: (current names)

- Northeast Iowa Community College
- Northwest Iowa Community College
- Hawkeye Community College
- Kirkwood Community College
- Western Iowa Tech Community College
- Iowa Western Community College
- Southwestern Community College
- Indian Hills Community College

By July 1970, all of the area vocational-technical high schools and junior colleges had either merged into the new system or were discontinued. All areas of the state were included in community college service areas by July 1971.

State oversight primarily consisted of program approval and periodic evaluations by the state and representatives of the Regent universities. Additionally, as of 1980, all 15 institutions were accredited by the North Central Association of Colleges and Schools.

The community colleges and area vocational schools grew quickly, both in terms of students served and services offered. In 1983, the Iowa Industrial New Jobs Training Act was established by the legislature adding contracted customized job training to the community colleges' list of services. Other job training programs followed, further expanding the role of community colleges in economic development.

In 1987, Hawkeye Community College, the final Iowa college operating as a vocational school, received approval to operate as a comprehensive community college. Currently, all 15 operate as comprehensive community colleges, offering arts and science (college transfer), vocational preparatory, and adult and continuing education programs.

In 1989, the 73rd General Assembly passed Senate File 449, requiring that secondary vocational programs be competency based, and that the competencies be articulated with postsecondary vocational education. This resulted in increased cooperation between local education agencies and the community colleges and a growth in programs in which high school students are awarded college credit for coursework completed in these articulated programs. The Postsecondary Enrollment Options Act of 1989 and later supplemental weighting for concurrent enrollment allowed high school students to jointly enroll in college credit courses in significantly greater numbers.

In 1990, the legislature directed the Iowa Department of Education to overhaul the process by which it reviewed and approved community colleges. The new process, implemented beginning in 1997, was designed to better align with the accreditation process of the North Central Association.

In the late 1990s, the majority of community colleges expanded their role in workforce development by becoming Workforce Investment Act primary service providers and housing one-stop centers.

During the 1990s, the community college management information system (MIS) was developed. The first Condition of Iowa's Community Colleges report was issued in September 2000. In subsequent years, the system was refined and expanded.

In 1999, the 78th General Assembly passed House File

680 mandating the Department of Education convene a committee to identify and study options for restructuring the governance of Iowa's Community Colleges. The committee's final report, which was submitted to the Legislature in December 1999, reaffirmed the existing governance structure of Iowa's Community Colleges, with locally elected boards of directors and the State Board of Education with responsibility for statewide oversight and coordination. The study recommended the development of a statewide strategic plan for the system of community colleges.

House File 2433 mandated the development of a statewide strategic plan for the statewide system of community colleges every five years. The first plan was approved by community college presidents, the Iowa Association of Community College Trustees, and the State Board of Education, and forwarded to the legislature by July 2001.

Within six months of implementing HF 2433, a progress report was published summarizing statewide and local community college responses to the five-year plan, "Shaping the Future." Annual progress reports are compiled by the Department of Education and presented to the State Board of Education. In spring 2006, the State Board of Education approved the second five-year statewide community college strategic plan. The following August, the State Board of Education approved performance measures for the plan. Baseline data on each of the measures was reviewed. An annual report is provided to the State Board of Education on these performance measures.

For most of the colleges' first 40 years, faculty were licensed by the state. In 2003, the legislature replaced licensure requirements with minimum faculty standards and quality faculty plan requirements tied to state accreditation.

Iowa Code

The statement of policy describing the educational opportunities and services to be provided by community colleges is included in Section 260C.1 of the Iowa Code. This statement of policy identifies the following as services that should be included in a community college's mission.

- The first two years of college work, including pre-professional education.
- Vocational and technical training.
- Programs for in-service training and retraining of workers.
- Programs for high school completion for students of post-high school age.
- Programs for all students of high school age who may best serve themselves by enrolling in vocational and technical training, while also enrolled in a local

high school, public or private.

- Programs for students of high school age that provide advanced college placement courses not taught at a student's high school while the student is also enrolled in the high school.
- Student personnel services.
- Community services.
- Vocational education for persons who have academic, socioeconomic, or other handicaps that prevent succeeding in regular vocational education programs.
- Training, retraining, and all necessary preparation

FALL ENROLLMENT

Each fall, the Iowa Department of Education collects enrollment data from Iowa’s community colleges on the 10th business day of the semester. The fall data collection contains data on the 2010-11 academic year (fiscal year 2011).

Fall enrollment grew 5.5 percent to a record high of 106,597 students in fiscal year 2011 (Table 2-1). College enrollment has grown for 14 consecutive years since enrollment slipped in fiscal year 1997. In the 46-year history of the modern community college system, enrollment has only fallen four times (Figure 2-1).

Last year’s enrollment has accelerated at the fastest pace (14.3 percent) since 1975, while, on average, the increase is only by 5.6 percent a year. Overall, enrollment growth is outpacing the projected nationwide growth in community colleges (Hussar and Bailey, 2008: Table 16).

Similar to the last year, full-time enrollment exceeded part-time enrollment. Slightly over half, 51 percent, of students were enrolled full-time—12 or more credit hours. Both in 2007 and 2008, part-time enrollment exceeded full-time enrollment. That shift represented

HOW DOES FALL DIFFER FROM FISCAL YEAR

FALL

Collected on the 10th business day of the current year. Fall 2010 is a part of fiscal year 2011.

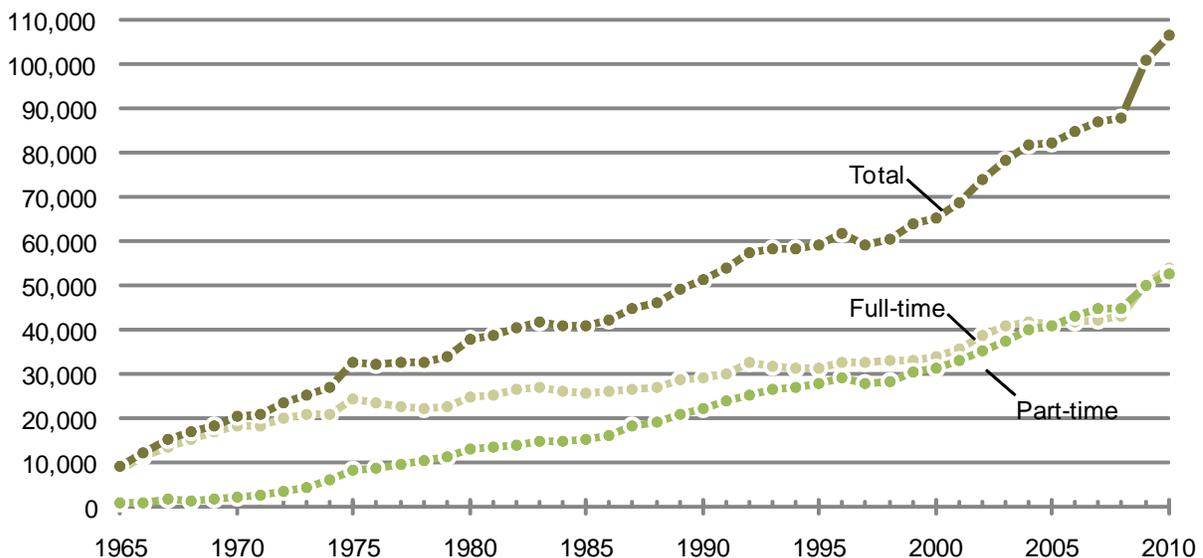

FISCAL YEAR

Collected at the end of the school year, the fiscal year includes fall, spring, and summer semesters. Fiscal year 2010 includes the 2009-2010 academic year.

growing enrollment by working students and joint enrollment—high school students who enroll in community colleges.

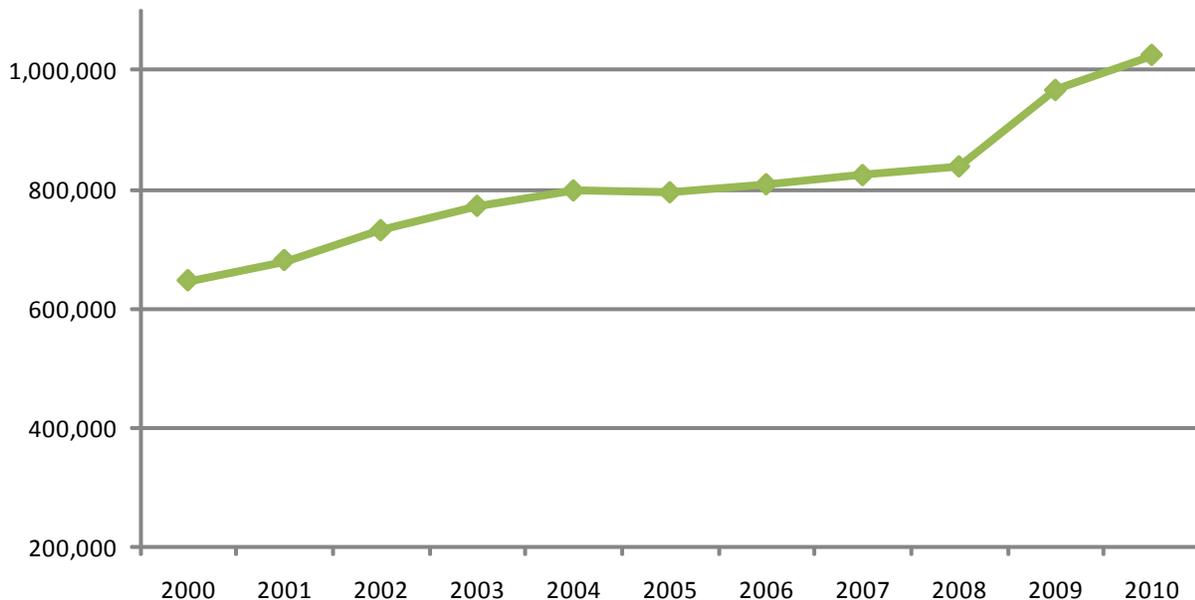

The growth in enrollment this year returns to the steady pattern of enrollment increases in the past, with the exception of recessions years, when it tends to spike. The largest increase in enrollment spiked 21.5 percent as community colleges began to expand in Iowa. Iowa’s

Figure 2-1: Fall Enrollment: 1965-2010

Figure 2-2: Fall Credit Hours: 2000—2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Table 2-7.

enrollment growth has traditionally been consistent. Enrollment decreased four times—1976, 1983, 1984, and 1997—during the entire 46-year history. Full-time enrollment decreased nine times over the same period, while part-time enrollment only fell twice.

FALL ENROLLMENT

FALL ENROLLMENT:

106,597

GROWTH SINCE LAST YEAR:

↑ 5.5%

CREDIT HOURS:

1,026,134

CREDIT HOURS PER STUDENT:

9.62

Up 5.8% since 2009.

Increased 0.03 hours

The remainder of this report will break down credit enrollment by credit hours, by the programs in which students were enrolled, student demographics, enrollment predictions, and data from other reporting sources.

Credit Hours

Students this fall have enrolled in 1,026,134 credit hours, the first time students have enrolled in over one million credit hours in the fall (Figure 2-2). Clearly, students will be enrolled in more credit hours simply because there are more students. Indeed, the 5.5 percent change in number of students corresponds approximately with 5.8 percent change in credit hours.

Table 2-8 lists the average credit hours per student since 2006. Students were enrolled in slightly over 9.6

credit hours in the fall semester, which rose slightly from last year. Since 2007, the average credit hours steadily increase, which is primarily attributable to the rise of full-time students (see Figure 2-1).

Each credit hour represents at least 800 minutes of scheduled work for a classroom course; 1,600 minutes for a laboratory course; 2,400 minutes for clinical work; and 3,200 minutes of work experience. Typically, classes at community colleges vary between three and six credit hours. A full-time student must take at least 12 credit hours a semester, which is at least 160 classroom hours a semester.

Program Type

Enrollment in Iowa’s community colleges is broken into four program types: college parallel; career option; career and technical; and a combination. College parallel programs were the largest in Iowa’s community colleges during fall 2010 (Table 2-13). The curriculum in college parallel programs are designed to articulate to a four-year institution. That is, the courses will count toward a degree in a four-year institution.

The second largest program in community colleges was career and technical education (CTE). Programs within CTE are designed to train students to become skilled workers after graduation. A little under 32 percent of students were enrolled in CTE programs in Iowa community colleges, while approximately 41 percent of enrollments in community colleges nationwide were in CTE programs (Levesque, Laird, Hensley, et al., 2008).

Finally, career option programs are designed to let

students easily articulate to a four-year institution or to move into the workforce. Enrollments in career option programs have stagnated between 2006 and 2008 and declined 8.5 percent in 2009 and increased 5.5 percent in 2010 (Tables 2-9 through 2-13), while enrollments have increased in college parallel (4.4 percent) and CTE (7.6 percent) program types.

Student Demographics

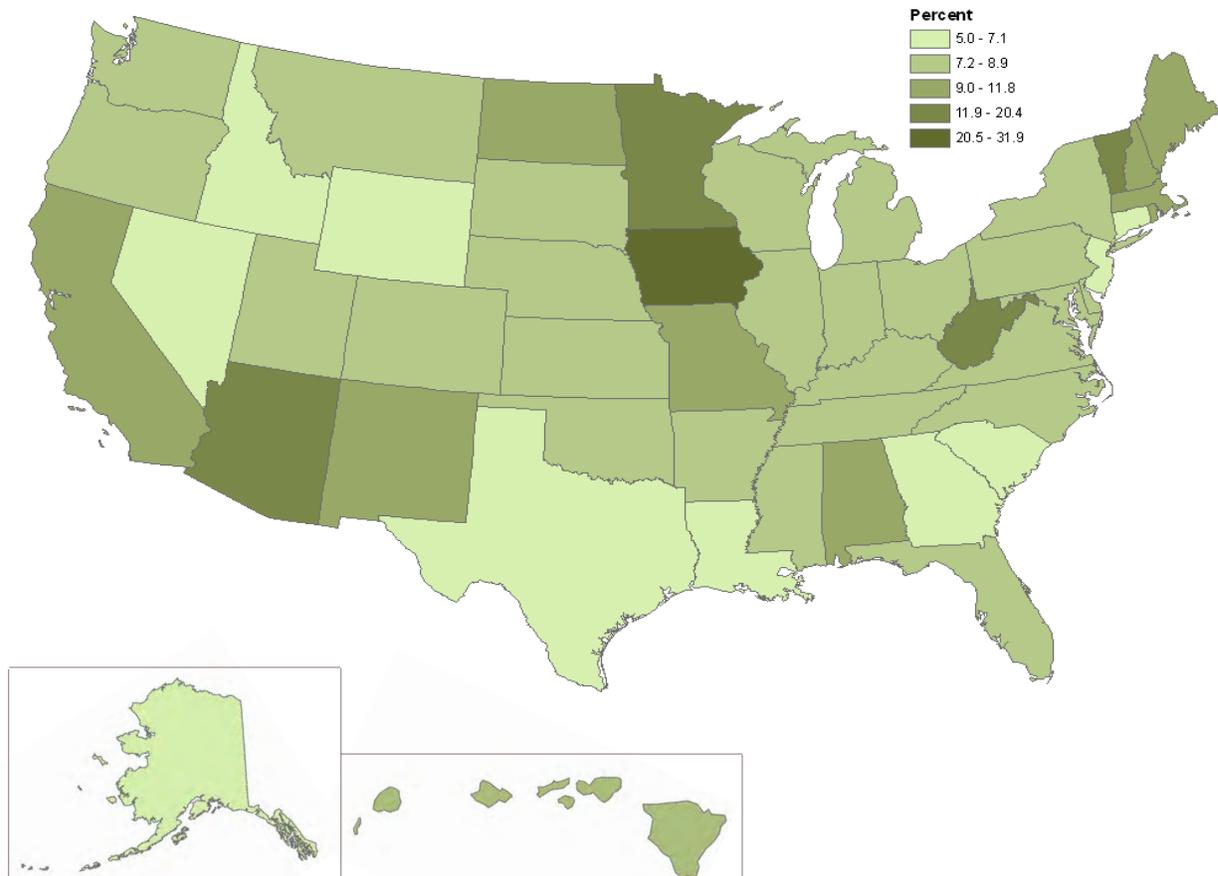

The composition of community college students did not substantially change since last fall nor from last fiscal year (see Section 3). Just over 55 percent of students were female, which is consistent with the state and national trends in community colleges and four-year colleges (Snyder, Dillow, and Hoffman, 2008: Table 181). The average age was 23 years-old, similar to the last year, and consistent with the nationwide average of 23.7 (Provasnik and Planty, 2008). However, a more accurate description is the median age. Similar to two previous years, the median age of 2010 fall enrollees was 19 years-old. Nationally, the median age for students

at public two-year institutions was 21 years-old. Most students in community colleges were between 16 and 22 years-old.

Minorities comprise 14.5 percent of enrollment, a substantial increase over last year's 11.9 percent. Blacks were the largest minority group (6.2 percent), followed by Hispanics (4.5 percent), and Asian/Pacific Islander group (1.9 percent). One percent (1%) indicated they were a part of multiple racial and ethnic groups.

There is also a higher percentage of minorities in community colleges than in the state population. The U.S. Census Bureau (2008) estimates close to nine percent of Iowans of 15 years of age and older are non-white. In that age group, 31.9 percent of all minorities in Iowa were enrolled in postsecondary education in 2008—by far, the largest percent in the nation, followed by California (20.4 percent) and West Virginia (13.2 percent) (Figure 2-3).

Figure 2-3: Ratio of Minority Enrollment in Postsecondary Education to Minority Population Over 15: Fall 2008

SOURCE: U.S. Department of Education, Integrated Postsecondary Data System, Fall 2008 and U.S. Census Bureau.

Postsecondary Fall Enrollment in Iowa

Fall enrollment data is also collected by other higher education institutions in the state of Iowa and reported to the Iowa Coordinating Council on Post-High School Education each year.

Community colleges are the second largest network of postsecondary colleges in Iowa, but the largest postsecondary public system. In Fall 2010, 72,708 students were enrolled in public four-year or above universities (two percent increase) while 52,975 were enrolled in private non-profit 4-year or above universities (four percent decrease). Enrollment in private for-profit 4-year or above universities continued to grow in a very rapid pace to 128,081 students—a 104 percent increase since previous year (Table 2-14)—due, in part, to the addition of Ashford University.

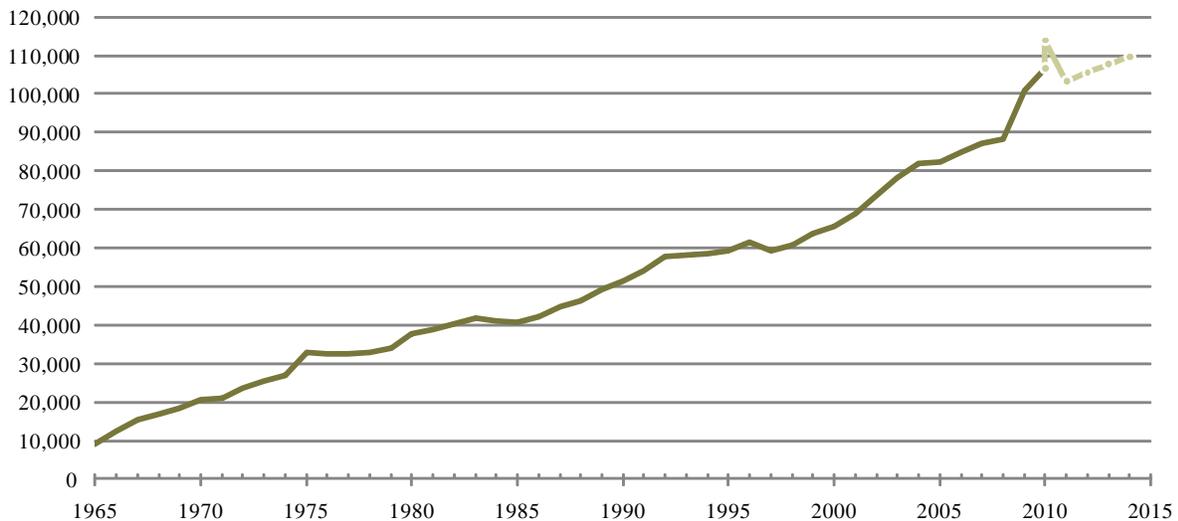

Meanwhile, enrollments in private for-profit and private non-profit two-year institutions has remained relatively small, and decreased 29 and 15 percent correspondingly. Total enrollment in those colleges were slightly less than the smallest community college.

Community colleges in Iowa, as well as nationwide, serve a larger share of part-time students than 4-year universities. As mentioned earlier, slightly under half of community college students were part-time. In Fall 2010, over 17 percent of enrollment at four-year public universities and nearly 27 percent of private not-for-profit four-year universities were part-time students.

Enrollment Projections

Community college enrollment deviated from the department's projections. Enrollment was forecasted to grow 13.1 percent in 2010, compared to the 5.5 percent actual increase. the five-year historical average of 2.4

Figure 2-4: Projected Enrollment: 2010-2013

SOURCE: Iowa Department of Education (2010), *Fall Enrollment Report: 2010*, Table 6. Also see Table 2-15.

FALL ENROLLMENT PROJECTION: 2011

PROJECTED FALL 2011 ENROLLMENT:

103,290  9.3%

percent. Further enrollment decline is projected to be based on the most recent data available.

Enrollment projections were developed by the Iowa Department of Education in late 2008 (Figure 2-4). The forecasts account for prior year enrollment, a forecast of high school students (Iowa Department of Education, 2007), U.S. gross domestic product (GDP) (Congressional Budget Office, 2008), and Iowa unemployment rate.

Enrollment is projected to drop in the future. Next year, enrollment is projected to decrease 9.3 percent. Thereafter, the growth rate is projected to gradually increase from 2.3 to 1.8 percent per year.

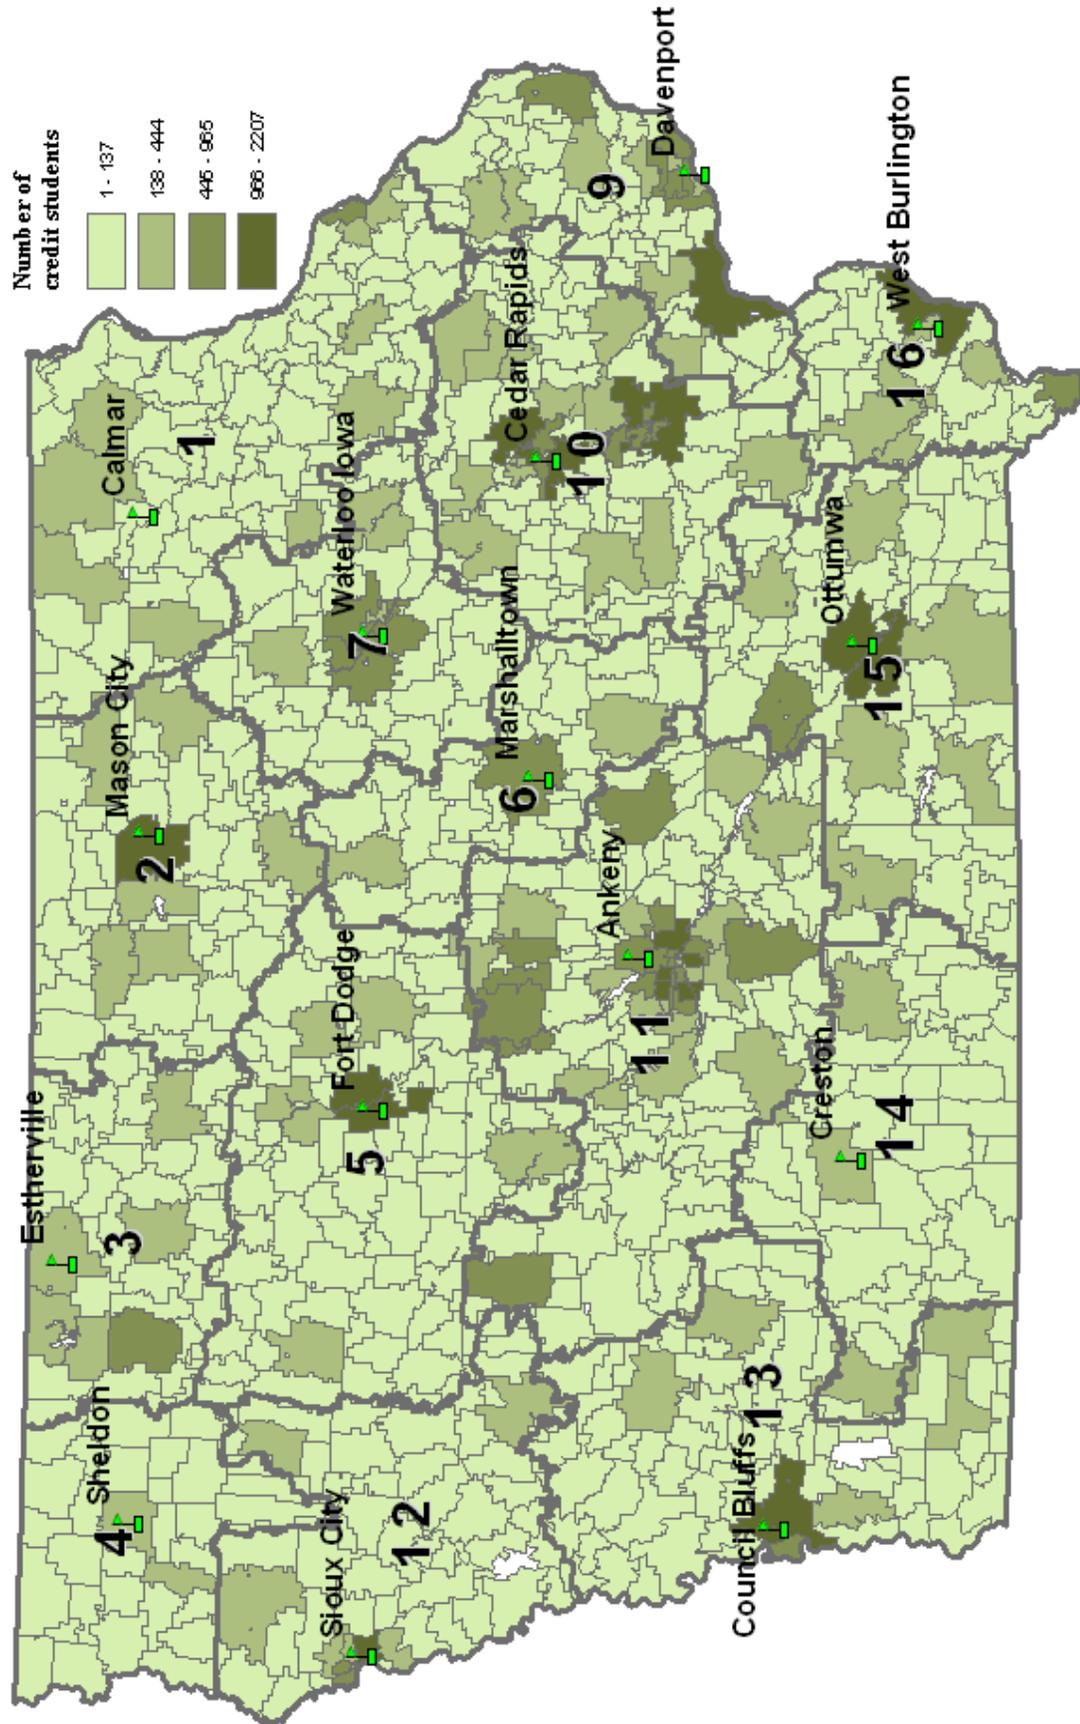

Readers should note that these projections are based on other projections of the economy. The future of community college enrollment is contingent on the pace of any economic recovery, most notably, unemployment.

It is also pertinent to note that enrollment declines were often preceded by large enrollment increases. For instance, the largest year-to-year fall enrollment increase was in 1975, only to be followed by an enrollment decrease the next fall.

Fall Enrollment Student Location

Iowa community college credit students live mostly around colleges' administrative centers, and, for an overwhelming majority of them, Iowa is their original home. Out of 100,736 credit students in 2009, 94,445 (93.7 percent) of students indicated they live in Iowa (Figure 2-5).

3

FISCAL YEAR CREDIT ENROLLMENT AND DEMOGRAPHICS

Fiscal year credit enrollment follows students through the 2009-2010 academic year. Duplicated headcounts include the same student each time she appears at a college. Unduplicated headcounts will only count a student once. While enrollment rose, the composition of community college students remained relatively the same.

Unduplicated enrollment increased in 2010 to 149,175 students, which was a 10.6 percent enrollment growth since the prior year. This enrollment growth is well above the historical average. Between 2005 and 2009, enrollment grew an average of 2.6 percent each year (Figure 3-1).

Credit hours also rapidly grew this past semester to 2,236,939 hours, a 13.8 percent increase since the prior year. This rapid rise in credit hours reflected a rise in the number of courses taken by a student each year. Over the entire fiscal year 2010, students enrolled in an average of 15 credit hours (Figure 3-2).

Enrollment grew sharply for arts and sciences programs. These programs, which are designed to transfer to four-year colleges and universities, grew to 97,060 students—65 percent of overall enrollment (Figure 3-3). Meanwhile, career and technical education (CTE) programs declined 5,093 students to 40,172

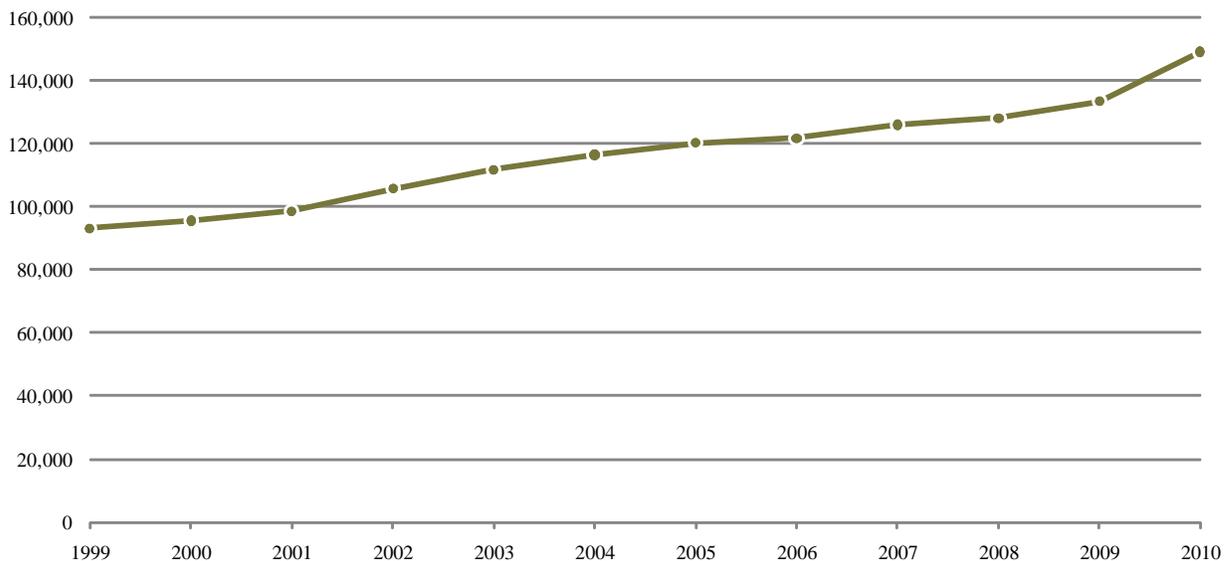

CREDIT ENROLLMENT

NUMBER OF STUDENTS:	GROWTH SINCE LAST YEAR:
149,175	↑ 10.6%
CREDIT HOURS:	CREDIT HOURS PER STUDENT:
2,236,939 <small>Up 13.8% since 2009</small>	15.0 <small>Up from 14.5 in 2009</small>
LARGEST PROGRAM MAJOR:	
COLLEGE PARALLEL	<small>65% of total enrollment</small>

students. The decline in CTE and rise in arts and sciences is attributable to the rise in joint enrollment (Section 5), where students usually major in arts and sciences programs.

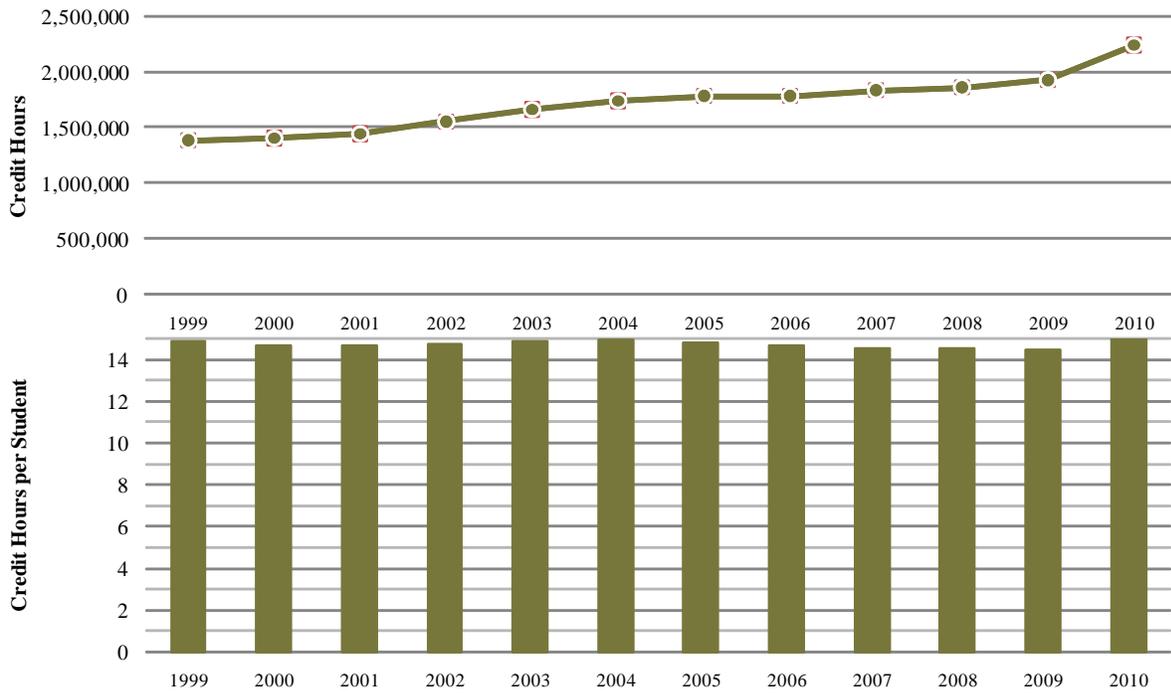

Health science remained the largest CTE program, followed by business management and administration, and then manufacturing (Figure 3-7). Enrollment in health science increased one percent to 19,577 students. Business management and administration enrolled 7,240 students, which was fifteen percent lower since last year and the second straight year of decline. Manufacturing, which is both the largest industry in Iowa and hardest hit

Figure 3-1: Fiscal Year Unduplicated Credit Enrollment: 1999-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS, see Table 3-2.

by the 2008-09 recession, declined 5 percent to 3,613 students.

The Iowa Department of Education reorganized career clusters to align with the most recent recommendations. Some of the enrollment changes were attributable to the reorganization instead of actual growth. For instance, the significant increase in human services majors and the substantial decline in government and public administration majors were attributable to the career cluster reorganization.

Student Demographics

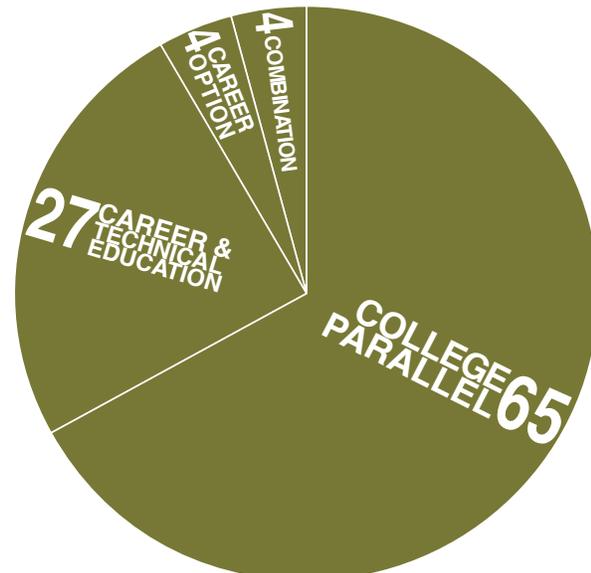

The typical community college student, as with prior years, is female, under 26, and white. However, the face of the typical student is changing slightly. Although predominately white, more minorities are enrolling in community colleges. Although the average age of a community college student is older than a university student, “traditional-age” students comprise most of the community college enrollment.

Females continue to outnumber males in community colleges, 55.6 to 44.4 percent, respectively (Figure 3-4). Since the Community College MIS was established, females have composed most of community college enrollment, remaining steady between 55 and 57 percent. The trend in Iowa’s community college is familiar in education. Females compose a majority of enrollment at the University of Iowa and the University of Northern Iowa (Iowa State Board of Regents, 2007:

Table 2). Nationally, females have outnumbered males in postsecondary institutions since 1978 (Snyder, Tan, and Hoffman, 2003).

The average age of a student is 24 years-old, the similar to the most recent national estimate (Snyder, Tan, and Hoffman, 2008). The average community college student is also older than a typical student at a four-year

Figure 3-3: Enrollment by Program Type

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS, see Table 3-7.

university. For instance, the average age for students attending an Iowa public university was slightly over 21 years-old (Iowa State Board of Regents, 2009).

Although community colleges serve an older population, most are traditional-age students who are under 25 years-old. The median student age was 21 years-old, which means half of the student population were under that age. Seventy-one percent of community college students were under 25 years-old (Figure 3-5).

Community colleges have become increasingly diverse. In 2006, 10 percent of students were racial or ethnic minorities. This proportion grew to 12 percent in 2009 and 14 percent in 2010.

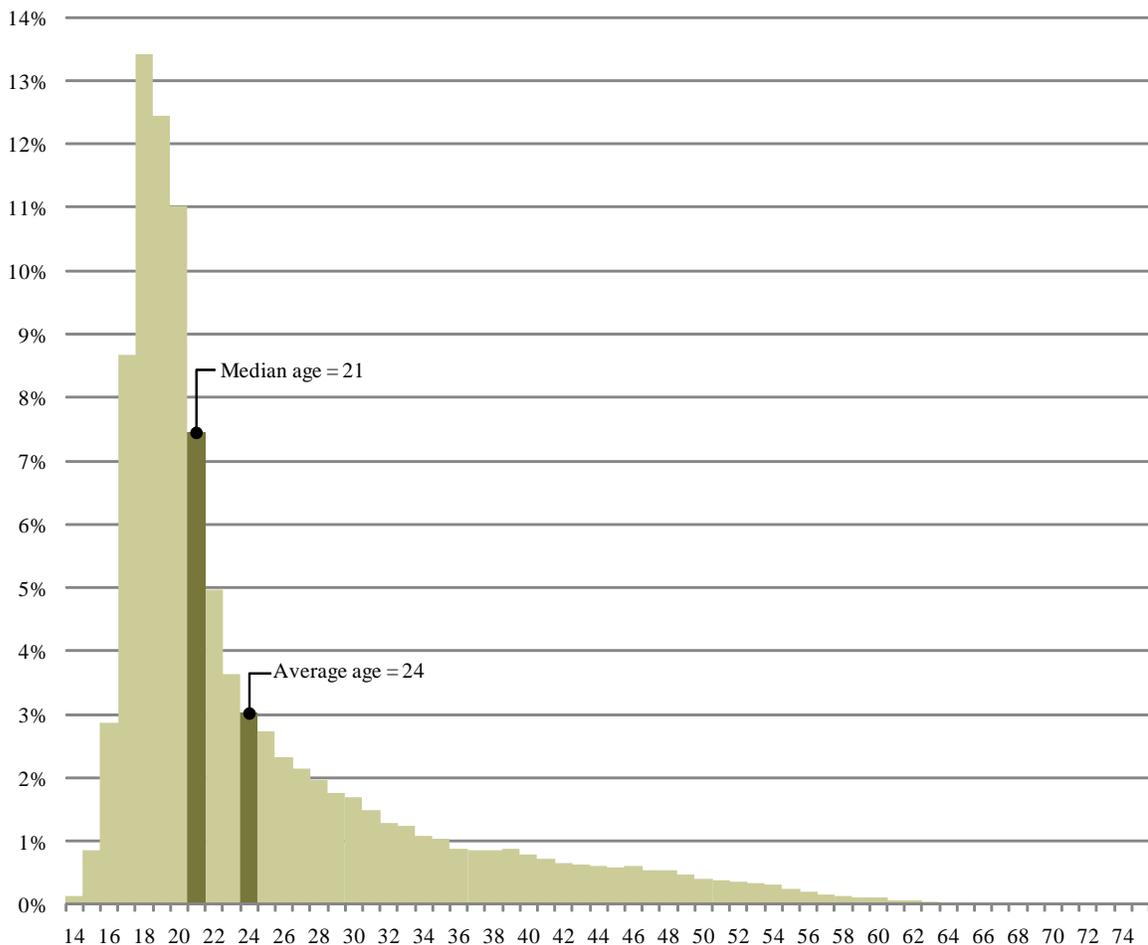

In 2010, the Iowa Department of Education changed its reporting methods for race. Students were allowed to identify themselves under multiple racial or ethnic categories. Eight-hundred thirty-five students, or 0.6 percent, claimed themselves as multi-racial.

ONLINE CREDIT ENROLLMENT AND DEMOGRAPHICS

The Iowa Department of Education has collected data on community college enrollment in online coursework since fiscal year 2007. The department defines online enrollment as students who enrolled in one or more courses delivered entirely (100%) online. Data on enrollment in courses delivered entirely or partially through other distance education delivery methods is not included in this report, but is expected in future years.

Nationally, over four million students enroll in online classes at community colleges (Parsad and Lewis, 2007). In Iowa, the number of students enrolled in online coursework continued to increase at a significant rate, rising 23.4 percent in fiscal year 2010 to 52,700 unduplicated students. More than a third of all community college students enrolled in one or more online courses during the fiscal year (Figure 4-1).

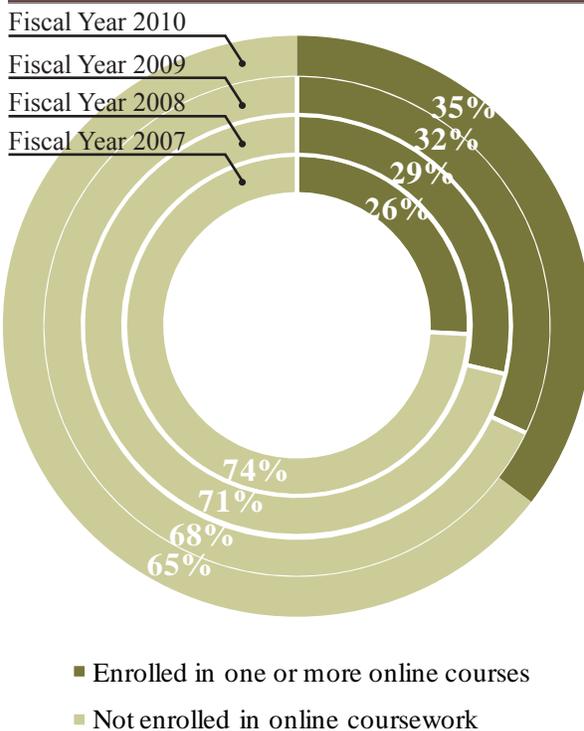

Students were also enrolling in more credit hours.

ONLINE CREDIT ENROLLMENT

NUMBER OF STUDENTS:	CHANGE SINCE LAST YEAR:
52,700	↑ 23.4%
CREDIT HOURS:	ONLINE CREDIT HOURS PER STUDENT:
363,991	2.4
Up 31.6% since 2009.	Up 17.7% since 2009.
ONLINE CREDIT HOURS PER STUDENT ENROLLED IN ONLINE COURSEWORK:	CHANGE SINCE LAST YEAR:
6.9	↑ 6.6%

Community college students enrolled in online coursework enrolled in an average of 6.9 credit hours of online courses — 6.6 percent more than the previous year (Figure 4-3). Because more students are enrolling in online courses and each student is enrolling in more credit hours, the average number of online credit hours per college student rose 17.7 percent to 2.4 credit hours. In fiscal year 2010, 16.3 percent of credit hours were delivered online (Figure 4-2).

Online Students in Programs

Enrollment in Iowa's community colleges is disaggregated into four program types: college parallel, career option, career and technical education (CTE), and a combination. More than 62 percent of students in online coursework were enrolled in college parallel programs designed to articulate to a four-year institution (Figure 4-4). The program type with the second largest enrollment of students taking online coursework was CTE. In fiscal year 2010, nearly 27 percent of students enrolling in online coursework were enrolled in a CTE program. While a smaller proportion of students taking online coursework were enrolled in CTE than the total student body, the number of CTE students taking one or more online courses has risen more than 68 percent since fiscal year 2007 -- faster than other program types.

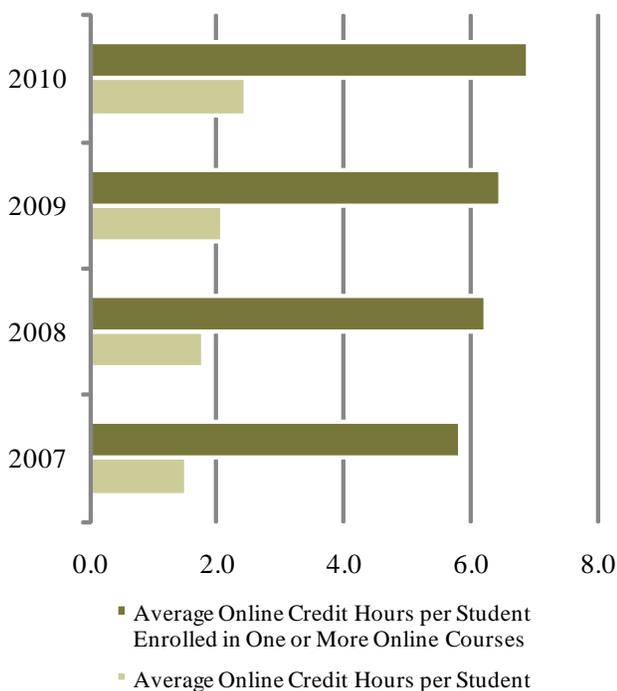

Enrollment of CTE students in online coursework has increased, however when disaggregated by program major, there is significant variation between career clusters. As with total enrollment, the Health Sciences cluster is the largest with 8,615 students enrolled in one or more online courses (Figure 4-5). The courses may or may not be within the cluster, but students within

Figure 4-2: Fiscal Year Online Credit Hours: 2007-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation.

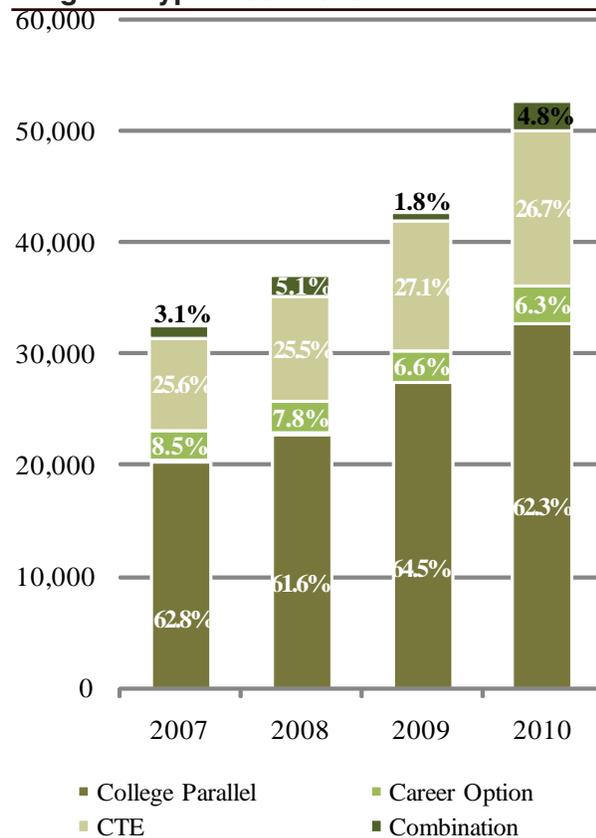

the program area are increasingly enrolling in online courses. The Human Services cluster had the largest percentage growth in online enrollment — increasing by two thirds over fiscal year 2009. Most other clusters also experienced significant growth in the number of students taking one or more online courses.

A review of credit hours delivered online shows a different trend (Figure 4-6). The Health Science career cluster had the largest number of credit hours, 58,238, delivered online (Table 4-7). The Business, Management, and Administration cluster had the largest share of credit hours delivered online (26.4 percent). Three career clusters had at least a fifth of total credit hours delivered online: Business, Management, and Administration; Finance; and Human Services. The Transportation, Distribution, and Logistics career cluster continued to have the smallest percentage of credit hours delivered online (2.1 percent) followed by Architecture and Construction (3.8 percent).

Jointly Enrolled Students

Jointly enrolled students are less likely to be enrolled in online coursework than the general student body. In

fiscal year 2010, 14.3 percent of jointly enrolled students enrolled in one or more online courses compared with more than a third of the total student body (Figure 4-7). Additionally, only 9 percent of joint enrollment credit hours were delivered online compared with 16 percent of total credit hours (Figure 4-8).

Nationally, 29 percent of public two-year colleges offered distance education courses to high school students. In Iowa, all 15 community colleges offer online courses to jointly enrolled students.

Online Student Demographics

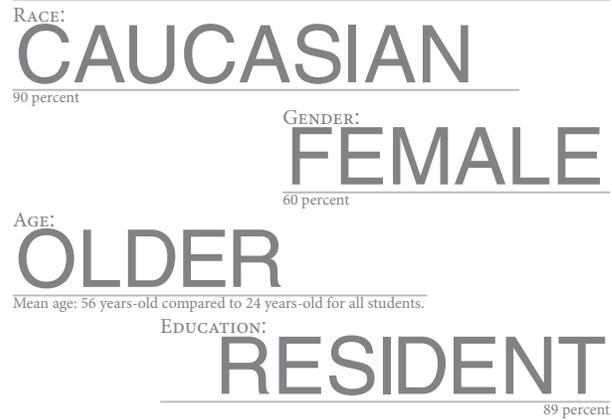

The typical community college student taking online courses is female, 26 years old, and white. Compared with the overall student body, students taking online courses are more likely to be female, older (23-36 age group), and white, and less likely to be jointly enrolled in high school.

In fiscal year 2010, slightly more than 66 percent of students enrolled in online coursework were female compared to 56 percent of the total student body (Figure 4-9). The percentage of students enrolled in online coursework that were female decreased slightly from fiscal year 2009.

Students enrolled in online coursework are older than the overall student body. The average age of students taking one or more online courses is 25.8 years old — a year and a half older than the average Iowa community college student. Students in their late 20s to early 40s enroll in online coursework at higher rates than older or younger age groups (Figure 4-12).

As with the overall student body, students enrolling in online coursework are predominantly white. However, a smaller percentage of students with racial/ethnic

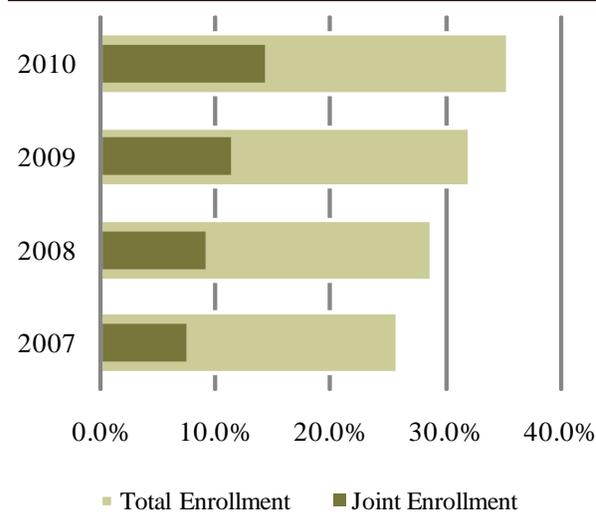

TYPICAL STUDENT TAKING ONLINE COURSEWORK

minority backgrounds enrolled in online coursework than white students. Only 26.9 percent of Hispanic students and 27.9 percent of black students enrolled in online coursework compared with 33.4 percent of students identified as white (Figure 4-11). While students with minority racial/ethnic backgrounds enroll in online coursework at lower rates, the number is growing at a faster rate than for students identified as white.

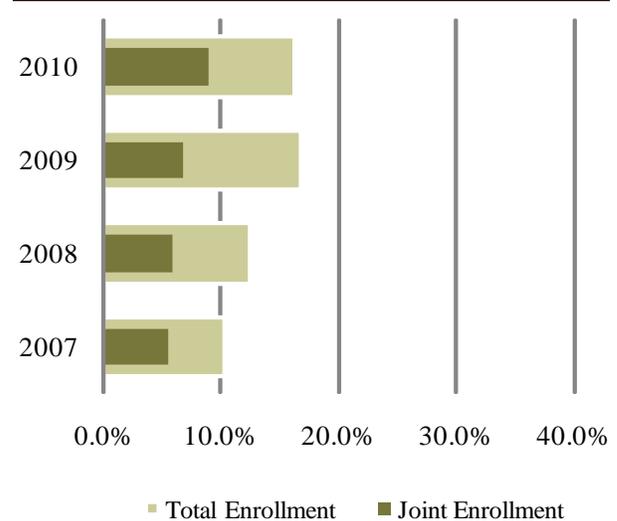

As with the overall student body, students taking online coursework are predominantly residents of Iowa. Approximately 89 percent of students taking one or more online courses are residents (Figure 4-10). However, the number of out-of-state students enrolling in online coursework increased 113 percent from fiscal year 2007.

JOINT ENROLLMENT AND DEMOGRAPHICS

Each year, tens of thousands of Iowa high school students enroll in community college credit coursework. The Department of Education refers to these students as “jointly enrolled.”

Joint enrollment of high school students accounts for a quarter of total community college credit enrollment and more than an eighth of total credit hours. Iowa is one of at least 38 states with state dual enrollment policies (Karp, Bailey, Hughes, and Fermin, 2004). In Iowa, high school students enroll in community college credit courses in a variety of ways including through Postsecondary Enrollment Options (PSEO) courses, college courses offered through a contract between a local school district and a community college, and enrollment in a college course independently as a tuition-paying student.

While sometimes referred to as “dual credit,” joint enrollment does not necessarily entail credit being issued at both the secondary and postsecondary levels. Some programs, such as PSEO and concurrent enrollment, require that credit be issued at each level, while other joint enrollment opportunities have no such requirement.

Most joint enrollment opportunities fall under the rubric of Senior Year Plus. The legislation passed in 2008 consolidated and standardized several existing programs

involving college credit opportunities for high school students including PSEO, concurrent enrollment (which entails supplementary weighted funding for local school districts), career and regional academies, and advanced placement. The Community College MIS captures joint enrollment in three categories — PSEO, contracted courses (which may or may not be concurrent enrollment and generate supplementary weighting for the partnering local district), and tuition.

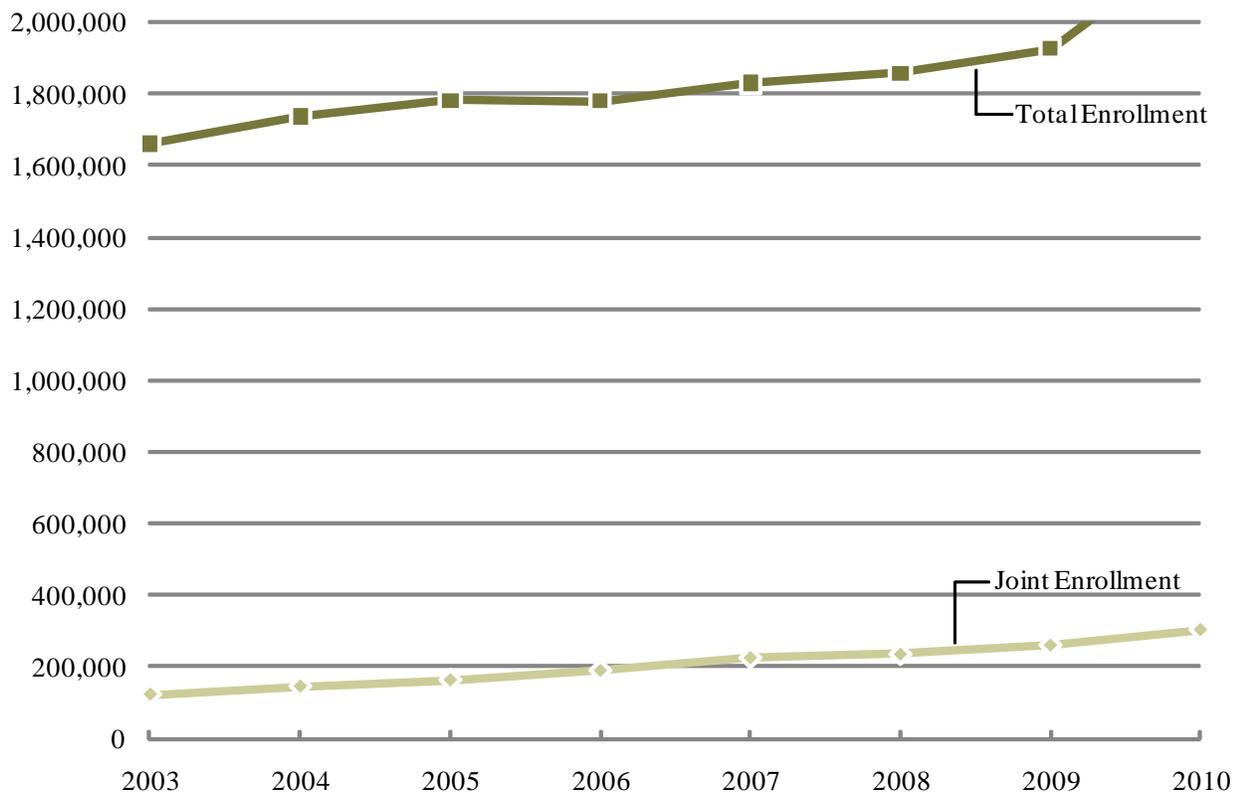

Joint enrollment in Iowa community colleges has steadily risen to a record high of 38,283 unduplicated students in fiscal year 2010 (Figure 5-1). Since fiscal year 2003, joint enrollment has increased 114.7 percent or about 10.0 percent per year. Fiscal year 2010 had faster growth than the eight year average (14.2 percent),

Figure 5-1: Fiscal Year Joint Enrollment: 2003-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, see Table 5-4.

a sharp increase from the previous two years which saw slower growth.

Enrollment growth of jointly enrolled students has continued to outpace the rate of growth of total credit enrollment which soared 11.8 percent in fiscal year 2010 (Section 3). Enrollment of students not jointly-enrolled in high school increased 11.1 percent after growing 3.3 percent in fiscal year 2009 and declining in fiscal years 2006 and 2007.

The number of credit hours taken by each student increased slightly from fiscal year 2008 (Figure 5-2) with each jointly enrolled student enrolling in an average of 8.0 credit hours (Figure 5-3). The number of credit hours taken per jointly enrolled student has increased slightly more than one credit hour since fiscal year 2003. Special analysis in 2008 showed that jointly enrolled students take slightly less than three classes on average. Because high school students generally enroll part-time, they account for a smaller proportion of total credit hours than for total enrollment (Figure 5-4). In fiscal year 2010, joint enrollment accounted for 13.6 percent of total credit hours.

The rate at which high school students enroll in community college coursework varies by local school district and community college region (Figure 5-11).

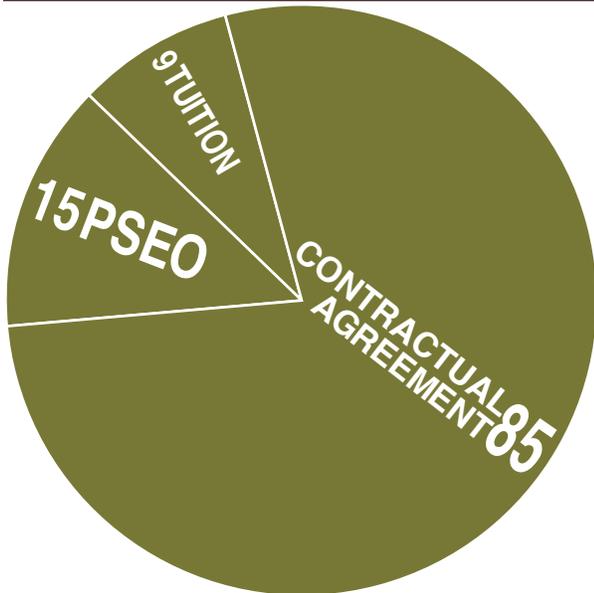

Nationally, public two-year colleges offer college credit coursework to high school students at higher rates than other sectors of higher education (Kleiner and Lewis, 2005). In 2005, 98 percent of public two-year colleges nationwide had high school students jointly enrolled in college credit coursework compared with 77 of public four-year institutions. In Iowa, delivery

JOINT ENROLLMENT BY OFFERING ARRANGEMENT

Note: Joint Enrollment by Offering Arrangement does not total 38,283 because some students are enrolled in multiple categories.

Figure 5-5: Credit Joint Enrollment by Offering Arrangement Type: 2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, see Tables 5-5, 5-6, and 5-7.

of programming to high school students is a part of the community colleges' mission (Iowa Code 260C.1) and, consequently, all 15 community colleges are committed to offering college credit opportunities to these students.

Joint Enrollment Offering Arrangements

Contracted courses had the largest enrollment of the three types of joint enrollment offering arrangements accounting for 77.9 percent of jointly enrolled students in fiscal year 2010 (Figure 5-5). Enrollment in contracted courses rose 13.9 percent from the previous year to 32,380 students. PSEO, which accounts for 13.6 percent of joint enrollment, had a 3.7 percent decrease from fiscal year 2009. Enrollment of tuition paying students soared 46.0 percent over the prior year, exceeding last year's 20.7 increase.

Jointly Enrolled Student Demographics

The typical jointly enrolled community college student, as with prior years, is female, 18 years old, and white. Compared with the overall student body, jointly enrolled students are proportionally more white and male. In fiscal year 2010, approximately 51.0 percent of joint enrollees were female compared with 55.6 percent of the overall student body (Figure 5-6). The phenomenon of proportionally greater male enrollment is driven by contracted course enrollment which was 50.9 percent male in fiscal year 2010. In terms of gender, contracted course enrollment more closely mirrors high school enrollment than community college enrollment. In contrast, PSEO and tuition enrollment were 63.5 percent and 62.3 percent female respectively.

The racial/ethnic background of joint enrollees is less diverse than either total community college enrollment or public K-12 enrollment. In fiscal year 2010, approximately ten percent of joint enrollees were reported as having a minority racial/ethnic background. Tuition course enrollment had the largest proportion of minority students (12.0 percent) followed by contracted course (10.4 percent) and PSEO (4.1 percent). Hispanics were the largest minority group with 43.0 percent of

minority joint enrollment followed by black and asian students with 23.0 percent and 19.2 percent respectively (Figure 5-7). In contrast, 13.7 percent of the overall community college student body was reported to have a minority racial/ethnic background, 45.5 percent of which were black and 28.7 percent of which were Hispanic.

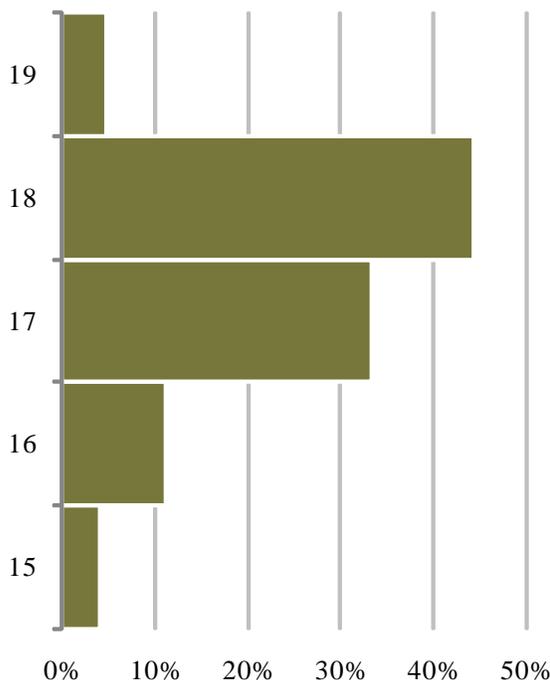

As expected, jointly enrolled students were younger than the overall community college student body, but few were younger than age 17 (about 15 percent). More than 78 percent of jointly enrolled students were age 17 or 18 (Figure 5-8).

Jointly enrolled students were also almost exclusively residents of Iowa (Table 5-15). In fiscal year 2008, 99.6 percent of jointly enrolled students were from Iowa (139 out-of-state students were jointly enrolled).

Grade Level of Jointly Enrolled Students

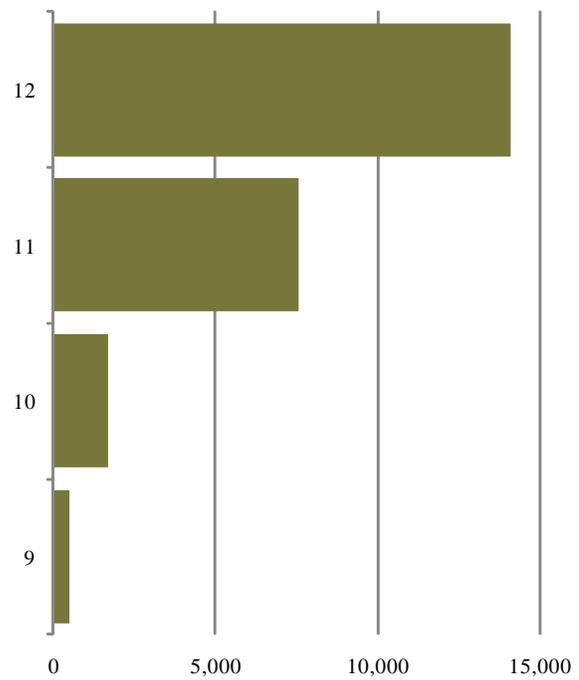

Jointly enrolled students tend to be high school upperclassmen and, in particular, seniors. More than 91 percent of jointly enrolled students were in their last two years of high school. Seniors accounted for 59 percent of jointly enrolled students while a third were juniors. Data on student grade level is derived through a match between the state’s K-12 data repository and the Community College MIS.

CREDIT STUDENT AWARDS

Fiscal year credit awards track students who received any type of a community college award during fiscal year 2010. Award counts include the same student each time she receives an award during this period of time. In 2010, the number of awards declined, but the composition of community college awardees remained relatively the same.

Number of awards increased in 2010 to a record high 15,898, or by 10.9 percent compared to 2009. On average, the number of awards in Iowa community colleges has increased three percent since tracking began in fiscal year 2000. Overall, the number of awards has been steady since 2006 while fluctuating between 2000 and 2005 (Figure 6-1).

There are a variety of credit student awards granted by Iowa community colleges. Awards offered include Associate of Arts (AA), Associate of Science (AS), Associate of General Studies (AGS), Associate of Applied Arts (AAA), Associate in Applied Science (AAS), Diplomas, and Certificates. Associate of Arts comprised 4,919 (30.9%) of the total credit student awards granted during fiscal year 2010. Associate in Applied Science awards accounted for another 4,482 (28.1%) of awards issued. The share of Associate of Science awards decreased from 8.1 percent in 2009 to

ASSOCIATES OF ARTS

437 more awards than Associates of Applied Science

NUMBER OF AWARDS:

15,898

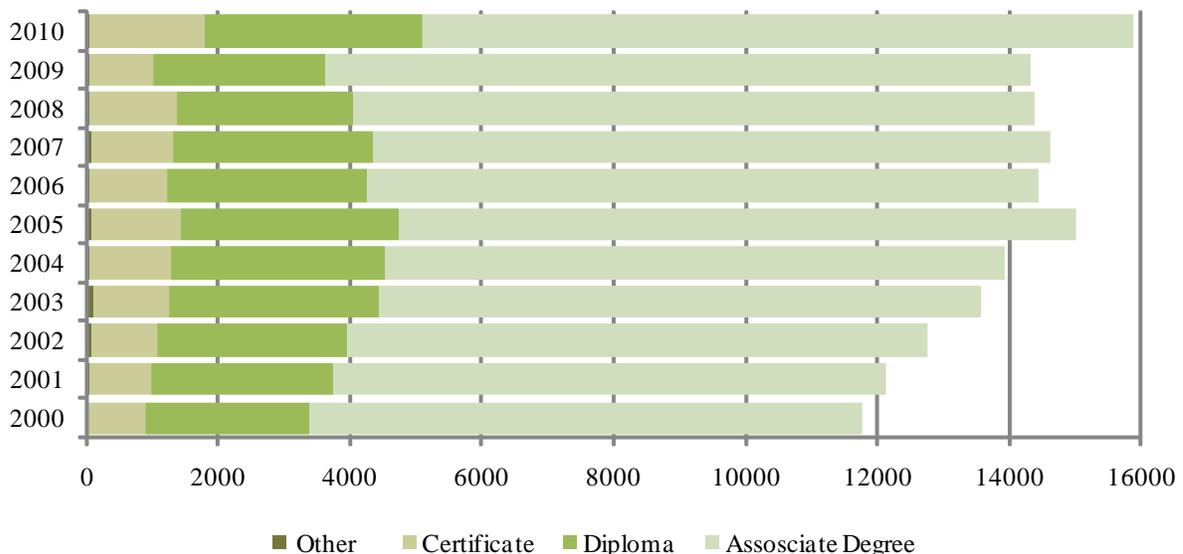

GROWTH SINCE LAST YEAR:

↑ 11%

7.6 percent in 2010. The share of certificates increased from 9.3 to 11 percent, to a record high 1,753 between the same years; the same is true for diplomas: 20.9 percent increase to a record high 3,317.

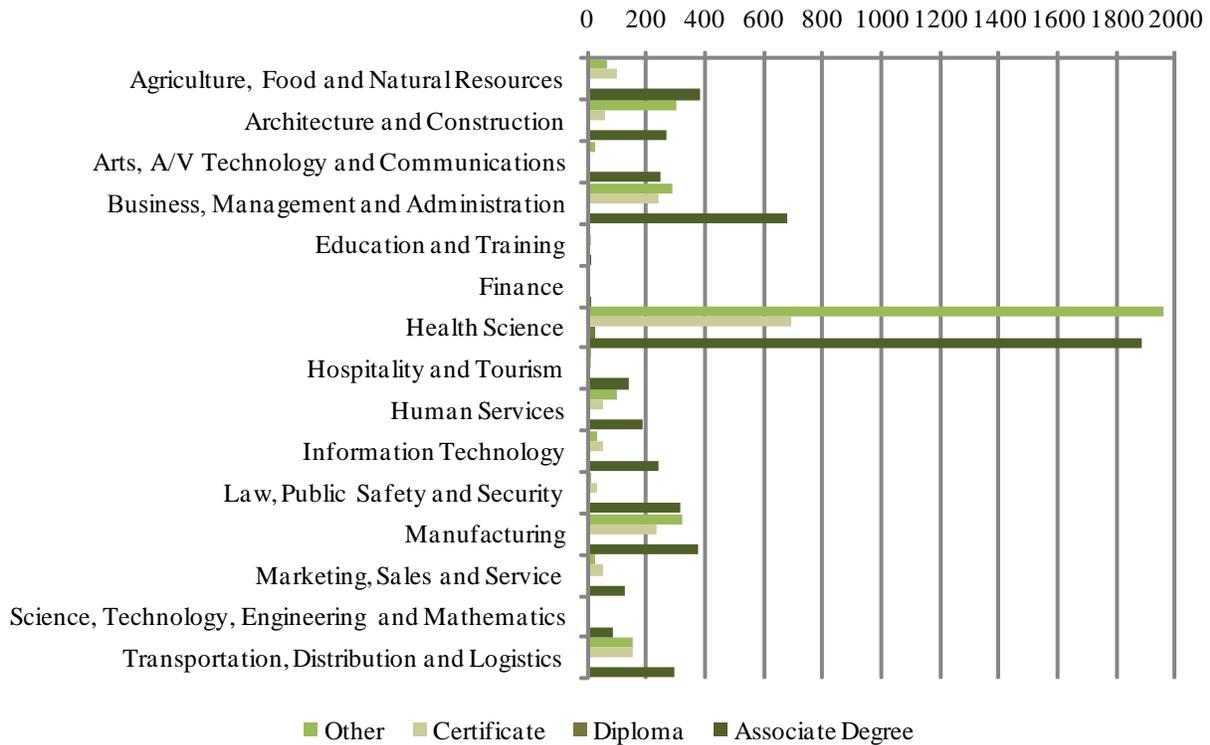

Credit student awards by program majors have remained fairly consistent over the past five years. All areas reflect some fluctuations between fiscal year 2005 and fiscal year 2010. In career and technical education (CTE) programs, the largest number of awards was granted in the health science; followed by business; manufacturing; architecture and construction; transportation, distribution and logistics; and Agriculture, Food, and Natural Resources programs. Steadily over the last 11 years, the prevailing number of degrees (over 50%) were Associate's degrees, followed by Diplomas

Figure 6-1: Awards by Type: 2000-2010

SOURCE: Iowa Department of Education, Bureau of Community College Services, Community College MIS, see Table 6-1.

Figure 6-2: Fiscal Year Student Award by Program Major: 2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation Community College MIS, see Table 6-15. and Certificates (Figure 6-2).

Although the national data does not classify program areas in the same educational clusters, recent data is analogous to Iowa’s community colleges. Like Iowa, most awards were granted in general studies intended to prepare for a four-year degree, followed by health/clinical sciences, and business (Provasnik and Planty, 2008).

Awardees Demographics

The typical community college awardee is a white female with an AA or AAS in Health Science degree. While in general the same distribution is true for credit student enrollment, the awards tend to be distributed heavier towards women. While 56 percent of all enrollees in Iowa community colleges in 2010 were women, 59 percent of all awardees in 2010 were women (Figure 6-3). Nationally, women also earn more awards than men (Knapp, Kelly-Reid, and Ginder, 2008): 63 percent of awards in community colleges were given to women in the U.S.

The similar trend is present for the racial distribution: while whites comprise 86 percent of Iowa community colleges enrollees in 2010, they comprise close to 91 percent of all community college awardees in 2010.

The distribution of awards among racial minorities does not mirror enrollment, either. Blacks are still the largest group of awardees among the racial and ethnic

minorities (37.6%), and the largest group of 2010 enrollees among racial minorities (45.5%), but the students of Hispanic origin comprise 34 percent of all awardees among racial and ethnic minorities, while representing only 28.7 percent of all minorities’ enrollees in 2010 (Figure 6-4).

Similar to all awardees, the overwhelming majority

Figure 6-3: Awards by Gender: 2010

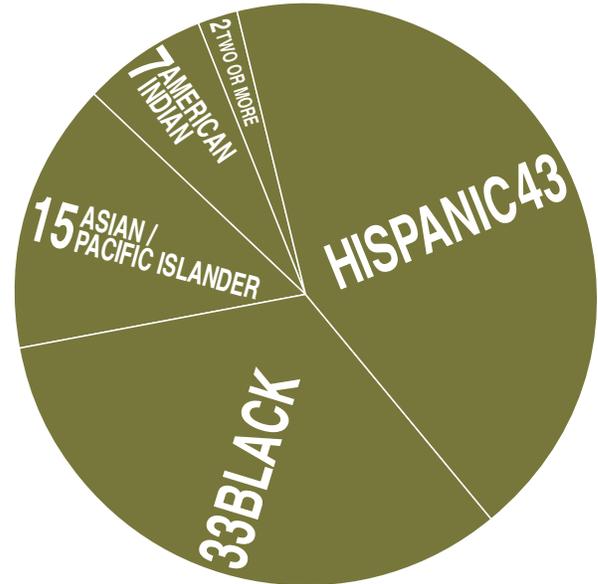

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS, see Table 6-3.

of awards received by racial minorities falls into two-year degrees (67.2% in 2010), followed by diplomas (20.8% in 2010) and certificates (11.3% in 2010). Unlike the entire community college population, the number of awards among racial and ethnic minorities kept growing, with some fluctuations, from 2000 to 2010 (Figure 6-6).

In 2010, close to 44 percent of all CTE awards were in Health Science. The gender distribution, however, is even higher—66.5 percent of all CTE awards received by women were in Health Science. Women also lead in Business, Arts and Communications, while men receive more awards in Transportation, Manufacturing, Construction and Agriculture (Figure 6-5).

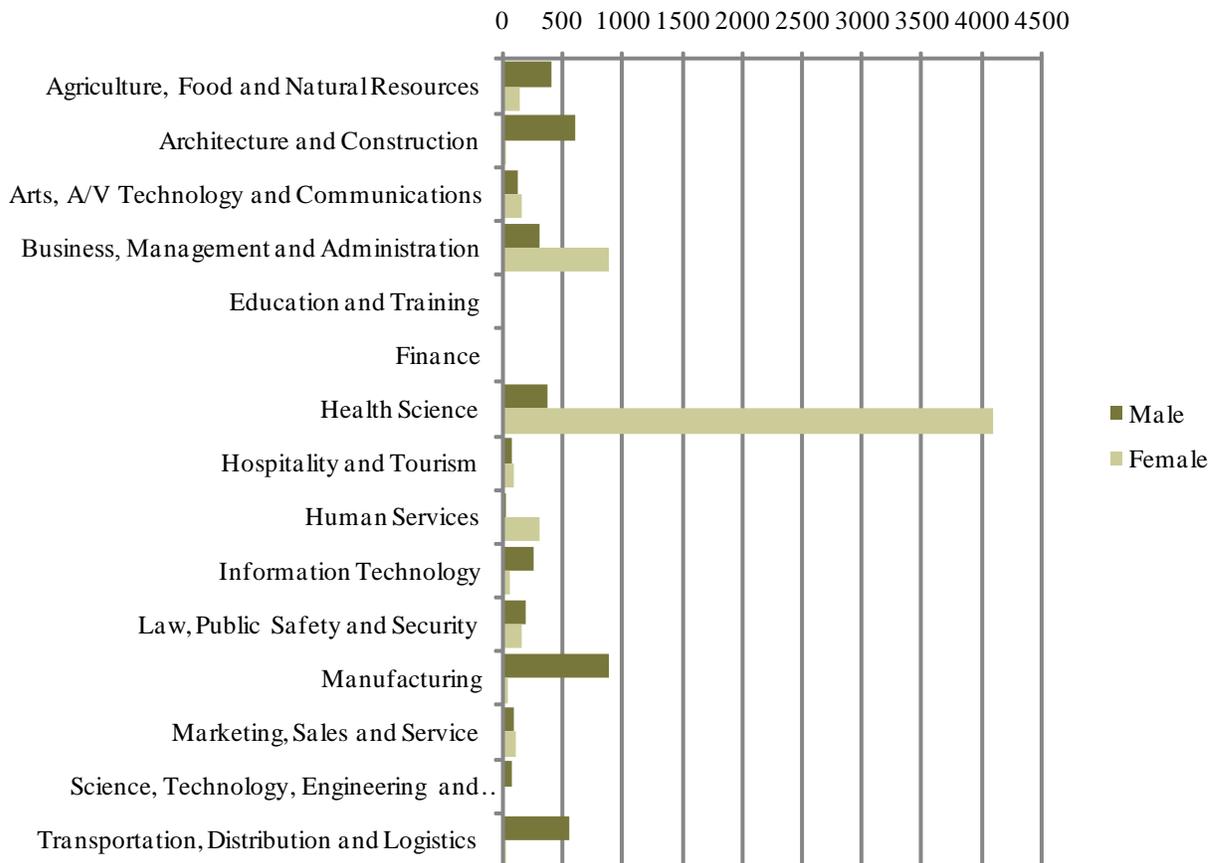

The majority of CTE awards for racial and ethnic minorities were among Health Science students, followed by awards in Business. The distribution, however, was different in comparison with all awardees; for example, only 38 percent of all CTE awards fell into Health Science for minorities (Figure 6-7).

7

CREDIT PROGRAMS

Community colleges are required to obtain approval from the Iowa Department of Education for all programs that are offered by community colleges. All 15 colleges have approval to offer arts and sciences programs. These two-year Associate of Arts or Associate of Science degree programs prepare students to enter a four-year college or university as a junior. Some of the pre-professional program majors available at Iowa community colleges are identified in Figure 7-1. Specific information on pre-professional majors, however, is maintained by the community colleges.

Approval of career and technical education (CTE) programs must be obtained for each program a community college offers. Iowa structures CTE programs around career clusters which are listed in Figure 7-2. These national career clusters are comprised of 16 individual groupings, or career clusters, of occupations/career specialties that can be used to organize curriculum and instruction. Occupations/career specialties are grouped into the career clusters based on a common set of knowledge and skills that are needed for career success. The knowledge and skills represented by career clusters

Figure 7-1: Pre-Professional Program Major Areas

Agriculture	Physical Therapy
Education	Pre-Dentistry
Nursing	Math
Architecture	Science
Engineering	Design
Pre-Pharmacy	Pre-Medicine
Business	Social Science
Pre-Law

prepare learners for a full range of occupations/career specialties, focusing on the holistic, polished blend of technical, academic, and employability knowledge and skills.

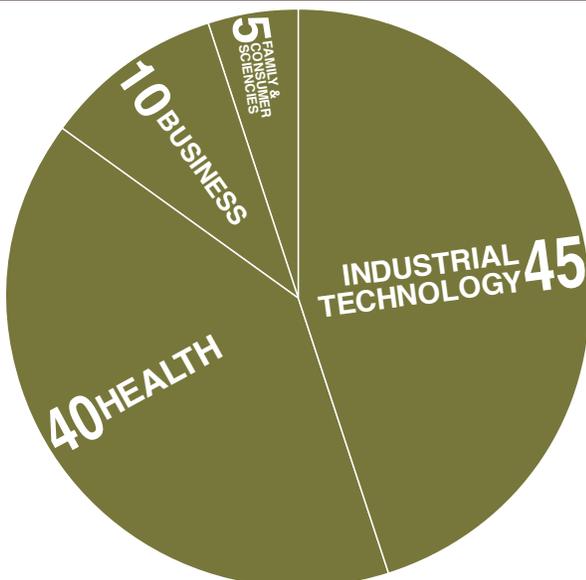

New Credit Programs

Table 7-1 indicates that in fiscal year 2010, the director of the Department of Education approved 20 new career and technical education programs for 12 community colleges. Eight programs were developed in health science; two programs were developed in architecture and construction; three programs were developed in manufacturing; one program was developed in hospitality and tourism, one program was developed in law, public safety and security; one program was developed in science, technology, engineering and mathematics; two programs were developed in business, management and administration; and two programs were developed in transportation, distribution, and logistics.

Each of the 16 national career clusters are categorized into one of seven service areas that are recognized within Iowa. Figure 7-3 illustrates the new programs developed in fiscal year 2010 by these seven service areas.

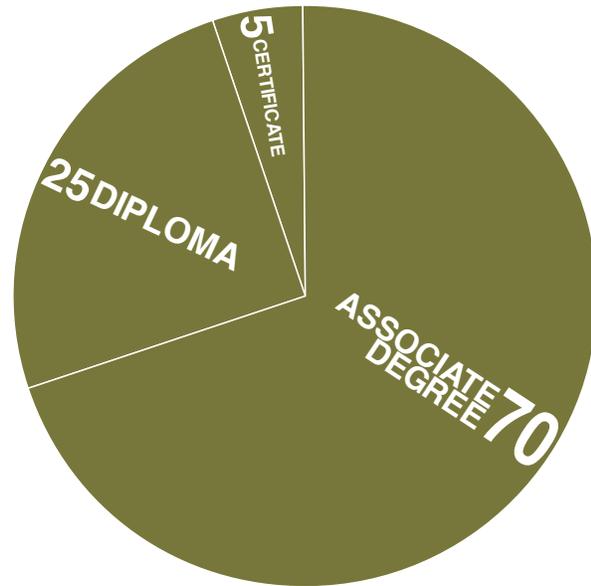

Figure 7-4 indicates that 70 percent (14 total) of the new CTE programs offered an associate degree. Only 25 percent (5 total) of programs offered a diploma award, and only five percent of programs (1 total) offered a certificate award.

Figure 7-4: New Credit Career and Technical Education Programs by Award Type: 2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Table 7-1.

Career and Technical Programs

Iowa community colleges modify their program content annually. Outdated programs are discontinued, and new programs are introduced. During 2010, Iowa community colleges offered 700 programs with 1,255 award options. Iowa community colleges offered 270 unique technical programs in a variety of careers. Even though some programs have been discontinued, the numbers for 2010 constitute growth compared to 2009: 1.7 percent in the number of programs, 3.0 percent in the number of award options, and close to 12.6 percent in the number of unique technical programs (Table 7-3).

NON-CREDIT ENROLLMENT AND PROGRAMS

Non-credit programs contain a variety of instructional offerings including personal and academic basic skill development, skill development for preparation of individuals entering the workforce, technical courses directly related to specific industry-based work opportunities, and courses to pursue special interests.

In fiscal year 2010, 268,933 individuals (unduplicated) participated in non-credit programs and courses. Enrollment decreased by 3.9 percent in fiscal year 2010, the second year of decline (Figure 8-1), after a 6.6 percent increase from 2007 to 2008. As enrollment decreased, total contact hours declined by 6.5 percent from fiscal year 2009 (Figure 8-2). Over the past five years, non-credit contact hours have decreased an average of 1.7 percent annually.

To ensure consistency in non-credit data reporting, reporting standards were significantly modified in fiscal year 2004, preventing consistent comparisons with prior years.

NON-CREDIT ENROLLMENT

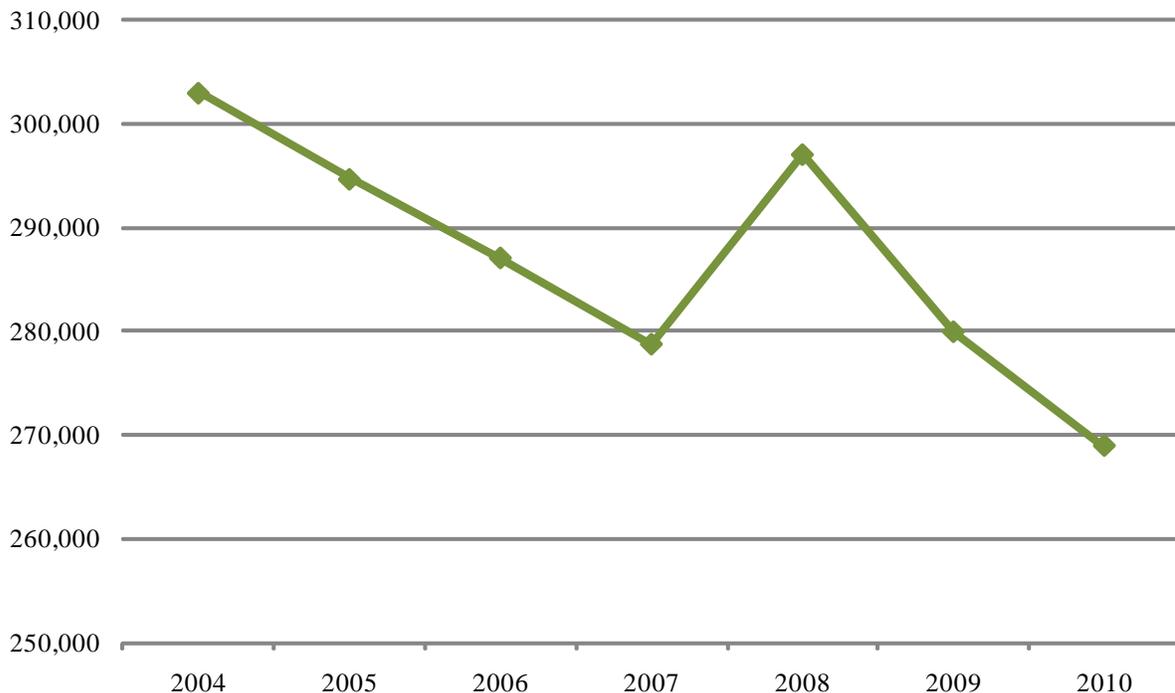

NUMBER OF STUDENTS:	268,933	CHANGE SINCE LAST YEAR:	↓ 3.9%
CONTACT HOURS:	8,199,437	CONTACT HOURS PER STUDENT:	30.0
	<small>Down 6.5% since 2009.</small>		<small>Down 4.3 hours since 2009.</small>

Online Non-Credit Courses

In fiscal year 2010, student enrollment in online courses increased for the second year by 34.8 percent from fiscal year 2009. After a decline of 65 percent from 2007 to 2008, non-credit online enrollment has increased steadily between 2008 and 2010, but remains down 12.8 percent from 2007 (Table 8-16).

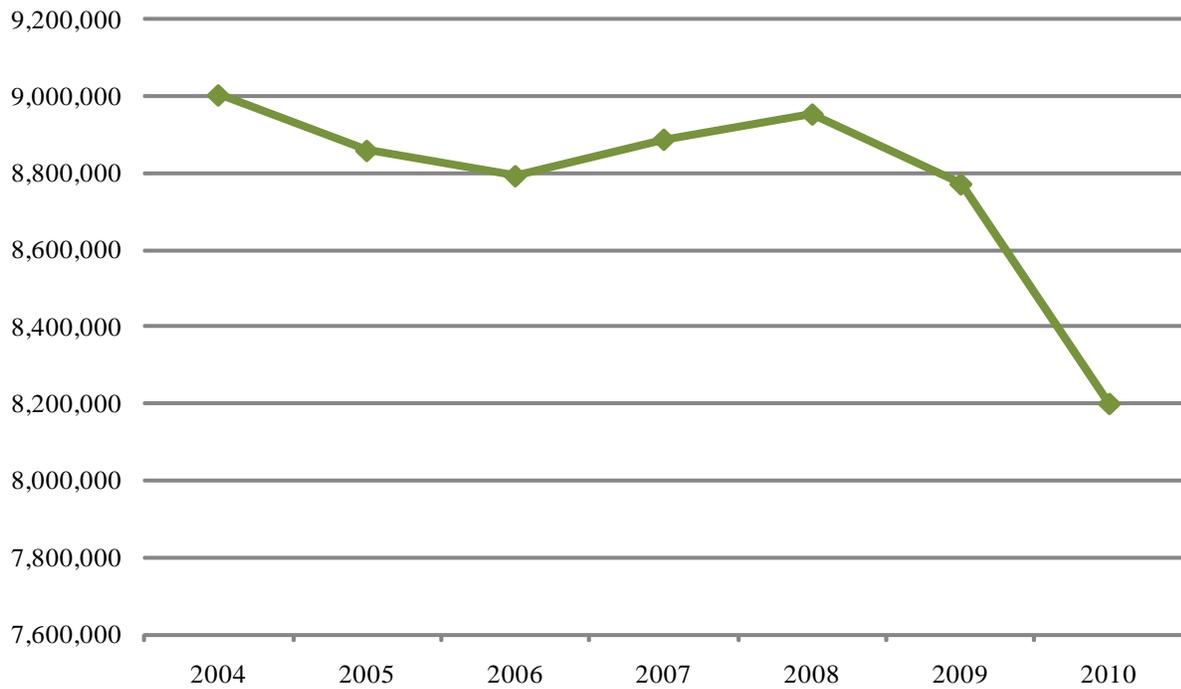

The use of online delivery for non-credit coursework appears to be limited. Only 2.4 percent of non-credit contact hours were delivered online in fiscal year 2010.

Figure 8-1: Fiscal Year Non-Credit Enrollment: 2004-2010

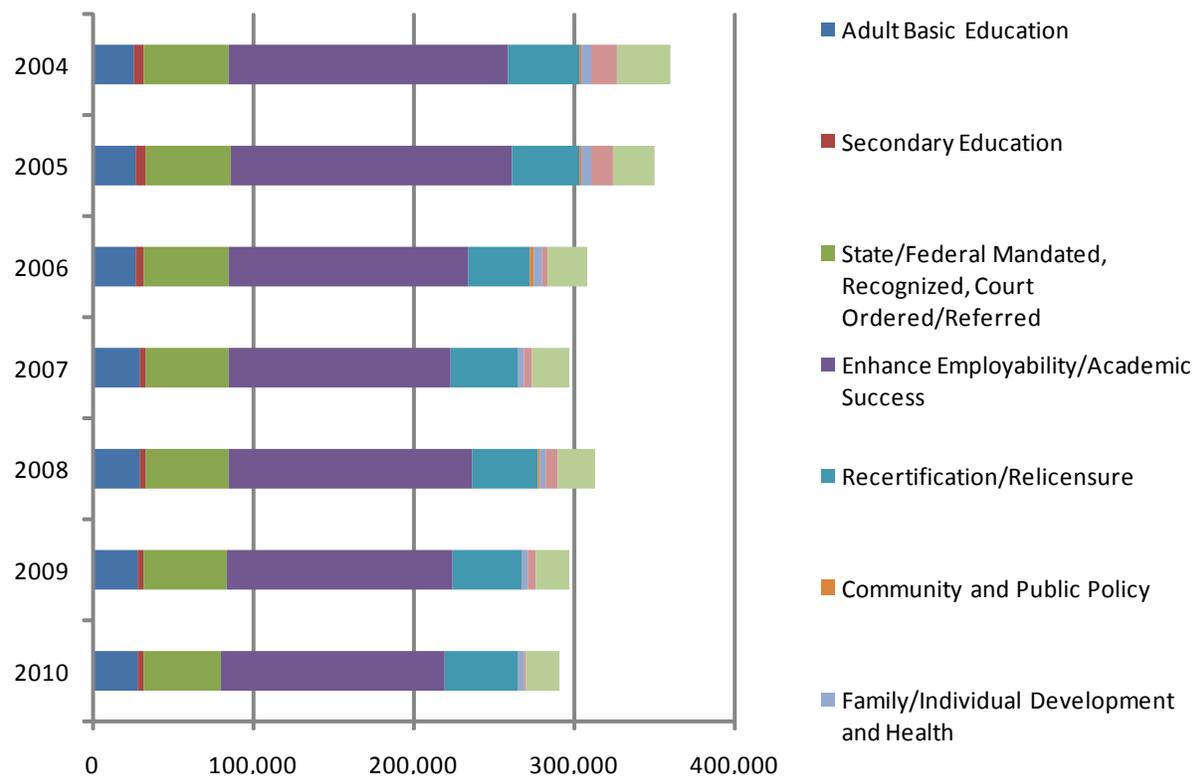

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS. See Table 8-1.

Figure 8-2: Fiscal Year Non-Credit Contact Hours: 2004-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS. See Table 8-2.

Figure 8-3: Non-Credit Enrollment by Program Type: 2004-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS. See Table 8-3.

Approximately 5.2 percent of individuals enrolled in non-credit coursework enrolled in some coursework delivered entirely online.

Non-Credit Students in Programs

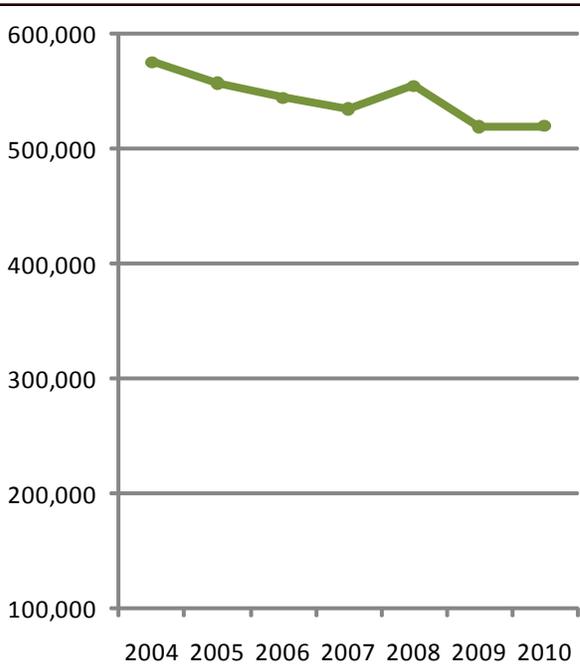

Enrollment in non-credit programs is disaggregated into several program categories (Figure 8-3). The largest of these categories consists of non-credit courses designed to enhance students' employability or academic success. More than 47.9 percent of students were enrolled in non-credit coursework in this category, which includes career/vocational training and upgrading programs, apprenticeship programs, economic development programs, re-certification/re-licensure courses, and corrections education programs. Courses under the category of "enhance employability" are designed for the specific purpose of upgrading the skills of persons presently employed and the retraining of persons for new employment. Courses under the "academic success" category are designed for the advancement of individuals' knowledge in traditional educational studies. Enrollment in courses within the "enhance employability and academic success" categories increased 0.9 annually between fiscal years 2006 and 2008. After an increase of 5.2 percent in fiscal year 2008, enrollment in this category decreased by 4.9 percent in fiscal year 2009 and 1.9 percent in fiscal year 2010. See Section 9, Adult Literacy; Section 10, Economic Development; and Section 11, Apprenticeship for more information.

The second largest category of non-credit enrollment includes programs/courses that are state or federally-mandated, state-recognized, or court ordered/referred. Approximately 16 percent of non-credit students enrolled in programs within this category. This category includes the Iowa Course for Drinking Drivers, driver improvement courses, community rehabilitation programs, used auto dealer training, mine safety and health courses, and various vehicle operator training courses. Enrollment in courses within this category has been steady, demonstrating only a slight decrease over the past five years.

The Iowa Course for Drinking Drivers is the state-mandated 12-hour instructional course for individuals convicted of driving while under the influence of drugs and/or alcohol. Iowa community colleges and private providers licensed through the Iowa Department of Public Health offer the state-approved program. Enrollment in drinking driver education courses decreased 3.1 percent in fiscal year 2010 (Figure 8-5). Over the past five years, enrollment in these courses has decreased an average of 1.5 percent annually.

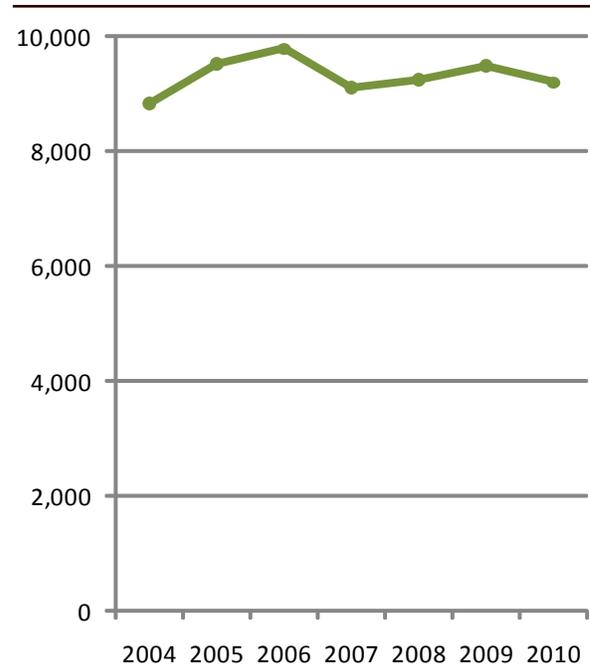

The Iowa Course for Driver Improvement (DIP) is the state-mandated course designed for persons who have committed a serious violation of a motor vehicle law in Iowa. Iowa community colleges provide the program with the assistance from the Iowa Department of Transportation. Enrollment in the program decreased an average of 1.5 percent annually from fiscal year 2006

to fiscal year 2010 after increasing 2.6 percent in fiscal year 2009 and 1.4 percent in fiscal year 2008 (Figure 8-6).

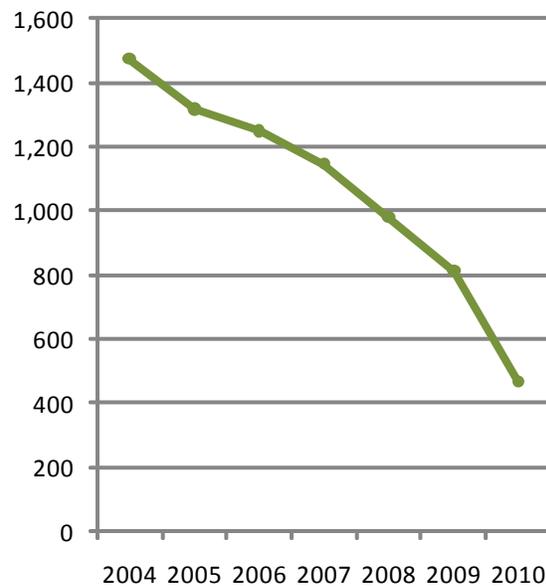

Iowa community colleges also deliver education programs for people in community rehabilitation centers (sheltered workshops). Enrollment in these programs has decreased sharply over the past five years—down an average of 21.7 percent annually (Figure 8-7).

The Iowa Department of Education administers a federal grant from the U.S. Department of Labor and Mine Safety and Health Administration (MSHA), which provides funds for training and services delivered to mine owners/operators/contractors in the state of Iowa. Enrollment in community college-delivered mine safety programs decreased an average of 26.4 percent annually from fiscal year 2006 to fiscal year 2010 (Figure 8-8). Total contact hours decreased by 70.3 percent from fiscal year 2009 to fiscal year 2010.

Non-Credit Corrections Enrollment

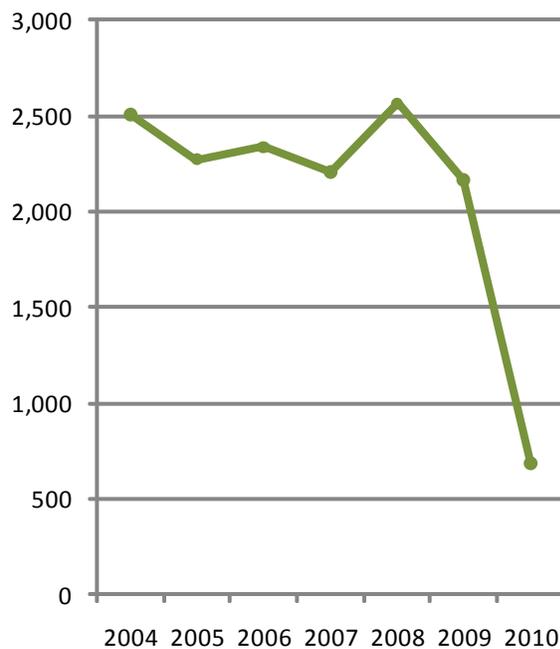

Iowa community colleges deliver credit and noncredit coursework to residents of correctional institutions to enhance the life skills and academic and/or employability success of criminal offenders. In fiscal year 2010, 3,126 residents of correctional institutions were enrolled in noncredit coursework. Enrollment decreased 0.4 percent over fiscal year 2009 and has declined over the past three years—down an average of 2.8 percent from fiscal year 2006.

ADULT LITERACY ENROLLMENT AND PROGRAMS

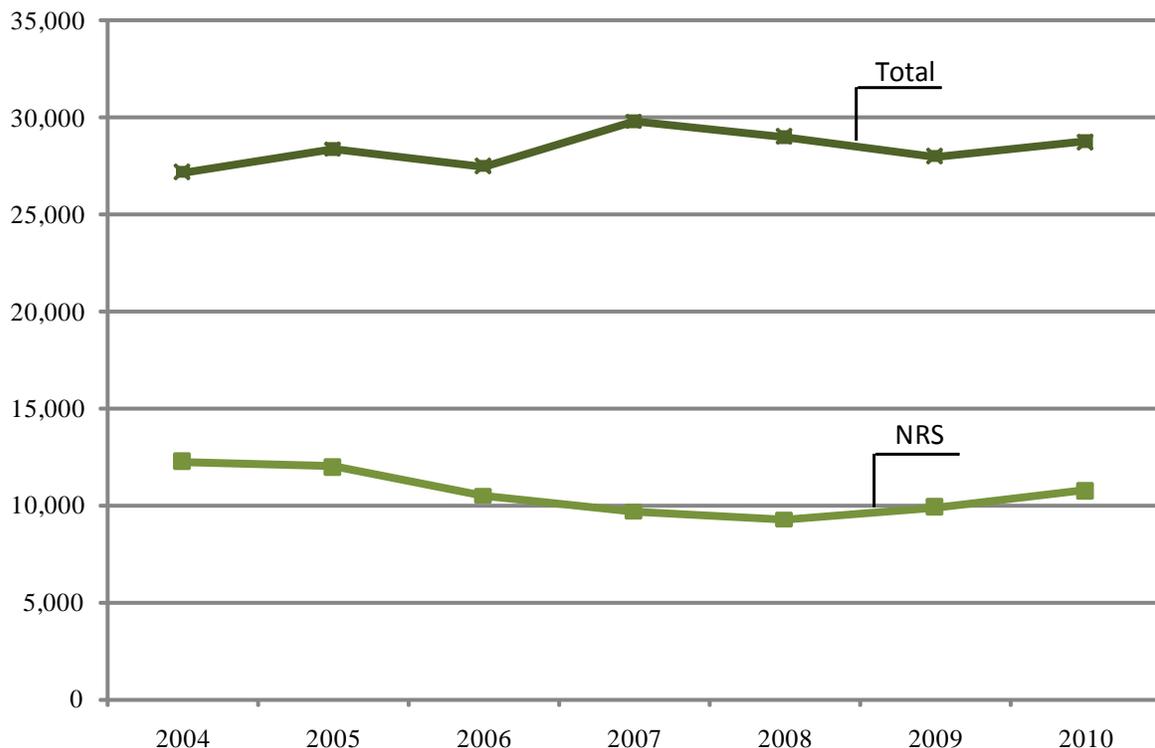

Iowa's adult literacy programs are delivered through the state's 15 community colleges. Through non-credit instruction, adult literacy programs are delivered on a continuum from English as a Second Language (ESL) to earning a high school equivalency diploma (GED). Adult learners develop competence in reading, writing, speaking, problem-solving, and computation. Skills set instruction is contextualized within workforce competency curriculum.

Adult literacy program enrollment, reported through the Community College Management Information System (MIS), has increased an average of 1.1 percent annually from fiscal year 2006 to 2010 (Figure 9-1). In 2010, 28,760 students were enrolled in adult literacy programs including a subset of students (10,752) that were included in the federal reporting of adult literacy students. Total adult literacy enrollment data collected through the MIS includes all students who attended at

least one, 50-minute class period. The subset of adult literacy students meeting National Reporting System (NRS) requirements is included in year-end federal reporting. While only a part of the overall population is served by adult literacy programs, this subset represents learners achieving outcomes fundamental to academic and vocational success. The NRS is the state administered accountability system for adult education

Figure 9-1: Adult Literacy Program Enrollment: 2004-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation. See Tables 9-1, 9-2.

program, federally funded through Adult Education and Family Literacy Act (AEFLA). The NRS specifies parameters for students to be included in reporting to the U.S. Department of Education is Office of Vocational and Adult Education (OVAE): learners must be 16 years old, may not be jointly enrolled in high school, and must be enrolled in an eligible program. NRS reported learners are the subset of learners demonstrating persistence, academic gain, goal-setting, and outcomes that include earning a GED, entering postsecondary education or training, and obtaining or retaining employment.

The MIS reported enrollment has remained constant from 2006 to 2010, while the NRS reported enrollment has declined annually from 2001-2008. Based on program year 2009, OVAE and NRS changes to the data parameters; Iowa programs are required to report all students served with AEFLA funding into the NRS reported database. Over time, the expectation is that federally-reported data will increase to levels congruent with the enrollment reported to the MIS for state general aid reimbursement. The NRS enrollment increase is due,

ADULT LITERACY PROGRAM ENROLLMENT

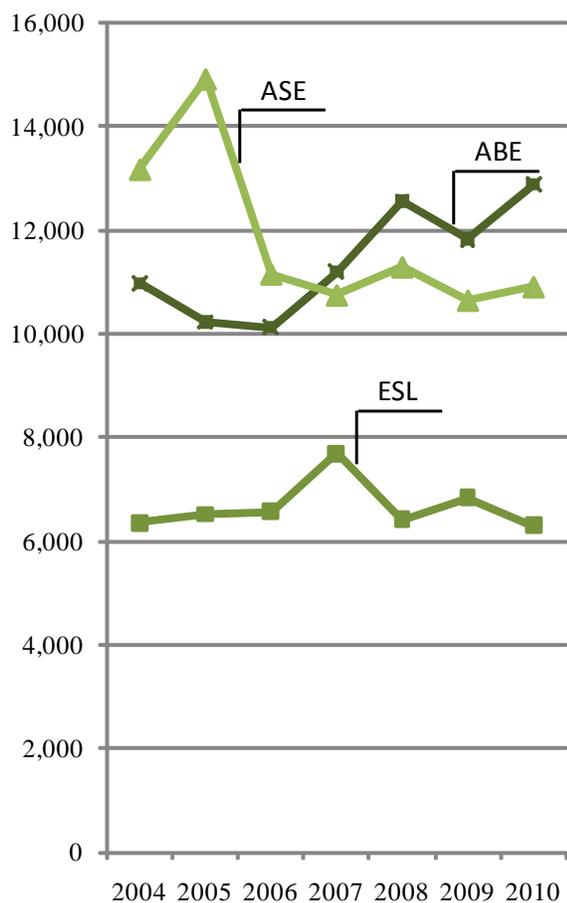

ABE ENROLLMENT	GROWTH SINCE LAST YEAR
12,884	↑ 12.2%
ESL ENROLLMENT	DECLINE SINCE LAST YEAR

in part, to an emphasis shift to entering all MIS enrollees in the NRS database.

Enrollment in Instructional Programs

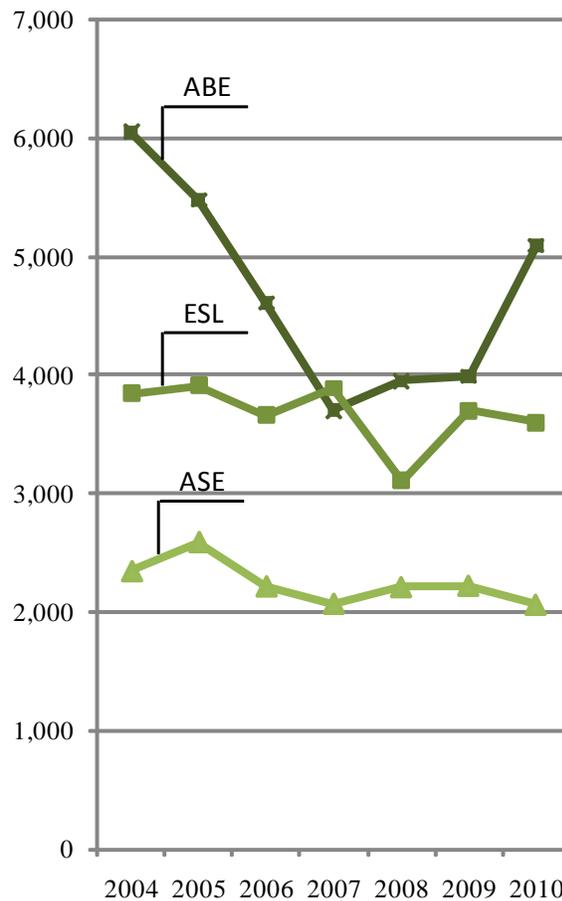

Adult literacy instructional programs represent a progression of basic skill attainment. Instructional programs include ESL, Adult Basic Education (ABE)

Figure 9-2: Adult Literacy Enrollment by Program: 2004-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation. See Tables 9-3, 9-5, 9-7.

skill attainment, and Adult Secondary Education (ASE).

ESL instructional programs are designed for individuals with limited English proficiency (speaking, reading, writing, or comprehension) to increase competence in English. Enrollment in ESL instructional programs declined an average of one percent annually between 2006 and 2010 (Figure 9-2). NRS reported ESL enrollment decreased 0.4 percent (Figure 9-3).

ABE instructional programs are designed for adults lacking competence in reading, writing, speaking, problem-solving, or computation at a level to function in society, employment, or in a family. Enrollment in ABE programs has increased an average of 6.2 percent annually since 2006. NRS reported enrollment in ABE programs rose 28 percent from 2009 to 2010, in part because of local program compliance coding according to NRS educational functioning level guidelines. Enrollment in ABE programs went from an average 6.1 percent decline from 2005 to 2009, to an average 2.5 percent increase from 2006-2010. Through ASE instructional programs, students acquire the skills to earn an Iowa High School Equivalency Diploma by passing the General Educational Development (GED) test battery or earn an adult high school diploma issued upon successful completion of courses delivered by community colleges. Enrollment in ASE programs has decreased an average of 0.6 percent annually since 2006, due, in part, to a decrease in adult high school diploma enrollees. GED enrollment has increased an average of 0.2 percent since 2006. The NRS reported ASE program enrollment decreased 1.8 percent from 2006 to 2010.

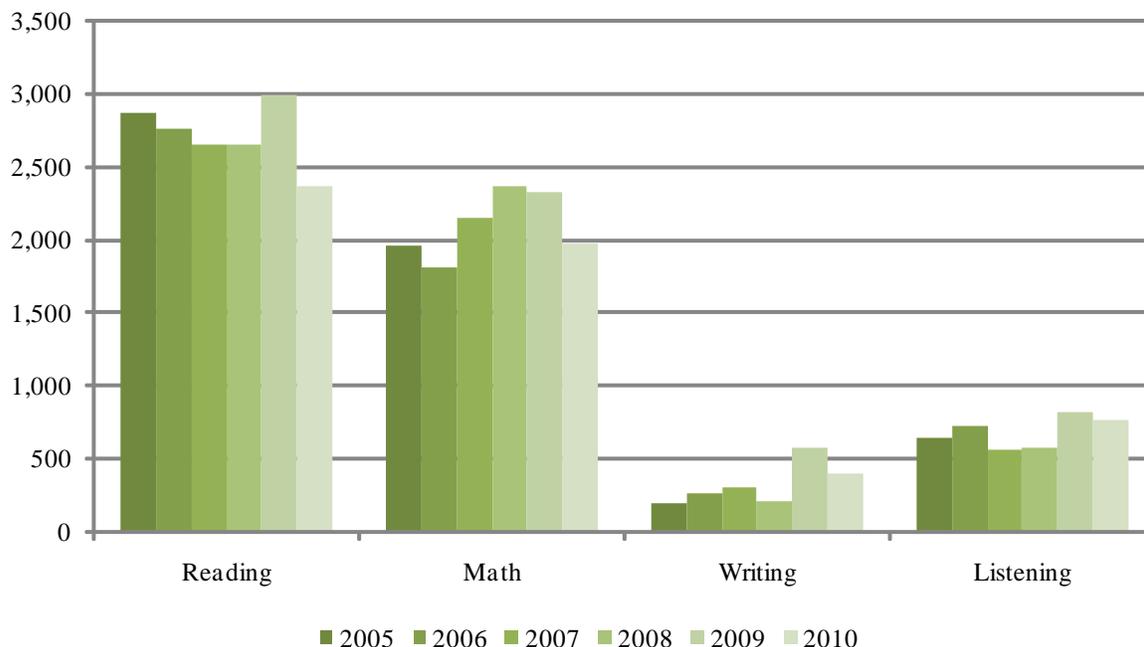

NRS-REPORTED ADULT LITERACY PROGRAM ENROLLMENT

ABE ENROLLMENT	5,095	GROWTH SINCE LAST YEAR	↑ 21.6%
ESL ENROLLMENT	3,599	DECLINE SINCE LAST YEAR	↓ 2.9%
ASE ENROLLMENT	2,061	DECLINE SINCE LAST YEAR	↓ 7.8%

Enrollment in Adult Literacy Credentialing Programs

Iowa's community college adult literacy programs include three credentialing programs providing adults with the opportunities to earn basic skills certifications, the Iowa high school equivalency diplomas (GED) and adult high school diplomas. Prior to program year 2009, traditional high school diplomas were included in the credentialing program. Because these learners are reported as high school graduates via other Iowa Department of Education MIS programs, the traditional high school diploma awards are no longer included in WIA title II (Adult Literacy) reported totals. Adult literacy award data is collected through the Tracking of Students and Programs (TOPSpro) system. In 2010, a total of 9,962 credentials were issued to adult learners as a result of successful completion of adult literacy programs, down 36 percent from 2008. The decrease

is attributed to the 2009 OVAE reporting changes, the removal of secondary school diplomas and alternative high school enrollees, and a decrease in adult high school diploma enrollees.

The Basic Skills Certification Program awards certificates for successful attainment of basic literacy competencies below the GED level. The program awards a total of 15 basic literacy certificates in the areas of reading, mathematics, writing, and listening at four certification levels based on the Comprehensive Adult Student Assessment System (CASAS). The program was initiated in fiscal year 1998 with reading and mathematics components and later expanded to writing in 2002 and listening in 2004. The listening component provides an opportunity for English literacy adult learners to assess gain in speaking and listening comprehension of the English language.

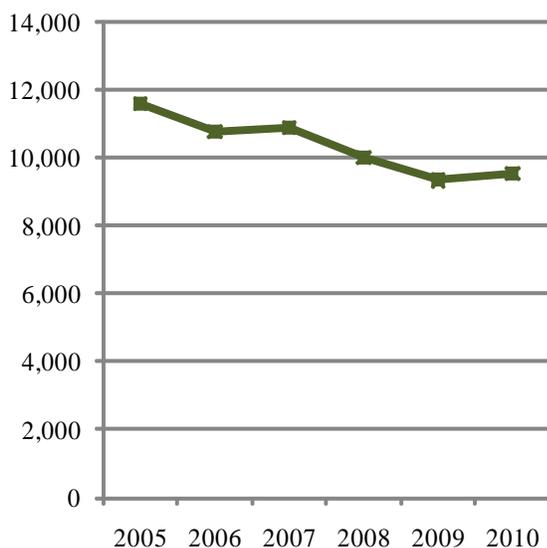

Prior to fiscal year 2009, the Condition of Community Colleges report included basic skill certification totals that included community college reported totals for “cooperating programs.” The additional certificates were not included in the data set provided by the adult

literacy data program TOPSpro and were self-reported by each community college. Programs are now required to enter all cooperating program data into TOPSpro to produce verifiable and replicable results. As a result, the outcomes are based upon two years of reported data. Based on OVAE and NRS requirements to change the data parameters in program year 2010, students with 12-39 hours of instruction were not post-tested and excluded from enrollment of students eligible to earn a basic skill certificate. As a result, total enrollment rose 8.4 percent from 2009 to 2010. However, enrollment of students eligible to earn a basic skill certification declined sharply by 19 percent from 2009 to 2010 (Table 11-9).

The Iowa high school equivalency diploma is awarded to adults who successfully complete the GED test battery. Initiated in 1966, the purpose of the GED program is to provide a second opportunity to individuals who did not complete the requirements for a traditional high school diploma. The number of GEDs awarded increased by four percent from 2008 to 2010. According to the MIS, 9,546 students were enrolled in GED programs in fiscal year 2010 (Figure 9-5).

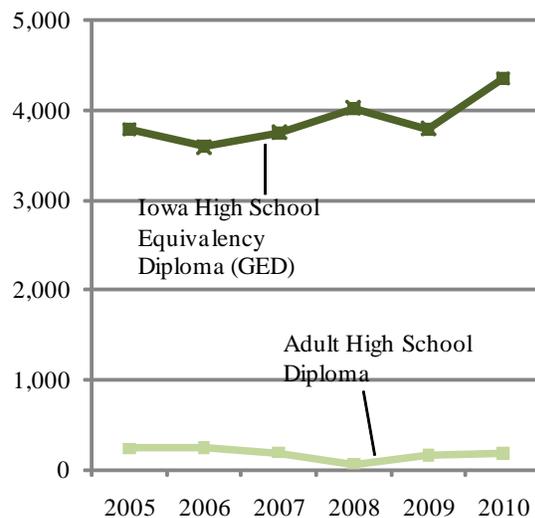

Adult high school diplomas are awarded to adults who successfully complete a prescribed program of instruction at a community college. The diploma is issued by the college. The program, initiated in 1966, is viewed as an alternative to the GED. The number of adult high school diplomas awarded has increased an average of 68.4 percent from 2008 to 2010 (Figure 9-6).

10

ECONOMIC DEVELOPMENT

The Iowa Department of Education began reports enrollment in Iowa Industrial New Jobs Training Programs (260E), Iowa Jobs Training Programs (260F), and Accelerated Career Education (ACE 260G) programs based on data provided by the Iowa Department of Economic Development (IDED).

The state of Iowa has established a series of programs, usually referred to by their chapter number in the Code of Iowa, targeted toward workforce development. The Iowa Industrial New Jobs Training Programs (260E), Iowa Jobs Training Programs (260F), and Accelerated Career Education (ACE 260G) are delivered through community colleges, but funding is provided through the IDED.

The Iowa Industrial New Jobs Training Programs assist businesses that are creating new jobs within the state. Iowa Jobs Training Programs are designed to build workforce skills and expertise. Finally, the ACE program helps community colleges expand programs that are critically needed in the workforce. Unlike 260E

and 260F programs, ACE is primarily delivered through credit programs.

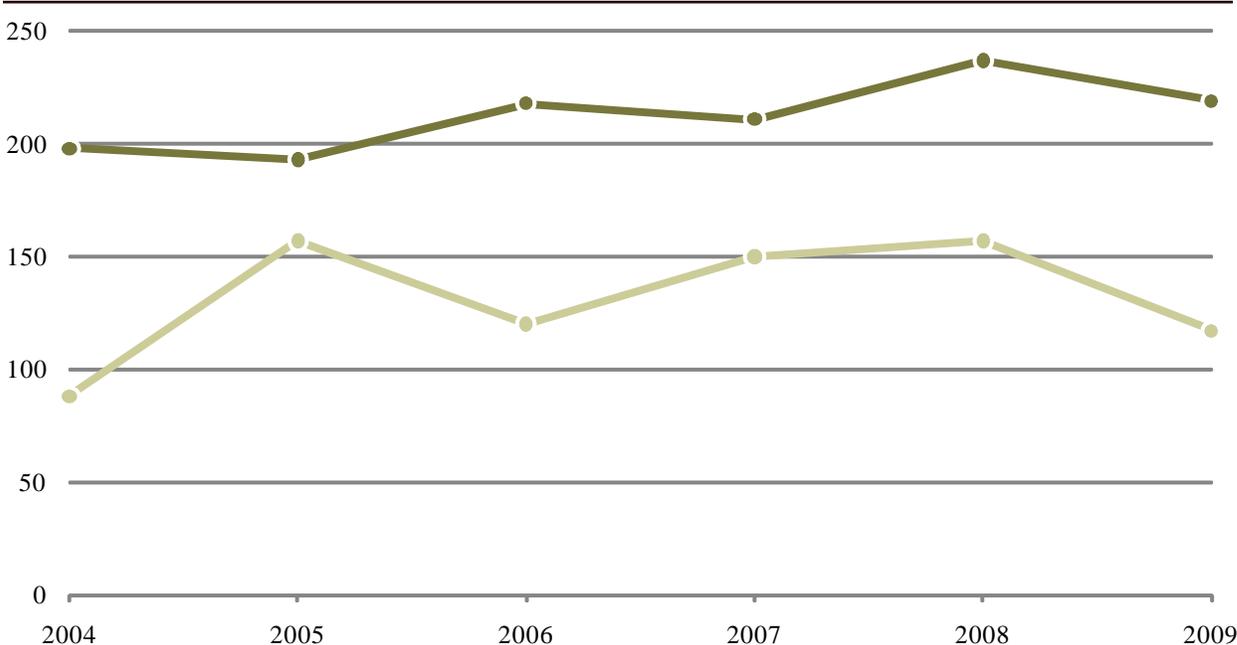

Iowa Industrial New Jobs Training Programs (260E)

Iowa Industrial New Jobs Training Programs (260E) assist businesses that are creating new positions or new jobs in Iowa. The community college district in which the new or expanding business is located issues training certificates (bonds) to pay for the training costs. Flexible funding may be utilized to meet a variety of training and employee development needs.

The training dollars awarded for this program continue to fluctuate from year-to-year. The training dollars awarded have decreased 16.2 percent since fiscal year 2005, or an average of 3.2 percent per year. The overall amount decreased by 20.9 percent from fiscal year 2008.

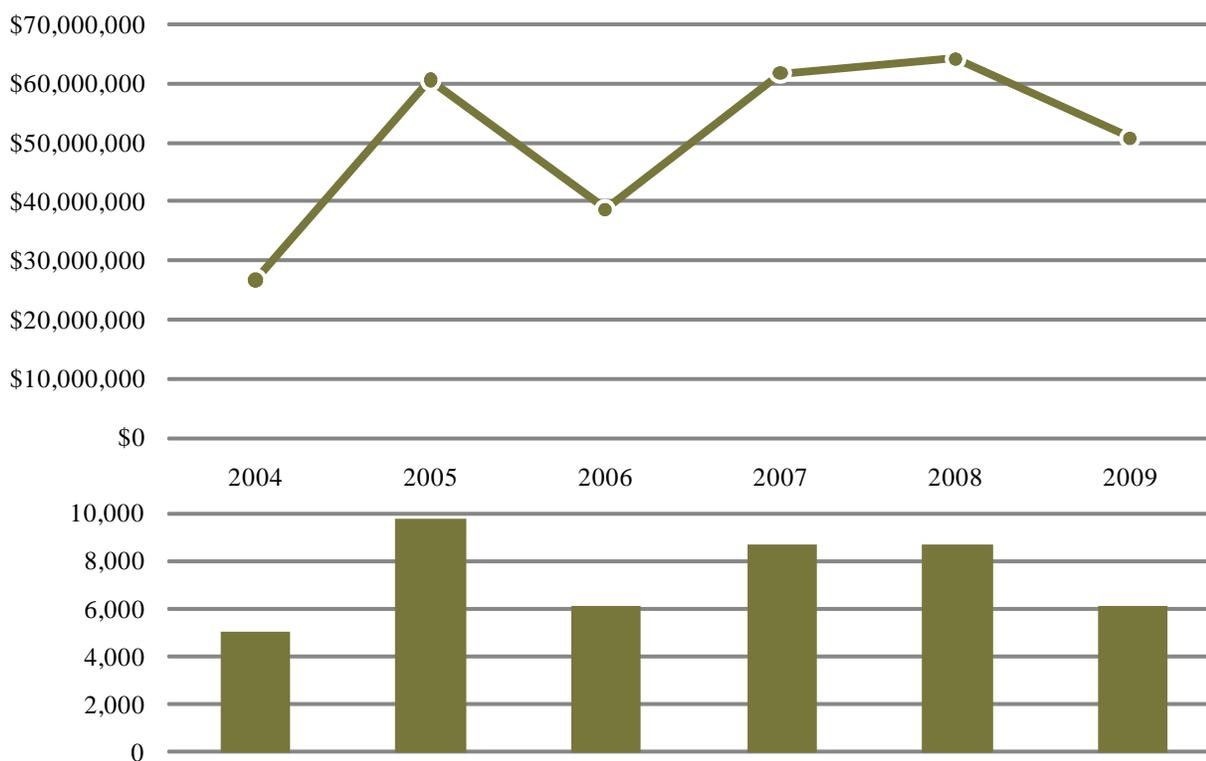

The number of projects awarded also continues to fluctuate. Since fiscal year 2005, a total of 679 projects have been awarded with 24 fewer projects awarded in fiscal year 2009 compared to the previous year.

Figure 10-1: Projects Awarded for 260E and 260F Programs: 2004-2009

SOURCE: Iowa Department of Economic Development, Workforce Business Service Training Annual Reports: 2004–2009, see Table 10-1, 10-2.

Figure 10-2: Training Dollars (top) and Trained (bottom) for 260E Programs: 2004-2009

SOURCE: Iowa Department of Economic Development, Workforce Business Service Training Annual Reports: 2004–2009, see Table 10-1.
NOTE: Number trained in 2009 is not available.

Compared to fiscal year 2005, fiscal year 2009 had 43 fewer projects awarded for a total of 114 for the year.

Iowa Jobs Training Programs (260F)

Iowa Jobs Training Programs (260F) foster growth and competitiveness of Iowa’s business and industry by building workforce skills and expertise. This program provides job training services to current employees of eligible businesses which are located in Iowa. This program is administered by the Iowa Department of Economic Development and services are provided by Iowa’s 15 community colleges. Each community college works with eligible businesses to assess training needs, determine funds availability, and provide training.

The number of individuals to be trained and the number completed in this program continue to fluctuate from year-to-year. Since fiscal year 2005, 29,595 individuals were classified to be trained and 24,146 completed the training. In fiscal year 2009, 683 more individuals were classified to be trained than fiscal year 2008 and 2,402 fewer individuals completed the training than the previous year.

The training dollars awarded for this program decreased in 2009. The training dollars awarded have

260F PROGRAMS

NUMBER OF STUDENTS COMPLETED:

894

7,089 students to be trained.

decreased 21.04 percent since fiscal year 2005, or an average of -4.2 percent per year.

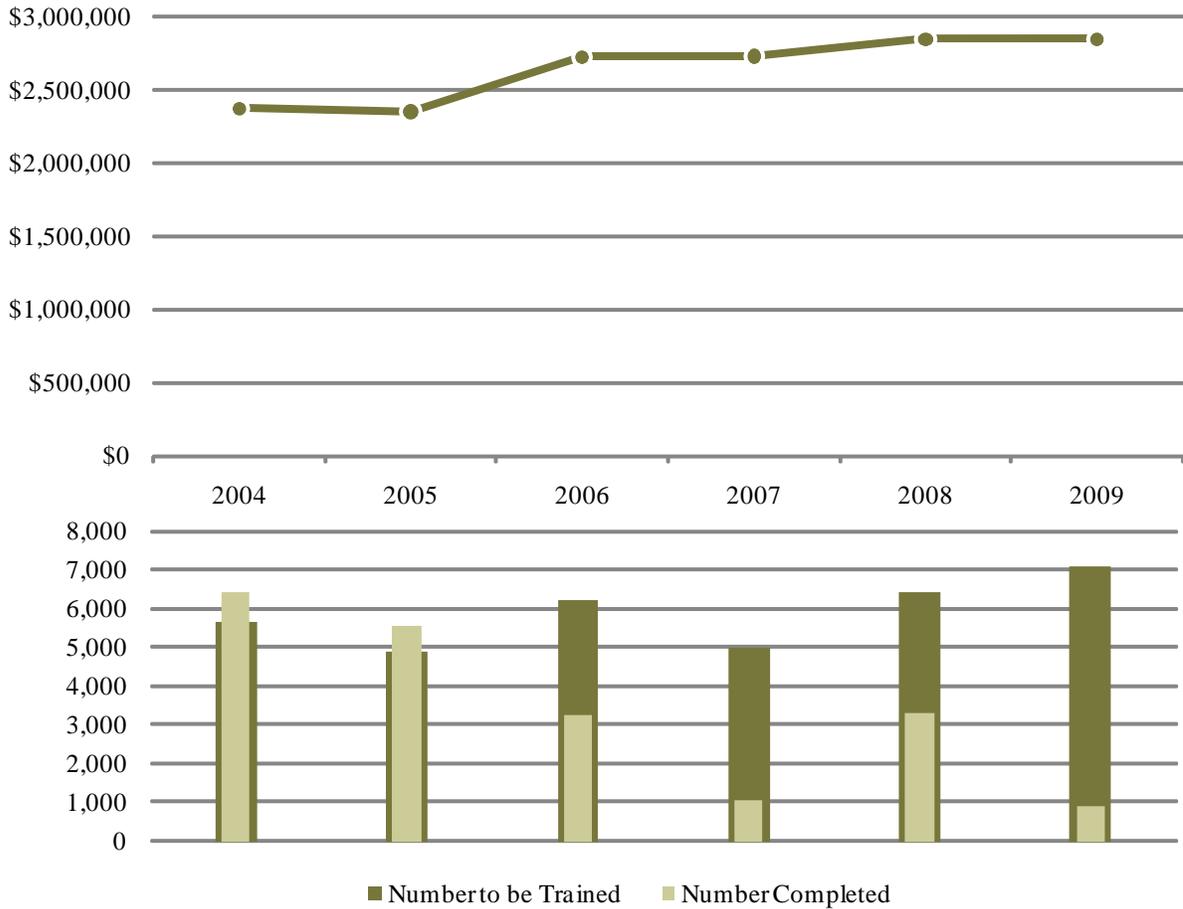

Accelerated Career Education (ACE 260G)

ACE (260G) supports the development or expansion of educational programs that address critical workforce needs. The goal of the program is to provide an enhanced skilled workforce in Iowa.

The number of programs and businesses participating in these programs continue to increase. Since fiscal year 2005, 412 programs have been created. The number of businesses participating has decreased to 227 in fiscal year 2009, down from 290 in fiscal year 2005.

The total number of positions sponsored per year has increased from 2008, but has decreased from five years ago. In fiscal year 2005, 2,584 positions were sponsored, and this decreased to 2,372 in fiscal year 2009. A total of 12,311 positions have been sponsored since fiscal year 2005.

Figure 10-3: Training Dollars (top) and Trained (bottom) for 260F Programs: 2004-2009

SOURCE: Iowa Department of Economic Development, Workforce Business Service Training Annual Reports: 2004–2009, see Table 10-2.

POSITIONS SPONSORED:	AVERAGE STARTING WAGE:
2,372	\$17.82
<small>A 2.7 percent decrease.</small>	

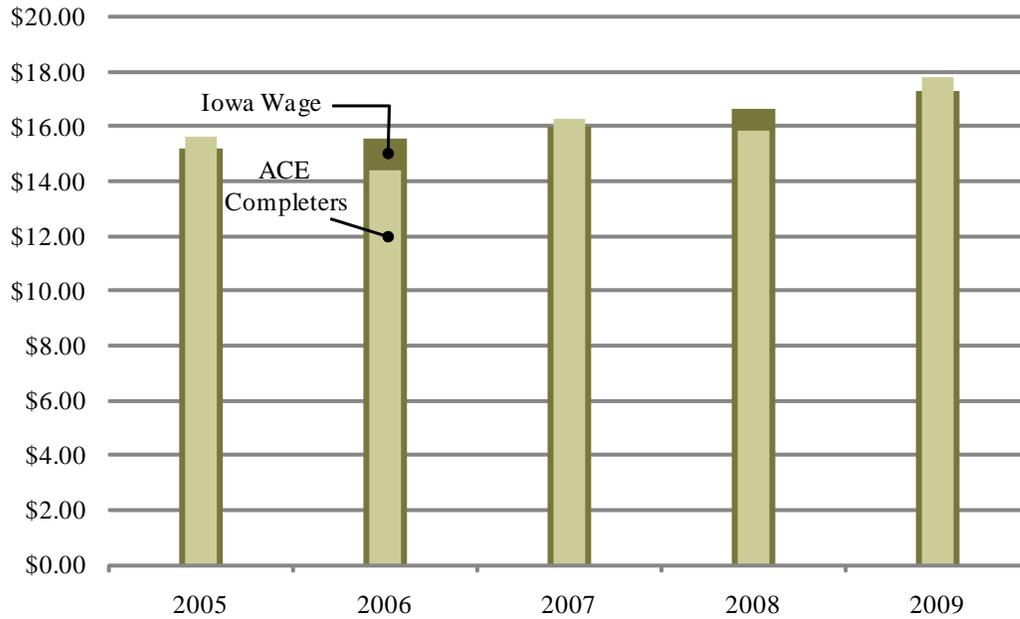

\$0.44, \$0.31, and \$0.55 respectively. In fiscal years 2006 and 2008, the average wage fell under the Iowa mean hourly wage by \$1.14 and \$0.84 respectively.

The number of students who have been offered positions has decreased since fiscal year 2005. In fiscal year 2009, 180 individuals were offered positions, a decrease of 207 from fiscal year 2005. In total, 1,300 students have been offered positions through this program.

The dollar amount of job credits awarded indicates that overall this amount has increased 2.5 percent, or an average of 0.5 percent per year from 2005. The amount awarded in fiscal year 2009 increased 2.3 percent from the previous year.

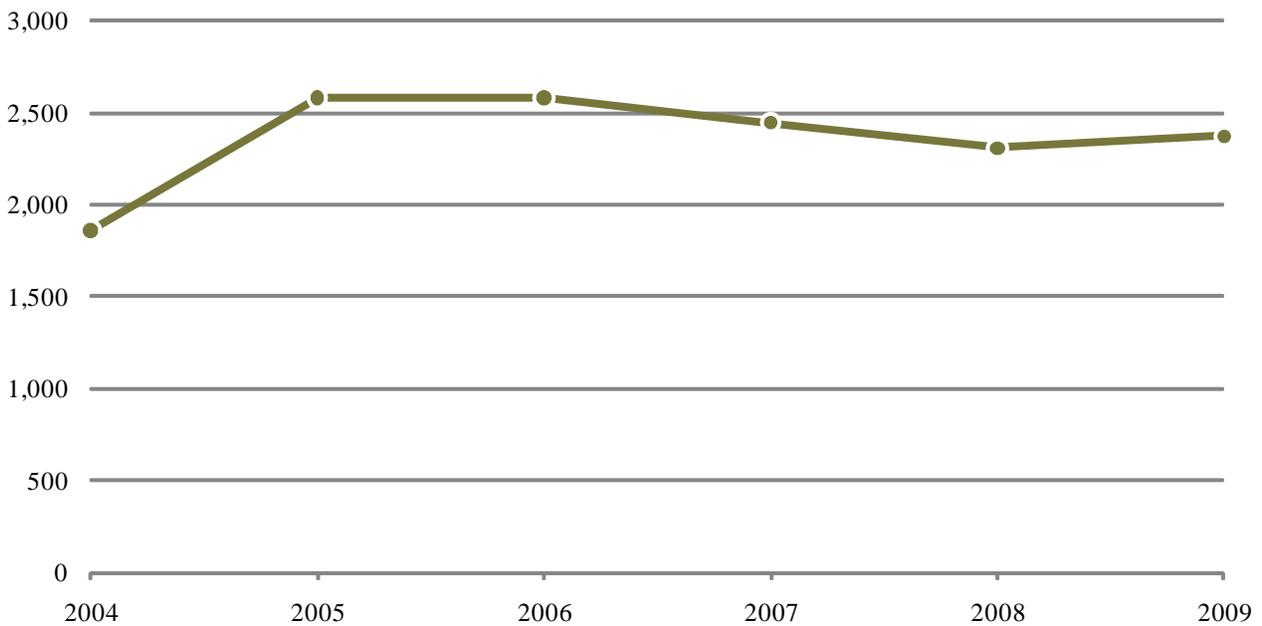

The average starting wage for the students hired through this program has fluctuated from year-to-year. A comparison to Iowa’s mean hourly wage indicates that in fiscal years 2005, 2007 and 2009, the student’s average wage was above Iowa’s mean hourly wage by

11

APPRENTICESHIP

Registered apprenticeship is a national training system that combines paid learning on-the-job and related technical and theoretical instruction in a skilled occupation. Programs meet federally-approved and industry-endorsed standards. The purpose of apprenticeship is to enable employers to develop and apply industry standards to training programs that can increase productivity and improve the quality of the workforce. This section includes apprenticeship programs funded through the Iowa Department of Economic Development (IDED) as well as those programs that were not.

In fiscal year 2010, the total number of unduplicated students in all apprenticeship programs decreased by 523 from the previous year. The number of students in non-credit apprenticeship programs decreased by 14.7 percent during that time period while the number of non-credit contact hours decreased by 14.5 percent. Since fiscal year 2004, the number of non-credit students has increased by 182, or an average of 0.9 percent annually. The number of non-credit contact hours taken has increased by 131,103 since fiscal year 2004, or an average of 3.6 percent annually.

programs increased by 26 while the number of credit hours taken in fiscal year 2010 increased by 370 from fiscal year 2009. Since fiscal year 2004, the number of credit students has increased by 31, or an average of 3.5 percent annually. The number of credit hours taken has increased by 543 since fiscal year 2004.

IDED-Funded Apprenticeship Programs

The Iowa New Jobs Training Program (260E) assists businesses which are creating new positions or new jobs. The dollar amount available for training through the program is dependent upon the training and development needs and projected tax revenue available to repay the certificates. Applications for this program must be made through the local community college. In fiscal year 2010,

Figure 11-1: Apprenticeship Program Enrollment, Credit and Non-Credit: 2004-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Table 11-1.

three students participated in apprenticeship through 260E programs.

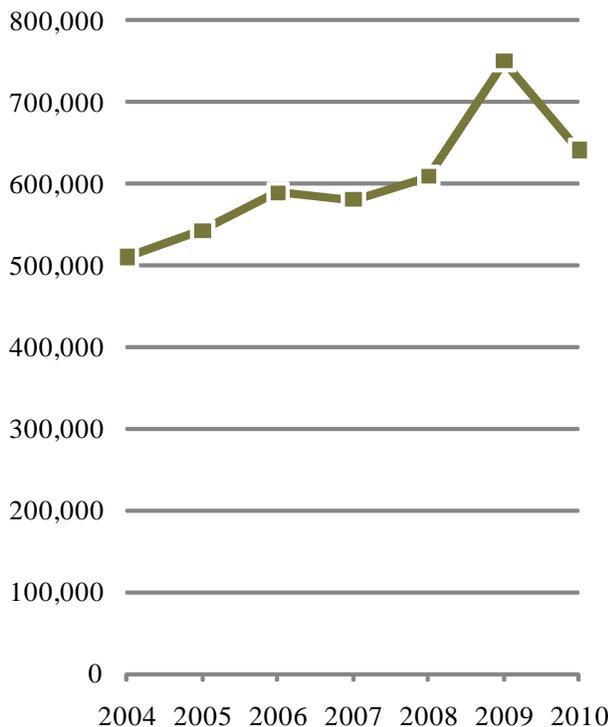

The Iowa Jobs Training Program (260F) provides job training services to current employees of eligible businesses which are located in Iowa. Job training services are defined as any training needed to enhance the performance of a business' employees. Each college works with eligible businesses to assess training needs, determine funds availability and provide training. The number of students participating in apprenticeship through the 260F program decreased by 487 while the number of contact hours decreased by 83,825.

The Iowa Values Fund is an economic development program designed to transform the state economy by creating high quality jobs through business development and expansion across Iowa. A variety of programs are available through the Iowa Values Fund including apprenticeship programs. The number of apprenticeship students participating in these programs decreased by 99 in fiscal year 2010 while the number of contact hours decreased 18,912 over the previous year.

Programs Not Funded by IDED

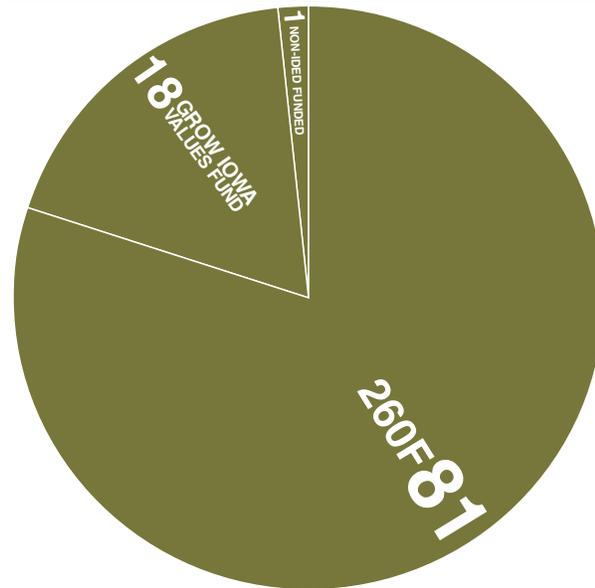

The number of students participating in non-credit apprenticeship programs that were not funded by economic development programs decreased by 34 from fiscal year 2009 to fiscal year 2010. The number of contact hours decreased 6,761 over the previous year.

STUDENT SUCCESS

Recent changes to protocol at the National Student Clearinghouse have prevented the Iowa Department of Education from updating selected figures. Thus, several figures and tables in this section have not been updated from the prior report.

The Department of Education tracks student successes related to graduation, transfer, and wages. Every year the Department of Education tracks a cohort of students over three years. For this report, the department tracked first-time students who enrolled full-time at a community college in fiscal year 2007. There were 10,725 students in the cohort this year. This cohort is used to calculate the success rate, graduation rate, and transfer rate.

Students enroll into community colleges for various reasons besides seeking an award. The success rate follows a cohort of first-time, full-time students—those who initially enroll into community colleges with more than 12 credit hours per semester. A student is counted as a “success” if she either graduates or transfers to a four-year institution within three years.

The department follows students for three-years since community colleges offer, at most, a two-year degree.

STUDENT OUTCOMES

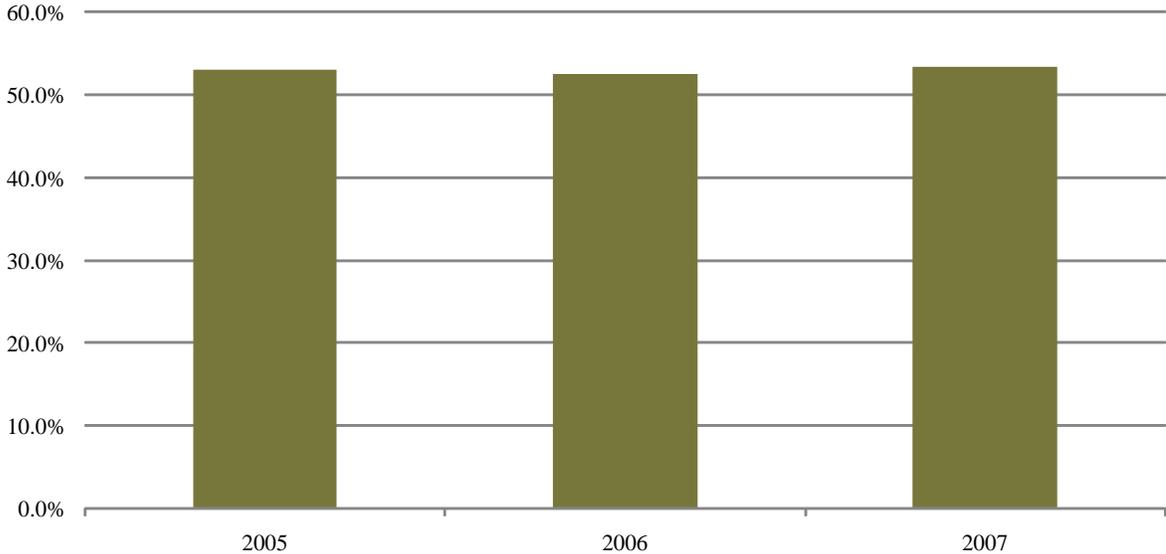

SUCCESS RATE: 53.4% <small>Increased 0.9% from 2008.</small>	GRADUATION RATE: 35.8% <small>Decreased 3.7% from 2009.</small>
AVERAGE TIME-TO-DEGREE: 2.4 YEARS <small>Unchanged from 2009.</small>	MEDIAN SALARY: \$29,592 <small>All students, 2002 cohort</small>

Federal and state calculations typically allow students 150 percent of the allotted time to complete a degree. While community college cohorts are followed for three years, four-year universities often calculate a six-year graduation rate.

The success rate for the 2007 cohort was over 53 percent (Figure 12-1). Over half of the students in each cohort the department tracked either graduated from community college or transferred to a 4-year university within three years.

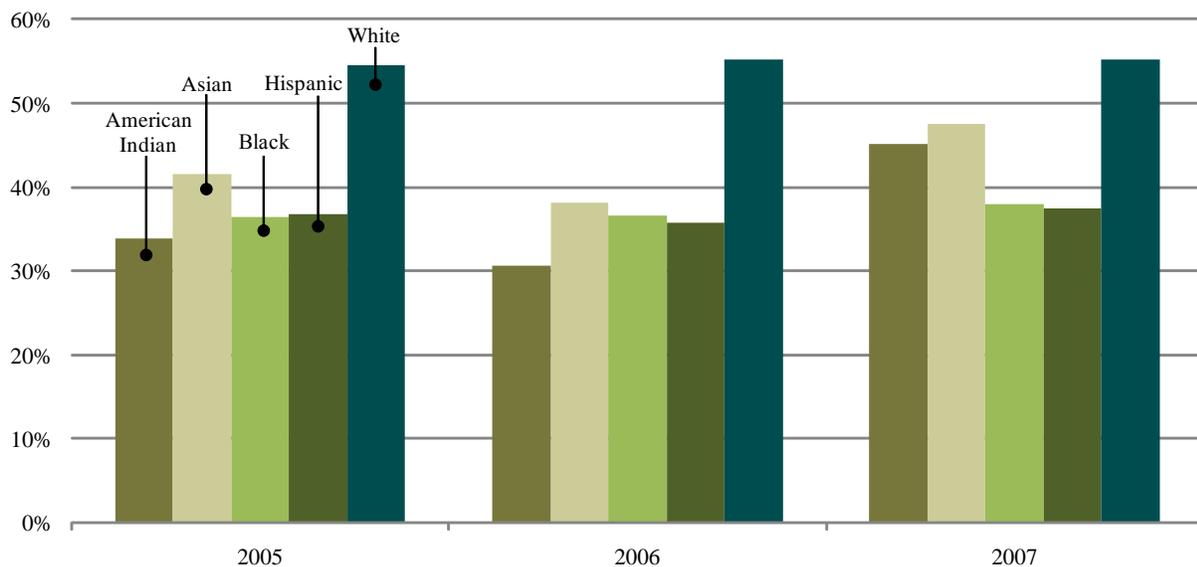

Figure 12-4 shows the path of the fiscal year 2006 cohort through three years. Few students graduated or transferred within the first year. However, 30 percent of the initial cohort did graduate or transfer in the second

Figure 12-3: Three-year Success Rate by Gender: 2005 - 2007 Cohorts

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS and National Student Clearinghouse, see Table 12-6.

year. Twenty-six percent of the those remaining the second year graduated and five percent transferred in the second year.

A third of students received multiple awards from community colleges. In this analysis, multiple awards were only counted once. Typically, students would receive a diploma or certificate in the first year and later receive an Associate's degree from the college. Meanwhile, 12 percent of students received an award and transferred to a four-year institution.

There is considerable variation by race and ethnicity. Figure 12-2 shows the success rate for white students exceeded 55 percent. Meanwhile, black and Hispanic students only had a 38 percent success rate, Asians had a 48 percent rate, and 45 percent of American Indian students either graduated or transferred.

Community colleges achieved greater parity between gender. In 2007, 58 percent of females either graduated or transferred while 52 percent of males achieved the same (Figure 12-3). Section 3 noted that females comprise 57 percent of community college enrollment.

Graduation Rate

The graduation rate follows the same first-time, full-time cohorts for three years. In fiscal year 2008, the graduation rate dropped to 35.8 percent (Figure 12-5). It is the biggest reduction in graduation rate since the Iowa Department of Education began tracking graduation rates since 2001.

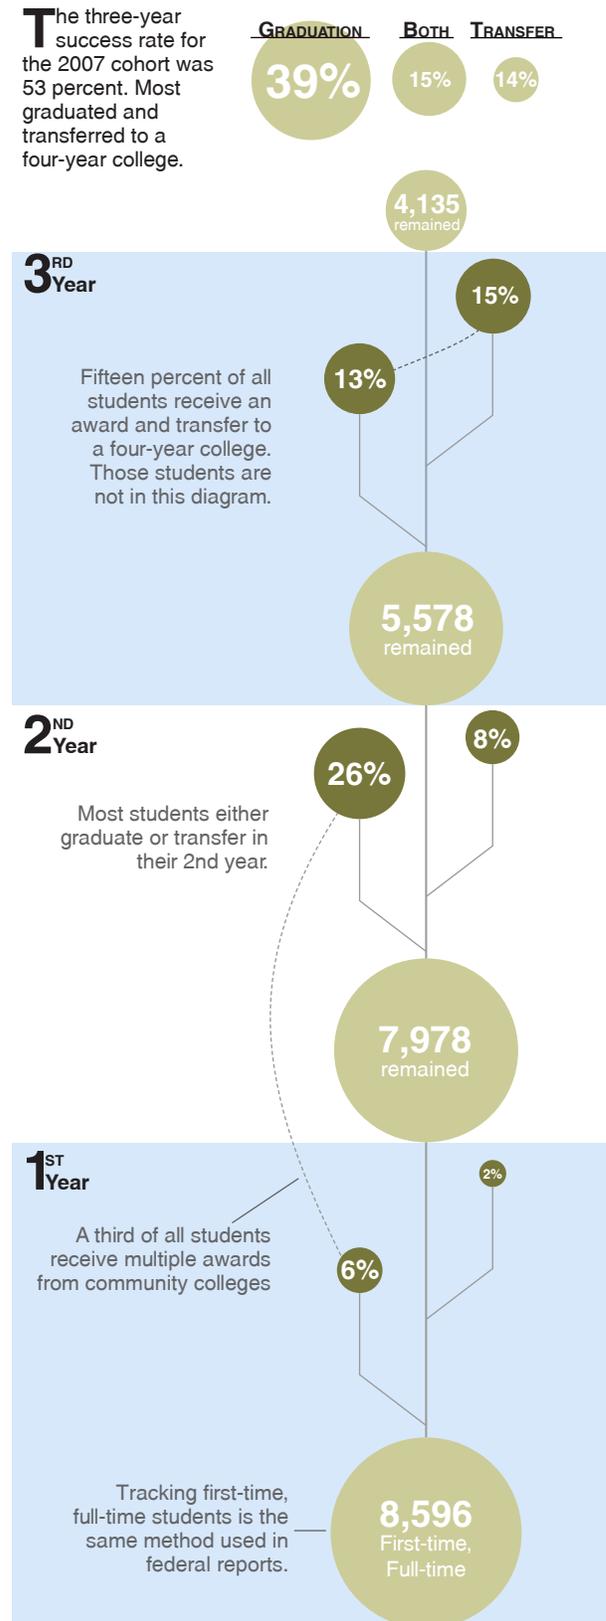

Iowa's graduation rate is still significantly higher than the national graduation rate for two-year public colleges. The most recent national data, which uses a cohort of students from 2005, shows 22 percent of full-time, first-time students graduated within three years (Knapp, Kelly-Reid, and Ginder, 2010).

Graduation rates were disparate by race and ethnicity (Figure 12-6). Almost 38 percent of white students graduated within three years, compared to 17.1 percent for black students, 26 percent for Hispanics, 31.2 percent for Asians, and 16.7 percent for American Indian students.

Meanwhile, white students saw a substantial decline in their graduation rates. The 2007 cohort of white students had a graduation rate of 41.7 percent, compared to 37.9 percent for the 2008 cohort. Black students also saw a decline, from 19.6 to 17.1 percent between 2007 and 2008 (Figure 12-6).

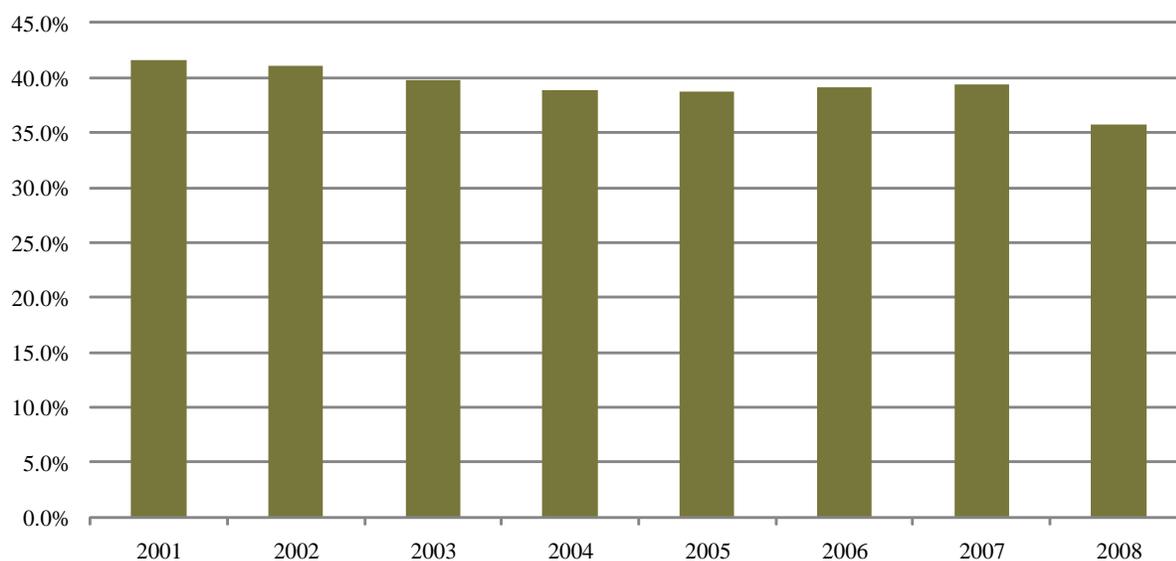

Iowa still outperforms the national graduate rate average for each demographic subgroup. The national graduation rate for black and Hispanic students was 14.4 and 16.8 percent, respectively (Knapp et al., 2009, Table 5). Iowa's male and female graduation rate is 35.5 and 36 percent, which exceeds the national rates of 21.3 and 22.7 percent.

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS, see Table 12-7.

Time-to-Degree

Time-to-degree measures the timeliness of receiving a community college award. Unlike the success, graduation, and transfer rates—which only track three years—time-to-degree tracks students up toward five years. The distinction is quite deliberate. The focus of time-to-degree is to track the length, not the number, of awards.

On average, it took 2.4 years for the 2006 cohort to complete a community college award, which is the same as prior years (Table 12-13).

Minorities typically take longer to graduate, but the gap is closing. White students average 2.4 years to obtain an award; meanwhile, the average time-to-degree is higher for all racial and ethnic minorities. Blacks, the largest minority group, take 2.5 years to complete an award; 2.6 years for Hispanics, 2.4 years for Asians, and 2.5 years for students of American Indian descent (Table 12-12).

Wages of Graduates

One of the primary benefits of furthering education is increasing wages. Education gives employees the tools to be more productive throughout their career. Productive employees, in turn, earn more than other workers. The Iowa Department of Education and Iowa Workforce Development cooperated to follow community college students into the workforce to see if wages for completers were higher than students who left early.

The Iowa Department of Education and Iowa Workforce Development followed students who either graduated or left an Iowa community college in 2002

or 2006. Figure 12-7 shows the median salary for both cohorts. Wages are broken out for those who completed a degree (completers) and those who left early (leavers), completers of various award types, those who left without completing the degree, and all students. The median income for students was only recorded if the student worked all four quarters.

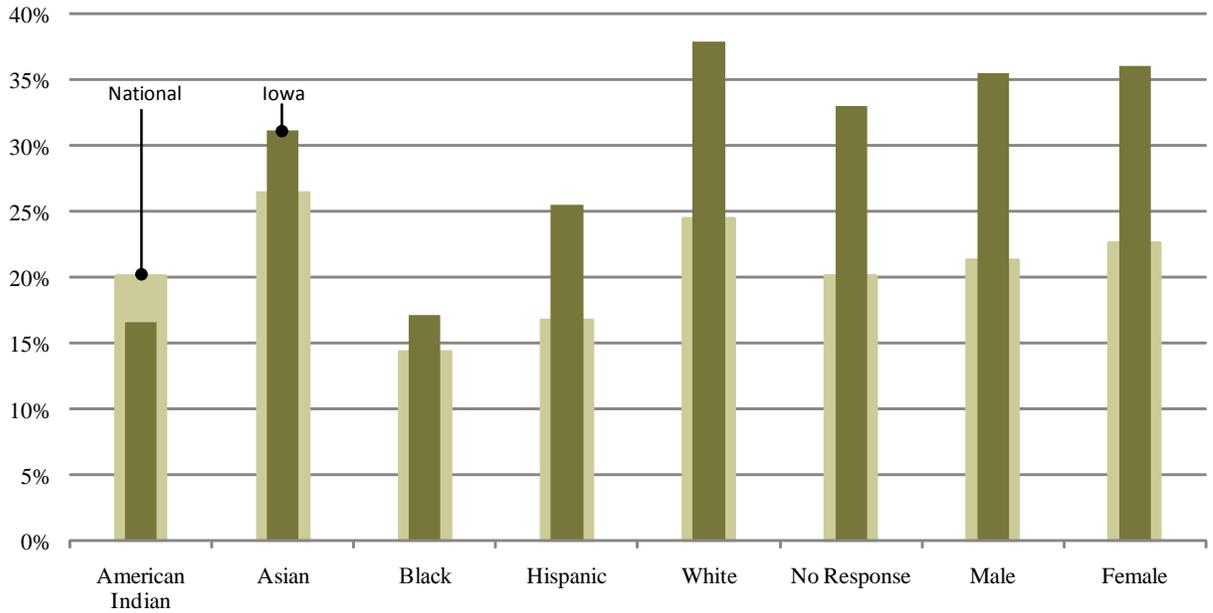

For the 2002 cohort, median wages for completers was \$29,592 and \$27,675 for leavers by 2008. Median wages grew the fastest for completers. In particular, median wages for all awardees grew 142 percent while leavers (non-awardees) grew 87 percent over the 6 year period. The median earnings for completers was \$23,594 while leavers earned \$20,702.

Wages grew modestly and equally for most groups between 2003 and 2005. Completers' median wages grew 19.9 percent to \$28,217 while the median salary for leavers grew 17.8 percent to \$24,184 as wage growth becomes more dependent on individual productivity (see Becker, 1993).

The 2006 cohort exhibited a similar pattern. Median wages were \$27,210 for completers and \$23,297 for leavers by 2008. Again, completers' wages increased briskly for completers (131 percent) compared to leavers (25 percent).

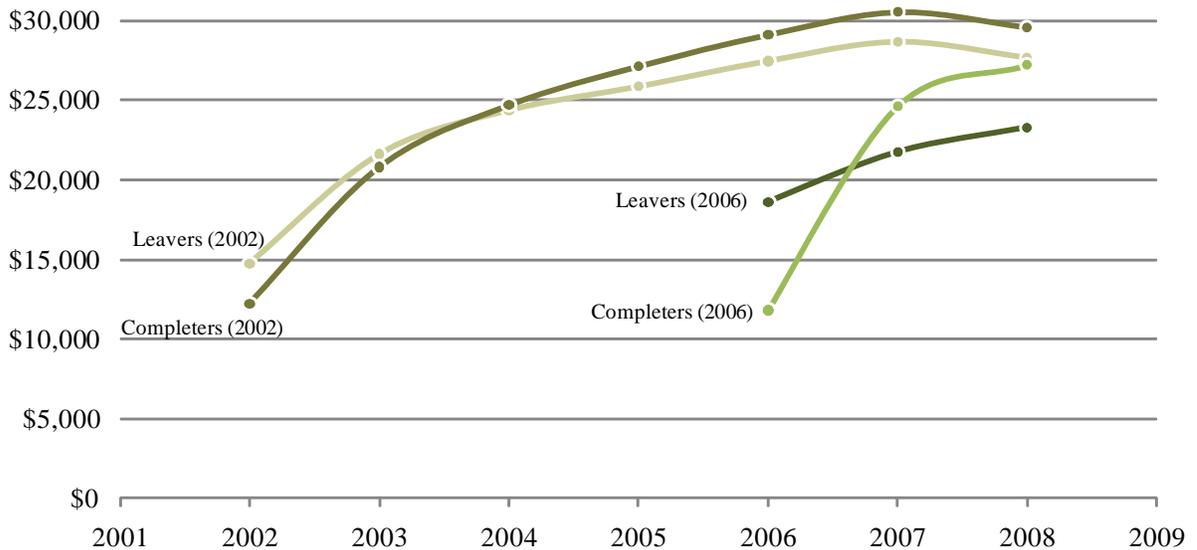

Nevertheless, the 2007-2008 recession is evident in the data. Between 2007 and 2008 wages fell for both completers and leavers. It is not due to increased unemployment, but from a decrease in real wages. The 2006 cohort, which is more recently out of college, was spared from the wage decrease.

Transfer Analysis

The Iowa Department of Education and Iowa State University’s Office of Community College Research and Policy (OCCRP) tracked the transfer patterns of community college students who completed an award or left the college in fiscal year 2002. The analysis used the National Student Clearinghouse to track the cohort to four-year institutions in the United States. The analysis focused on three specific groups: Associate of Arts (AA) awardees, Associate of Applied Science (AAS), and non-award leavers.

The largest group to transfer to a four-year institution was AA awardees. The AA program is designed to transfer to a 4-year institution and ultimately lead to a Bachelor’s degree. By the third year, 67.1 percent of AA recipients transferred (Figure 12-8).

AAS recipients were less likely to transfer to a four-year institution. Over three years, 15 percent of AAS recipients transferred to a 4-year institution. Unlike the AA degree, the AAS is designed to lead toward immediate participation in the workforce.

Finally, 15.6 percent of non-awardee leavers transfer to a four-year institution. It is difficult to interpret the intention of these students, but of 49,895 non-awardee leavers, 7,798 students continued their education.

Retention and Graduation at Public Universities

The Board of Regents for the State of Iowa tracks one-year student retention and graduation rates at the three public universities. The one-year retention rate of all community college students has remained steady since 1991. Seventy-eight percent of community college students transferring to the University of Iowa (SUI)

remained at the university after a year—down from 82 percent (Figure 12-9). Meanwhile, over 80 percent of transfers to the University of Northern Iowa (UNI) remained at the university the following year. In 2003, over 80 percent stay at least a year at SUI, while Iowa State University’s (ISU) one-year retention remained steady at 79 percent.

Since 1991, the graduation rate for all community college transfer students has risen (Table 12-10). Sixty-one percent graduate from UNI and nearly 58 percent graduate from ISU and SUI within four years.

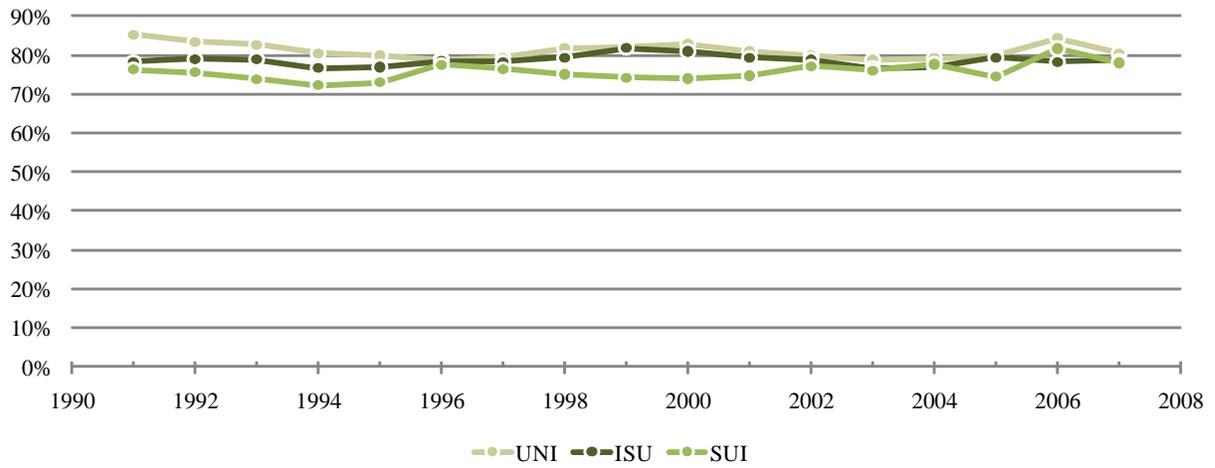

Adult Literacy: Postsecondary Education and Employment

A primary focus of Iowa’s Adult Basic Education (ABE) program is to transition students from acquiring basic skills to earning a high school equivalency diploma to postsecondary credit education or non-credit training. Iowa’s community college programs offer many non-credit training opportunities including skilled training in high demand occupations. Adult literacy programs engage in goal setting with participants to determine attainable outcomes each program year. Students with higher levels of basic skills learn about career training opportunities and set attainable goals for postsecondary education and training. Data matching against the Management Information System (MIS) is used to determine the percentage of students who received training that indicated postsecondary education or training as a goal.

For fiscal year 2008, MIS data was used in conjunction with data from the National Student Clearinghouse for the first time. Previously, from fiscal year 2005 to 2007, students were only identified through the MIS.

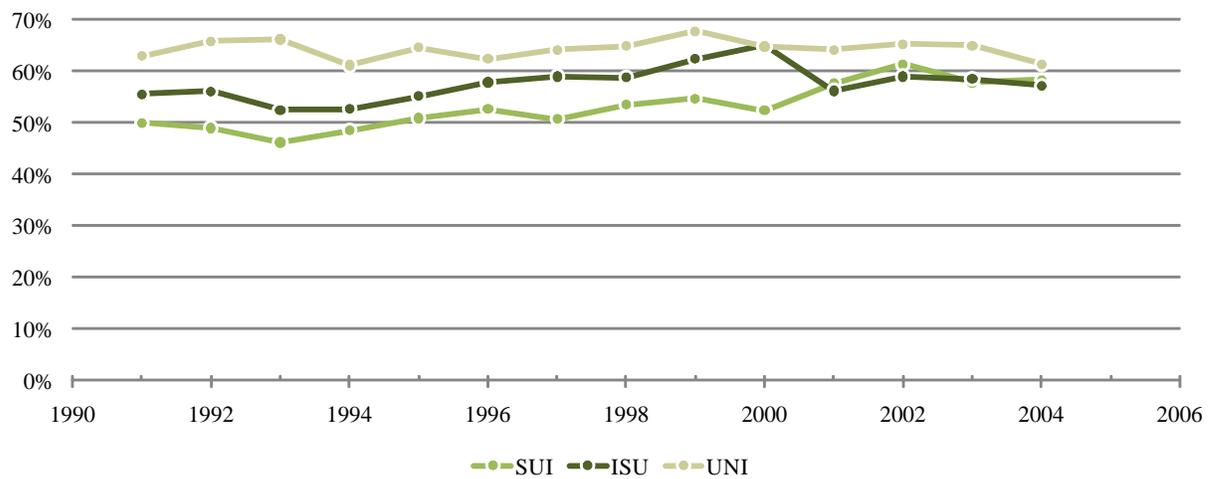

In 2008, 411 students indicated intent to transition to

Figure 12-9: Retention Rate for Transfer Students at Public Universities: 1991-2007

postsecondary education; either in credit education or non-credit education and training programs. The data match indicated that 297 students (72%) enrolled in postsecondary education (Figure 12-11).

Iowa's adult literacy programs engage in employment goal setting with participants upon entry into the program. Workforce and basic skills are assessed and programs work with participants to determine career readiness and skills needed to obtain a job in a desired field. Iowa tracks participants indicating that obtaining employment or retaining employment is an attainable goal within the

program year. Since 2005, between 70 and 90 percent of participants who indicate that employment is a goal are able to obtain employment (Figure 12-12).

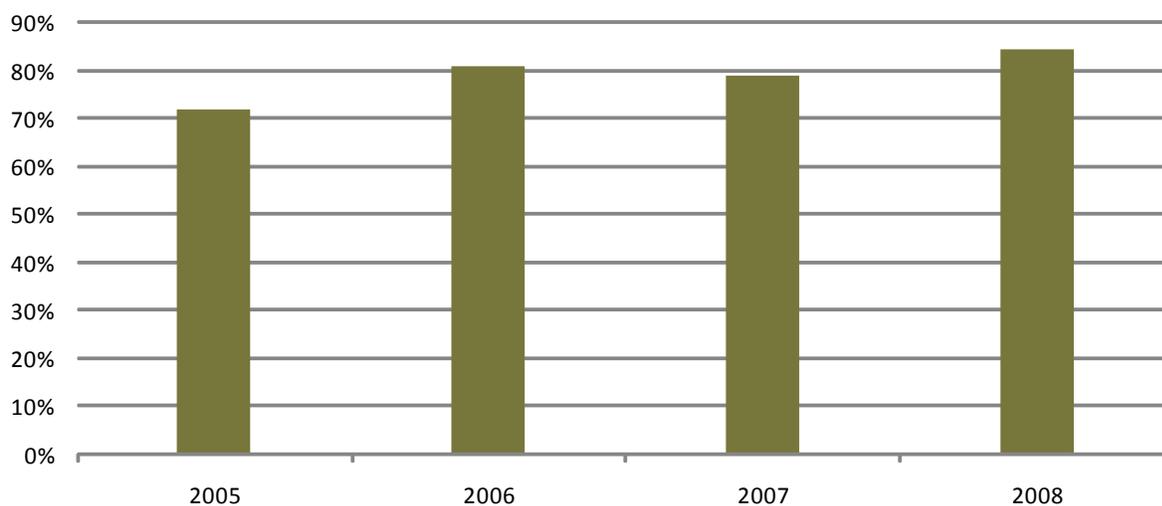

In fiscal year 2008, students indicating the intent to enter employment decreased, however, students obtaining employment increased by six percent from 2007. Additionally, in fiscal year 2008, students indicating the intent to retain employment decreased, however, the percentage of students who sought and retained employment increased by one percent.

13

TUITION AND FEES

Full-time community college resident tuition increased to \$3,743 during fiscal year 2011. Last year, average inflation-adjusted tuition was \$3,660, yielding a 2.28 percent increase between 2010 and 2011. The 2.28 percent increase was slightly above the average five-year tuition increase (2.05 percent), but below the 10-year average annual increase (3.79 percent). The highest listed tuition in 2011 was \$4,110 while the lowest tuition was \$3,491 (Figure 13-1).

Inflation-adjusted resident tuition per credit hour increased 2.29 percent, after adjusting for inflation, to \$124.76 per hour (Figure 13-2). Tuition per credit hour increased 2.29 percent, from \$121.97 in 2010. This increase was relatively smaller compared to the 5.89 percent increase the prior year—between 2009 and 2010. In the past five years, tuition per credit hour has increased an average of 2.33 percent each year, indicating the increase in 2010 is consistent with the recent historical average.

report provides data through 2008, which is the most recent national higher education tuition data available. The information may differ since the U.S. Department of Education and Iowa Department of Education use different methods to collect tuition data.

Figure 13-4 shows the change in inflation-adjusted average tuition for the upper-Midwest and the nation's two-year public colleges. The average tuition for upper-Midwest states—Minnesota, South Dakota, Iowa, Wisconsin, Missouri, Illinois, Kansas, and Nebraska—is above the national average tuition. In particular, Iowa's average tuition is \$1,314 higher than the national average.

Iowa's tuition has also increased at twice the rate of the national average. Between 2001 and 2008—the most recent data available—the national average tuition increased 2.13 percent while Iowa's tuition increased 4.52 percent.

Iowa's tuition increases have been modest compared to other states within the region. After adjusting for inflation, Iowa has remained unchanged as the fourth-highest community college tuition in the upper-Midwest. Minnesota's tuition has increased 24.23 percent since 2001 to overtake South Dakota as the most expensive state for community college tuition in the region. South Dakota's community college tuition has actually decreased after adjusting for inflation.

Wisconsin's average tuition is \$491 more than Iowa's. However, Iowa's tuition has grown at a faster rate. Wisconsin's tuition has grown 2.49 percent compared

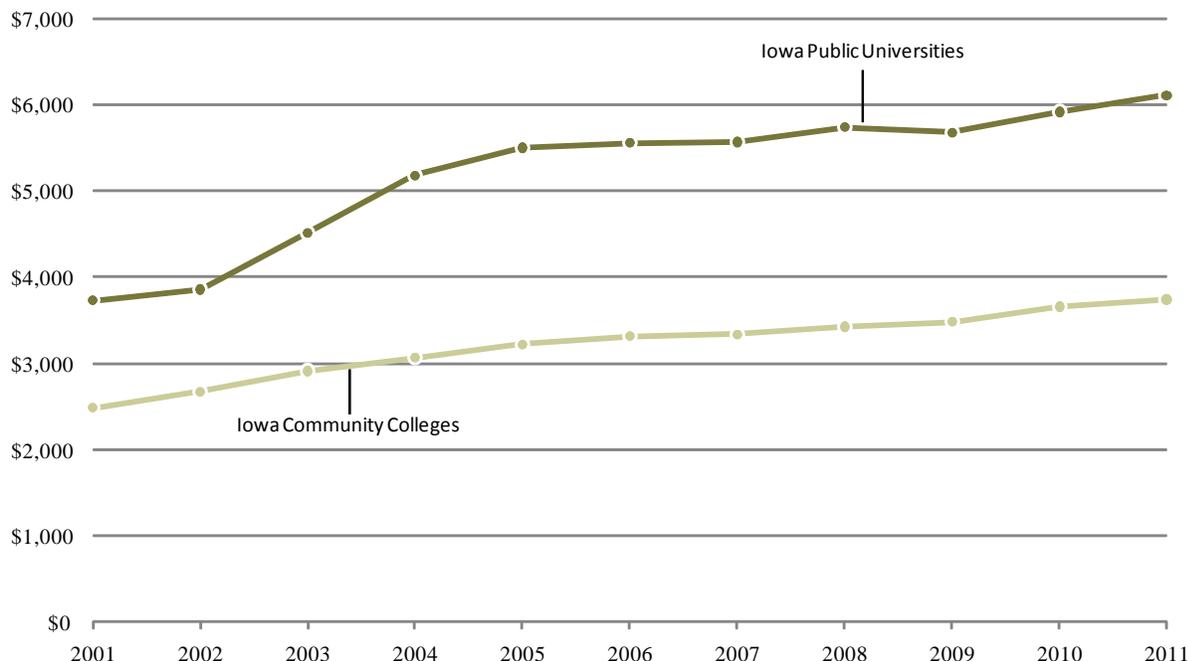

to 4.52 percent over seven years. In 2001, Wisconsin's inflation-adjusted tuition was \$1,090 more than Iowa.

Comparison to Public Universities

The Code of Iowa requires that the total tuition for Iowa residents attending community colleges not exceed the lowest tuition rate per semester charged by an Iowa public university. In 2011, the average community college tuition rate was 38.75 percent (\$2,368) below the average Iowa public university tuition rate (Figure 13-5).

Inflation-adjusted tuition has increased an average of 1.6 percent each year between 2006 and 2011, compared to 2.05 percent for community colleges. Although the gap between public universities and community colleges has narrowed as a percentage, the monetary difference in cost between the two has slightly widened. In 2006, community college inflation-adjusted tuition was \$2,243 less than a public university. In 2011, public universities cost \$2,368 more than at community colleges.

FINANCIAL AID

The Condition of Iowa's Community Colleges Report includes dollar amounts adjusted for inflation to permit a comparison between fiscal years. Adjustments are made from the U.S. Bureau of Labor Service's Consumer Price Index (CPI-U) by measuring July-to-July inflation. CPI-U measures the increase of prices for a typical consumer in urban areas. It is a standard index used in publications and reports.

Iowa community college students receive financial aid from federal, state, institutional, and other sources. Student financial aid includes grants, scholarships, and loans. The *Chronicle of Higher Education Almanac* Issue 2009-2010 reports that the State of Iowa spent a total of \$59,116,000 on student aid for need-based students, \$457,00 on student aid for non-need-based students, and \$6,213,000 on non-grant student aid in fiscal year 2008.

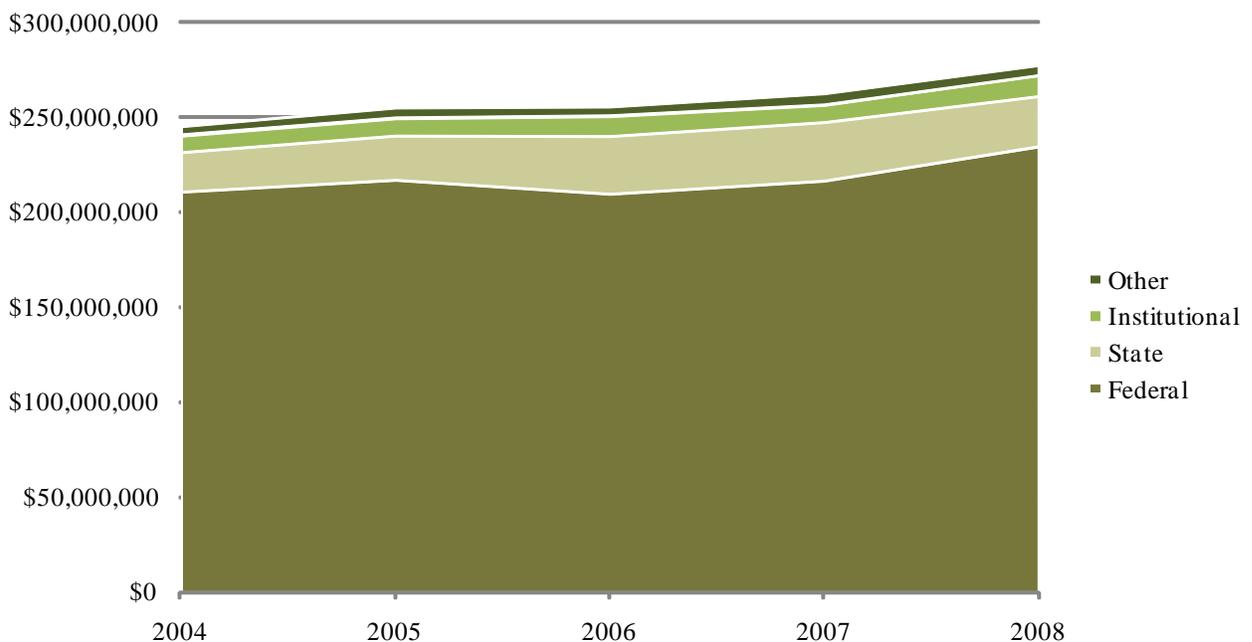

In analyzing aid by source in 2009 dollars, federal aid has decreased 7.6 percent from 2004-2008. During the same five-year period, state aid increased 10.8 percent,

institutional aid by 38.1 percent, and other aid by 14.2 percent (Figure 14-1).

Community college students received approximately 12.3 percent of all financial aid distributed to students enrolled in postsecondary institutions in fiscal year 2008 (Figure 14-2). In 2008, Iowa community college students received \$278,081,290 in financial aid -- 84.5 percent of which was from federal sources (Figure 14-1 and Figure 14-3). State sources accounted for 9.6 percent of financial aid received by community college students. Community colleges received 12.2 percent of state financial aid distributed to students. In comparison, public universities received 29.5 percent of state financial aid and independent four-year institutions received 55.5 percent.

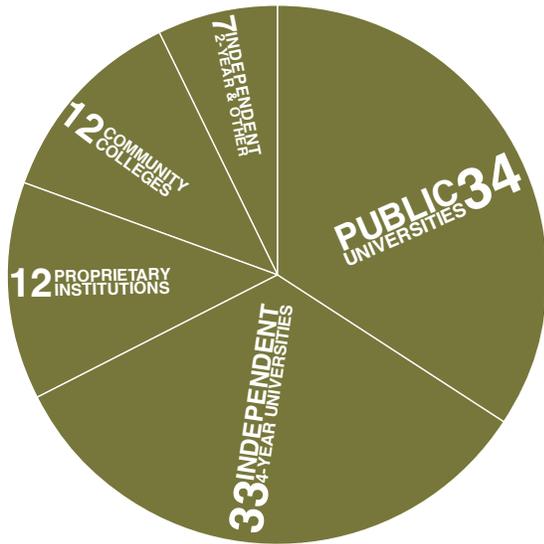

After adjusting these numbers into 2009 dollars, Iowa community college students received \$97,822,388 in grants and scholarships (Figure 14-4). Total grants and scholarships increased 8.3 percent from fiscal year 2007 to fiscal year 2008; however, it decreased 2.1 percent since fiscal year 2004.

FINANCIAL

The total Fund 1 unrestricted general fund revenues increased \$32,623,478 in fiscal year 2010 from the prior year. This increase in revenue consisted, in part, from an 18.25 percent increase in tuition and fees and a 4.93 percent increase in local support. State general aid (SGA) declined by 17.50 percent while other income declined by 9.35 percent. Federal support showed a 192.39 percent increase due to the incoming American Recovery and Reinvestment Act (ARRA) of 2009 funds that the community colleges received. These totaled \$25.6 million in 2010 and are one-time only funds distributed to the States by the Federal Government in fiscal year 2010.

Tuition and fees (54%) was the largest source of revenue for the community colleges with SGA following at 28.62 percent. Local and federal sources of revenue were 4.67 and 6.71 percent, respectively. The large jump in federal support was due to the receipt of the ARRA funds mentioned above.

Total revenues, adjusted to 2010 dollars, have shown an overall increase of 15.82 percent from 2006 through

2010, or an average of 3.16 percent in real dollars per year. During this time (2006–2010), tuition and fees revenue has shown a real dollar increase of 29.73 percent and SGA has decreased 9 percent. Local revenue has increased 9 percent in real dollars, and federal support has been decreasing since 2005 with the exception of the \$25.6 million in one-time funds provided by ARRA in fiscal year 2010.

SOURCE: Iowa Department of Education, Bureau of Community College Services, Annual Report, Unrestricted General Fund AS-15E, Fund 1. See Table 15-5.

Unrestricted General Fund Expenditures by Source

The total Unrestricted General Fund Expenditures in fiscal year 2010 increased \$22,013,894 from the previous year. The increase in expenditures included a 1.72 percent increase in salaries and benefits, a 4.72 percent increase in services, and a \$10.9 million increase in current expenses.

Total Unrestricted General Fund Expenditures, adjusted

to 2010 dollars, has increased 12.65 percent from 2006 through 2010, or an average of 2.53 percent per year in real dollars. During this time period (2006-2010) salary expenditures has increased 11.28 percent, service expenditures has increased 11.64 percent. Capital outlays have increased \$2.6 million in real dollars since fiscal year 2006. Materials, supplies, and travel expenses have decreased 4.66 percent since 2006.

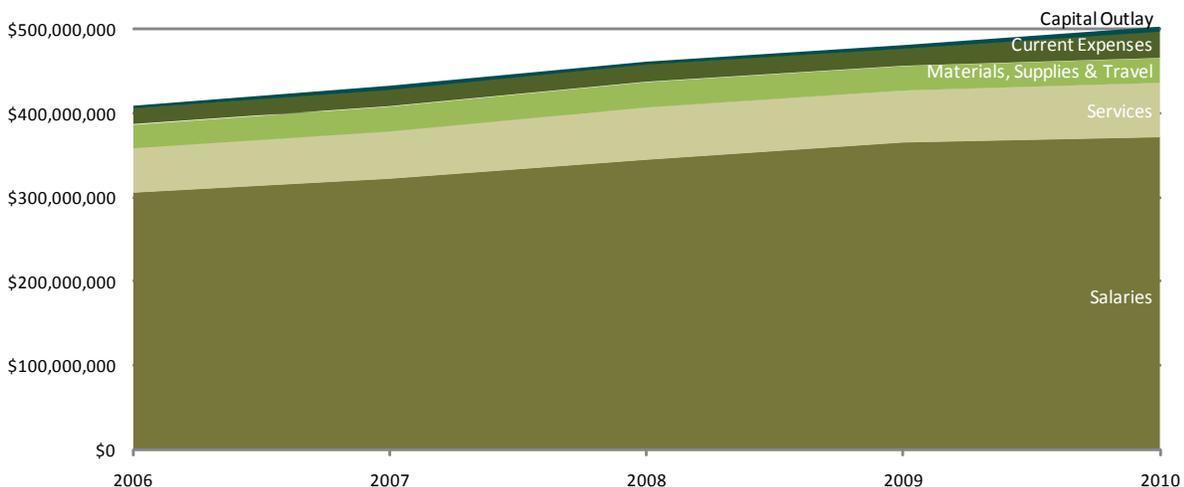

The services categories are defined below:

1. Salaries – all salaries paid by the community college including administrative, instructional, professional, secretarial & clerical, and service staff. Includes other payroll costs such as fringe benefits and worker’s compensation insurance.
2. Services – items such as professional fees, memberships, publications, rental of materials, buildings and equipment, and insurance.
3. Materials, Supplies, and Travel – expenses such as materials and supplies, periodicals, vehicle materials and supplies, and travel expenses.
4. Current Expenses – items such as purchase for resale, payment on debt principal, student compensation, and transfers.
5. Capital Outlay – items such as furniture, machinery, and equipment, lease purchase equipment, vehicles, land, buildings and fixed equipment, and other structures and improvements.

Unrestricted General Fund Expenditures by Function

Total Unrestricted General Fund expenditures in arts and sciences, adjusted to 2010 dollars, increased 0.98 percent from fiscal year 2009, 0.90 percent in vocational/technical, and 10.27 percent in general institution

Figure 15-3: Adjusted Unrestricted General Fund Expenditures: 2006-2010

SOURCE: Iowa Department of Education, Unrestricted General Fund AS-15E, Fund 1. See Tables 15-6 through 15-10

functions. Adult Education expenditures decreased 6.11 percent cooperative programs/services declines 16.74 percent, and student services expenditures declined 2.5 percent.

From 2006 through 2010, in 2010 dollars, the arts and sciences function experienced a 17.97 percent (\$18.3 million) increase in expenditures, the vocational/technical function a 8.06 percent (\$9 million) increase, the administration function a 40 percent (\$9.6 million) increase, and student services a 11.35 percent (\$4.3 million) increase. In contrast, adult education expenditures decreased 11.02 percent (\$4.8 million), and learning resources expenditures decreased 5.87 percent (\$793,846) since fiscal year 2006.

The vocational/technical function continues to be the largest source of expenditures in fiscal year 2010 at 23.96 percent. This function is followed by the arts and sciences function at 23.86 percent. The physical plant function was 11.51 percent, the general institution expenses were 13.55 percent, adult education was 7.69 percent, and the administration function was 6.72 percent of the total expenditures in fiscal year 2010.

The function categories are defined below:

- Arts and Sciences – all administrative and instructional organizational units of the community college that provide instruction in the area of college parallel and career option/college parallel (CO/CP).
- Career/Vocational Technical – all organizational units designed to provide vocational, technical, and semi-professional training.
- Adult Education – all organizational units designed to provide services, courses, and programs intended mainly for part-time students who are not a part of one of the instructional divisions of arts and sciences or career/vocational technical functions. Some examples include Adult Basic Education (ABE), high school completion, and short-term preparatory.
- Cooperative Programs or Services – all organizational units designed to provide instruction for secondary joint effort activities and all activities concerning Chapter 260E Industrial New Jobs Training and Chapter 260F Jobs Training.
- Administration – all expenses of the Community College Board of Trustees, the CEO, and business office, which serves the entire community college.
- Student Services – all organizational units, which are primarily concerned with providing services for students.
- Learning Resources – all organizational units, which provide for storage, distribution, and use of educational materials throughout the entire community college.
- Physical Plant – all organizational units, which are responsible for the operation and maintenance of the community college's physical facilities.

Figure 15-4: Expenditures by Source: 2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Annual Report, Unrestricted General Fund AS-15E, Fund 1. See Table 15-5.

- General Institution – all other expenses except those included in the above functions. Some examples include institutional development, data processing, general printing, communication, alumni affairs, early retirement, and telecommunications.

Unrestricted General Fund Revenues vs. Expenditures

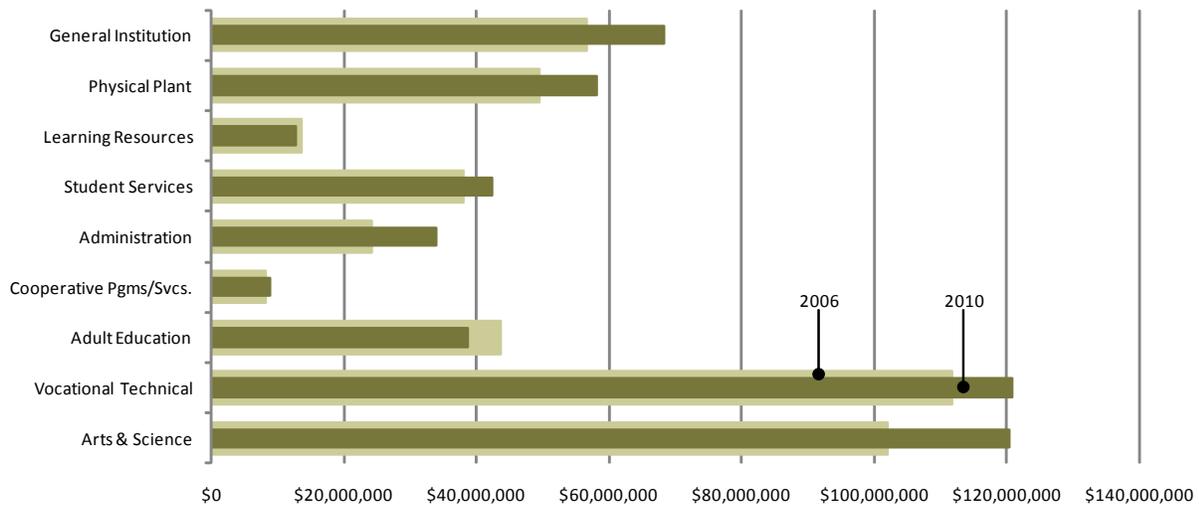

Both revenues and expenditures have increased each year over the last five years. After adjusting for inflation and adjusting each year into 2010 dollars, revenue grew by 3.97 percent from fiscal year 2009 to fiscal year 2010 and expenditures grew by 1.89 percent. Since fiscal year 2006, Unrestricted General Fund revenues have grown 15.82 percent while Unrestricted General Fund expenditures have grown 12.65 percent.

Full-Time Equivalent Enrollment (FTEE)

The Full-Time Equivalent Enrollment (FTEE) calculation is utilized when determining SGA. Due to timing of the calculation to meet Iowa Legislative deadlines, the enrollment used to calculate SGA is two years behind the year of the aid (i.e., fiscal year 2010 enrollments are used to calculate fiscal year 2012 SGA). Twenty-four (24) credit semester hours equals one FTEE, while 600 non-credit contact hours equals one FTEE.

FTEE totals have increased overall from fiscal year 2006 through fiscal year 2010 by 15,563.57. The fiscal

Figure 15-5: Adjusted General Fund Expenditures by Function: 2006 and 2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Annual Report, Unrestricted General Fund AS-15E, Fund 1 2010, Table 15-14.

year 2010 total represented a 13.49 percent increase (12,461.44) from the previous year.

FTEE has decreased 10.22 percent since fiscal year 2006.

State General Aid (SGA)

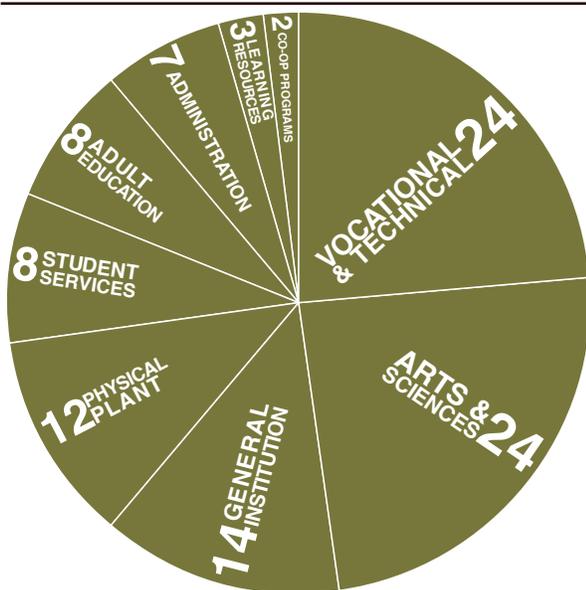

Unrestricted General Fund revenue per FTEE, after adjusting to 2010 dollars, indicates that overall amounts per FTEE have decreased 4.69 percent from FY 2006 through FY 2010. Fiscal year 2010 revenue per FTEE was 8.39 percent less than fiscal year 2009.

The Unrestricted General Fund expenditures per FTEE, after adjusting to 2010 dollars, show that the total per

Unrestricted General Fund Revenue and Expenditure Per FTEE

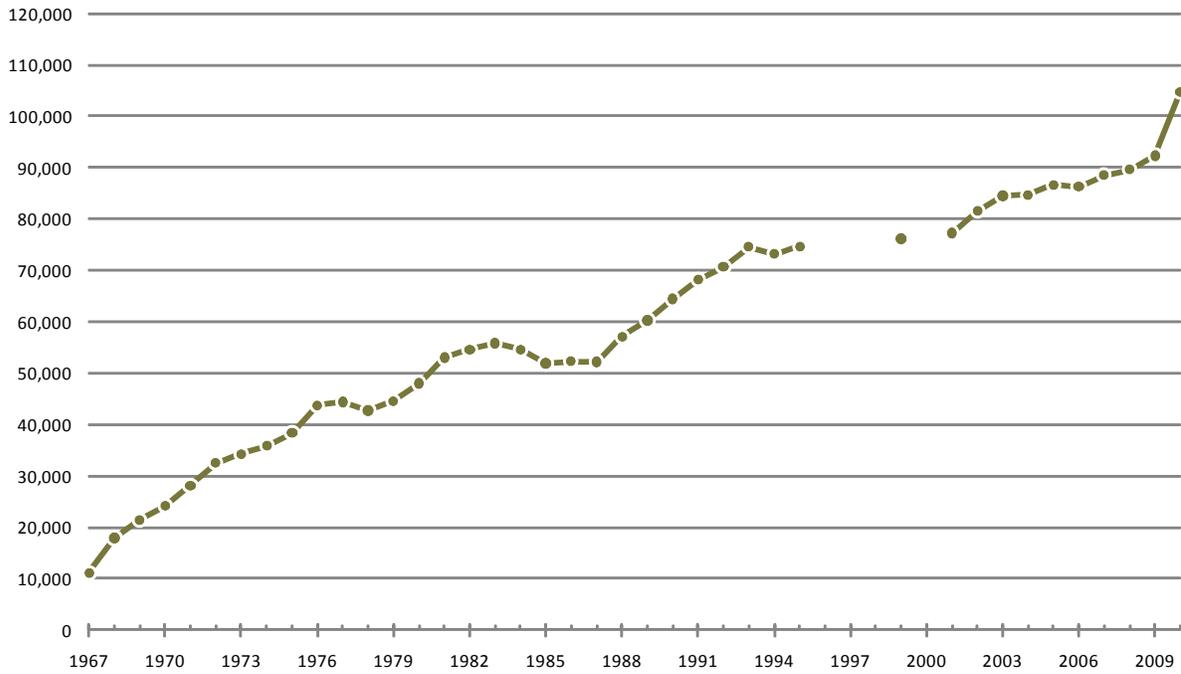

Utilizing SGA information adjusted into 2010 dollars, the SGA amount per FTEE has been steadily declining since 2001. In the past ten years, the amount dropped from \$2,362 per FTEE in 2000 to \$1,419 per FTEE in 2010. This represents a decrease of just under 40 percent during this time. The result is a combination of increasing enrollment at the community colleges as well as a decrease in state general aid funding.

16

HUMAN RESOURCES

During fiscal year 2010, Iowa community colleges had 13,570 employees, which included administrative, instructional, professional, secretarial and clerical, and service. Some employees were included in more than one reporting category, for example an administrator who might also teach a course. Thus, there were 14,403 positions reported in 2010. The MIS data does not include employees teaching only noncredit courses for community colleges.

While the total number of employees increased by 6.3 percent from 2009, the professional composition of community college employees remained relatively the same for the past six years. The largest group was instructional (47.4%), followed by professional (23.2%), secretarial and clerical (17.8%), service (10.7%), and administrative (1.0%). Before 2005, secretarial and clerical staff outnumbered professional staff (Figure 16-1).

The distribution by the type of employment also demonstrated relative stability throughout 11 years since the tracking began. Full-time employment was

prevalent, with over 36 percent of all employment in 2010. Adjuncts presented only 34 percent of all staff in 2010, while in 2008 their number was close to that of full-time employees, and even outpaced them in 2005. Numbers for temporary/seasonal staff demonstrated dramatic change in 2008, from 542 to 1,990 employees — a 353 percent increase, and has continued to grow to 2,439 in 2010 (Figure 16-2).

Employees Education and Demographics

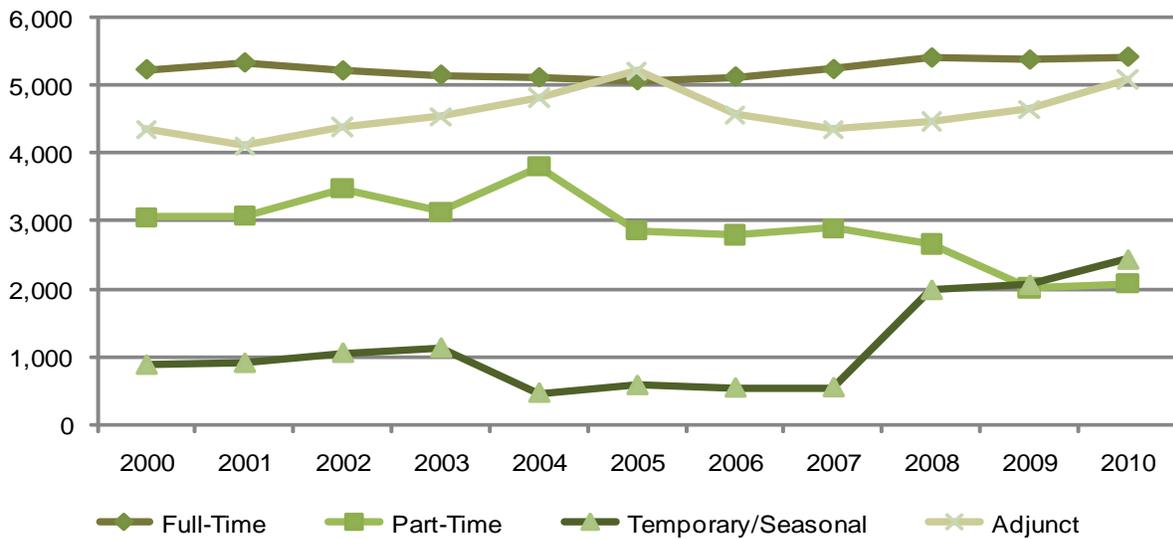

Iowa community college instructors and administrators have continuously improved their education. The number of instructors and administrators with doctoral

Figure 16-1: Iowa Community Colleges Employees by Position Type: 2000-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS, see Table 16-1.

Figure 16-2: Employment by Type: 2000-2010

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Preparation, Community College MIS, see Table 16-1.

degrees demonstrated a steady growth between 2004 and 2010, from 201 to 235 (14%). Before 2006, the numbers for masters degree or higher fluctuated between 49 percent and 64 percent, but since 2006 they slowly grew to a record high 64.9 percent in 2010. The number of bachelor's degree instructors and administrators declined, while the number of associate's degree holders grew slowly between 2005 and 2010. (Figure 16-3).

A typical community college instructor, as with prior years, was female, 52.5 years of age, and white. The percent of racial/ethnic minorities grew between 2009 and 2010 from 6.1 to 6.7, and the 11-year comparison demonstrated a steady increase in the number of racial/ethnic minorities among Iowa community colleges employees. The average growth between 2000 and 2010 was 6.3 percent (Figure 16-4).

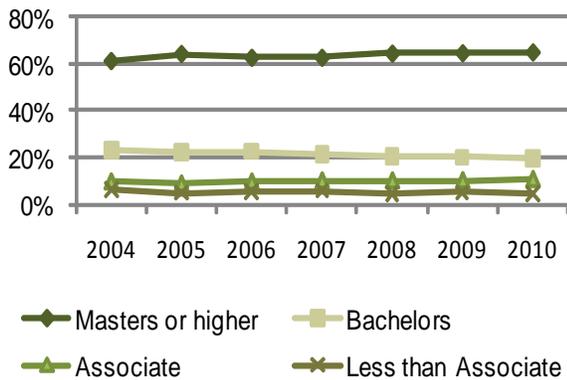

The distribution within the racial minorities was not as linear. While the percentage of American Indians

remained relatively stable throughout 11 years of reporting, Asians demonstrated increases and declines, and both Hispanics and blacks showed steady growth: in 11 years, their numbers more than doubled. Blacks represented the largest racial minority group of employees (44.5 percent of all racial minorities), as well as the fastest growth, 8.6 percent between 2000 and 2010, outpacing Hispanics for the first time since 2000; Hispanics grew 8.5 percent between the same years (Figure 16-5).

Gender composition of Iowa community colleges employees remained stable. In 2000, the females composed close to 58 percent, and in 2010 they were 58.6 percent of all employees (Figure 16-6).

In 2010, the age distribution of Iowa community colleges employees presented a wide palette of groups, from teen years to early eighties. The largest groups were among those between 19-20 and 50-59, peaking at

56. The average age of community college employees was 45 years old, and the median age was 50.5 years-old (Figure 16-7).

Distributed among seven age groups, from under 17 to over 55, the largest group of employees in 2010 was between 40-55 years old. The fastest growing group, however, was over 55 years old. From 2006 to 2010, that group grew 7.9 percent on average (Table 16-23).

The largest group of community college administrators was between 51 and 55 years old. The average age of administrators was 53.6 years old and the median age was 51.5 years old (Figure 16-8).

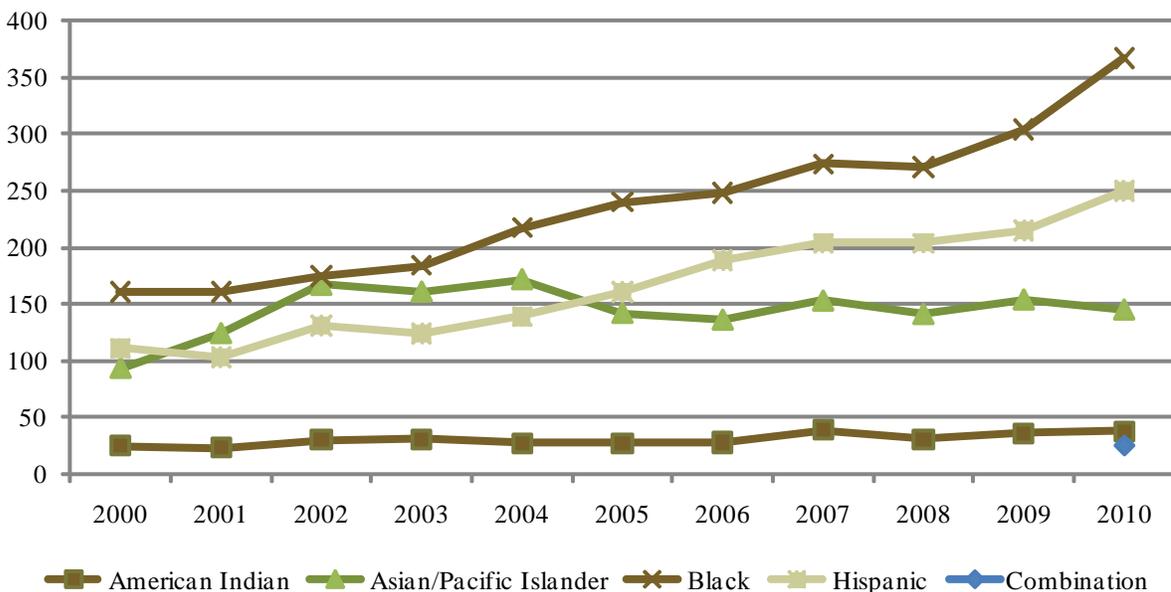

Iowa community college full-time instructional staff was presented by all ages between 24 and 73. The largest group was between 54 and 58. The average age of community college full-time instructors was 49.6

years old and the median age was 48.5 (Figure 16-9).

The most recent data from the U.S. Education Department showed that 66.1 percent of the nation's community college faculty were between the ages of 45 and 64 (McCormack, 2008). The number of Iowa community college full-time faculty in the same age group was smaller than the nationwide number — 65.6 percent in 2010. The average age of Iowa community college full-time faculty increased from 48.3 in 2009 to 49.6 in 2010, continuing the trend since 2004. The median age has dropped from 49.1 to 48.5 (Figure 16-9).

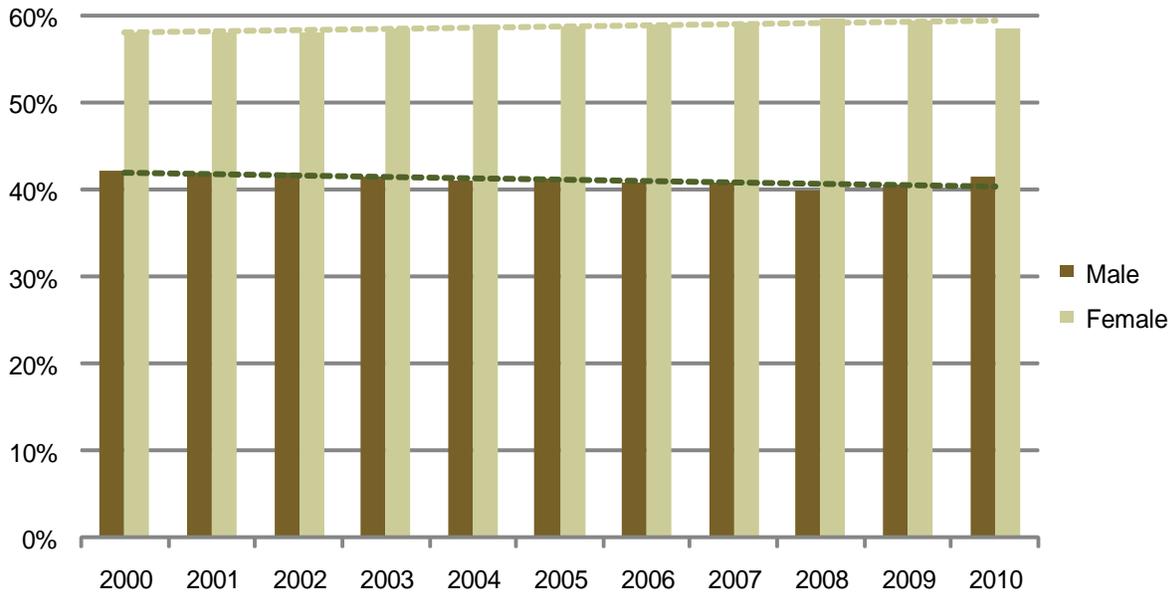

The average base salary based on a nine-month contract for full-time instructional employees reported by community colleges increased from \$52,801 in fiscal year 2009 to \$53,147 in fiscal year 2010. The average increase of full-time instructional staff salaries since

2001 was 3.4 percent (Figure 16-11). In addition to the MIS, there are a number of other state and federal reports that publish faculty salaries; variances across those reports are due to differences in factors (i.e., definitions, classification systems, and contract periods). For example, the National Center for Educational Statistics published \$61,065 as an average salary of full time instructors based on nine month contracts in fiscal

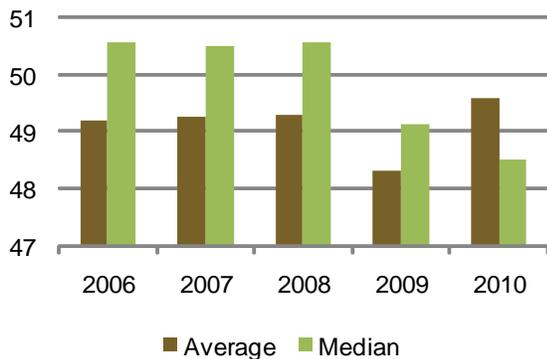

year 2010. The *Chronicle of Higher Education Almanac* publishes annual numbers for colleges nationwide and by state. According to those numbers, Iowa community college instructors were paid on average 92.1 percent of the national average salary for two-year public institutions in fiscal year 2009 (latest available data). Based on the data from 1996 through 2009, the average salary

17

SPECIAL SUPPLEMENT: HIGH SCHOOL GRADUATES IN COMMUNITY COLLEGE

Each year, the supplemental section will provide in-depth analysis from the Community College MIS or other data sources on a particular topic. The topic will change every year based on data availability and questions presented to the Iowa Department of Education. Some of the items may appear regularly in later editions of the report, but most of the analysis will only appear in the supplement.

This section uses Iowa’s statewide longitudinal data system’s (SLDS) unique student identifier to describe students that graduate from high school and immediately enroll in an Iowa community college the following fall. Public high school graduates from spring 2009 were tracked through fall 2010 into community colleges.

Thirty percent of spring 2009 public high school graduates enrolled in Iowa’s community colleges the following fall. The remaining 70 percent of students either did not immediately continue in higher education or chose to enroll in higher education elsewhere. As a result, eight percent of fall community college enrollment was comprised of immediate enrollees.

Subsequent analysis in this section shows that immediate

IMMEDIATE ENROLLMENT AFTER HIGH SCHOOL

30%

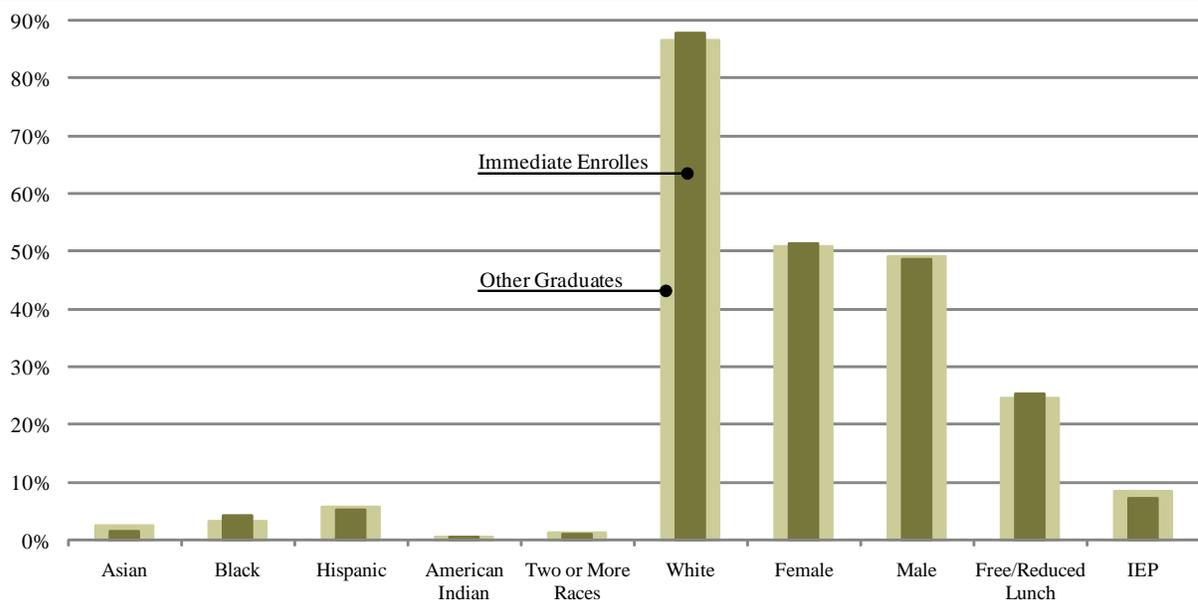

IMMEDIATELY ENROLLED IN AN IOWA COMMUNITY COLLEGE THE FALL AFTER GRADUATING HIGH SCHOOL THE PREVIOUS SPRING

enrollees are demographically similar to other graduates from the spring 2009 cohort.

Figure 17-1 shows the demographic characteristics of students who did immediately enroll in community colleges and those who did not. The demographic composition of students who did decide to continue at a community college is similar to students that did not. Males and females each comprise about half of students who immediately enroll. Students were also predominately white, comprising 88 percent of the student body. The data also shows that students who immediately enrolled seemed to be less likely to be Asian, Hispanic, and of two or more races, but these differences were not statistically significant (Table 17-2).

Immediate enrollees were more likely to have participated in a free or reduced lunch program in their

Figure 17-3: Sociodemographics of Immediate Enrollees for Spring 2009 Graduates

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Development and the Bureau of Planning, Research, and Evaluation. Cohort of 2009 spring high school graduates tracked into fall 2009 community college enrollment. See Table 17-2 & 17-3.

senior year than other graduates. Families earning below 130 percent of poverty level are eligible for free lunches while families earning between 130 and 85 percent of poverty level are eligible for reduced lunch prices.

However, immediate enrollees were less likely to be on an Individualized Education Plan (IEP) their senior year.

High School Course Enrollments

Figure 17-2 shows the difference in math and science high school course enrollments between the two segment of students. Students who enrolled in community colleges had greater preparation in core math and science courses (Algebra 1 and General Biology), but had less preparation on more advanced courses in each category.

Eighty-five percent of immediate enrollees had enrolled in a high school algebra 1 course before graduating, compared to 79 percent of other students. However, only 46 percent enrolled in algebra 2, 27 percent in algebra 3 or trigonometry, and 4 percent in calculus.

Students who did immediately enroll in community college were more likely to take advanced math courses. Forty-four percent of immediate enrollees had enrolled in an advanced math course, while 52 percent of other high school graduates enrolled in pre-calculus, calculus, trigonometry, statistics, advanced placement, or other advanced mathematics courses.

Similarly, 56 percent of immediate enrollees had enrolled in an advanced science course—ranging from chemistry to physics—during high school, compared to 62 percent of other students from the same cohort.

The U.S. Department of Education found a similar pattern using national data (Provasnik and Planty, 2008). High school graduates who immediately enrolled in

community college were more likely to have algebra I or geometry as their highest math course and general biology or below as their highest science course.

Compared to national estimates, immediate enrollees in Iowa were more likely to have enrolled in algebra 1, algebra 2, and algebra 3 or trigonometry. However, Iowa students were less likely to have preparation in calculus.

High School Achievement Tests

Spring 2009 high school graduates would have taken the Iowa Test of Education Development (ITED) in eighth-grade as part of Iowa’s requirements under No Child Left Behind legislation. Figure 17-3 shows the proficiency in reading, math, and science for immediate enrollees and other graduates from the same cohort.

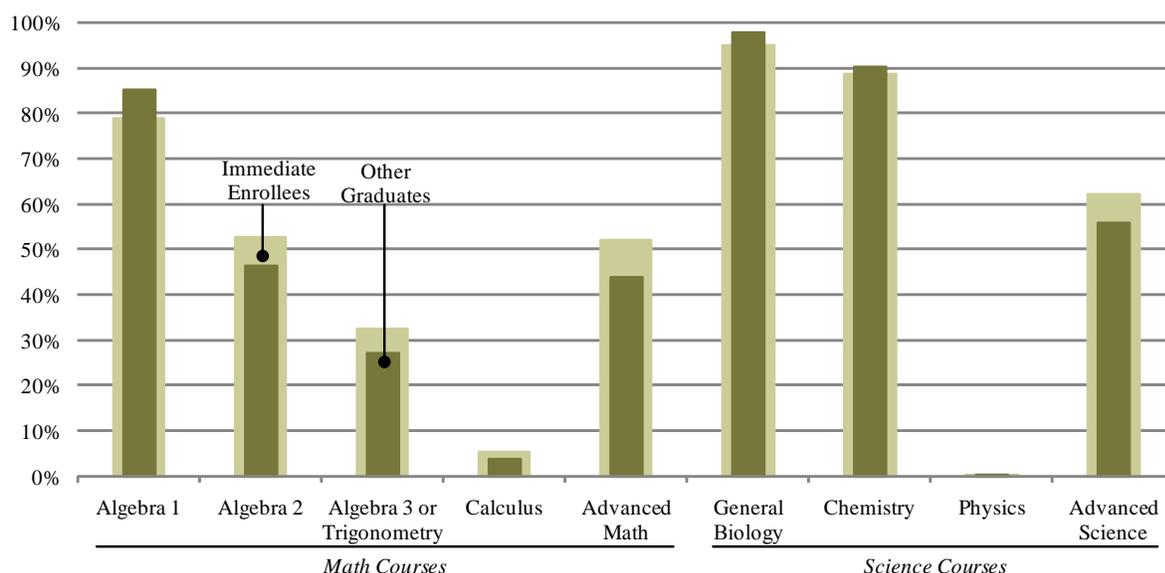

Approximately the same proportion of immediate enrollees and other graduates were proficient on state mandated assessments. Seventy-seven percent of immediate enrollees were proficient in reading, compared to 78 percent for other graduates.

Eighty percent of both immediate enrollees and other graduates were proficient in science in their 11th grade ITEDs. Similarly, 77 percent of immediate enrollees were proficient in mathematics, compared to 78 percent of other graduates.

Figure 17-4 shows the distribution of the national percentage rank for each sub-test. On average, immediate enrollees scored in the 59th percentile in reading, in contrast to other graduates scoring in the 67th percentile—a statistically significant difference

Half of immediate enrollees score above the 59th percentile, while half of other graduates scored above the 70th percentile. Panel A in Figure 17-4 shows

Figure 17-2: High School Course Enrollment for Spring 2010 High School Graduates

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Development, Community College MIS and Bureau of Planning, Research, and Evaluation. Project EASIER. See Table 17-4.

3.5 percent of other graduates scoring in the 99th percentile.

Immediate enrollees also have lower-than-average performance on the mathematics portion. Immediate enrollees, on average, scored in the 62nd percentile, compared to other graduates who scored in the 70th percentile—again, statistically significant.

A similar disparity is present in median scores. Half of immediate enrollees scored above the 66th percentile in mathematics compared to half of other graduates scoring above the 78th percentile.

Finally, immediate enrollees averaged the 67th percentile in the science sub-test, which was statistically significantly less than the 73rd percentile earned by other graduates. Half of immediate enrollees earned test scores above the 70th percentile, compared to the 80th percentile for other graduates.

The achievement test data shows immediate enrollees have a lower average and median achievement test scores. However, the data also reveals performance on achievement tests spanned the spectrum from low to high performing students. For instance, thirteen percent of immediate enrollees achieved above the 90th percentile in mathematics.

Joint Enrollment

Iowa’s community colleges offer joint enrollment opportunities that permit high school students to earn college credit at a community college. Often, these joint enrollment opportunities simultaneously give high school and college credit. Section 5 of this report provides a description of joint enrollment in community colleges.

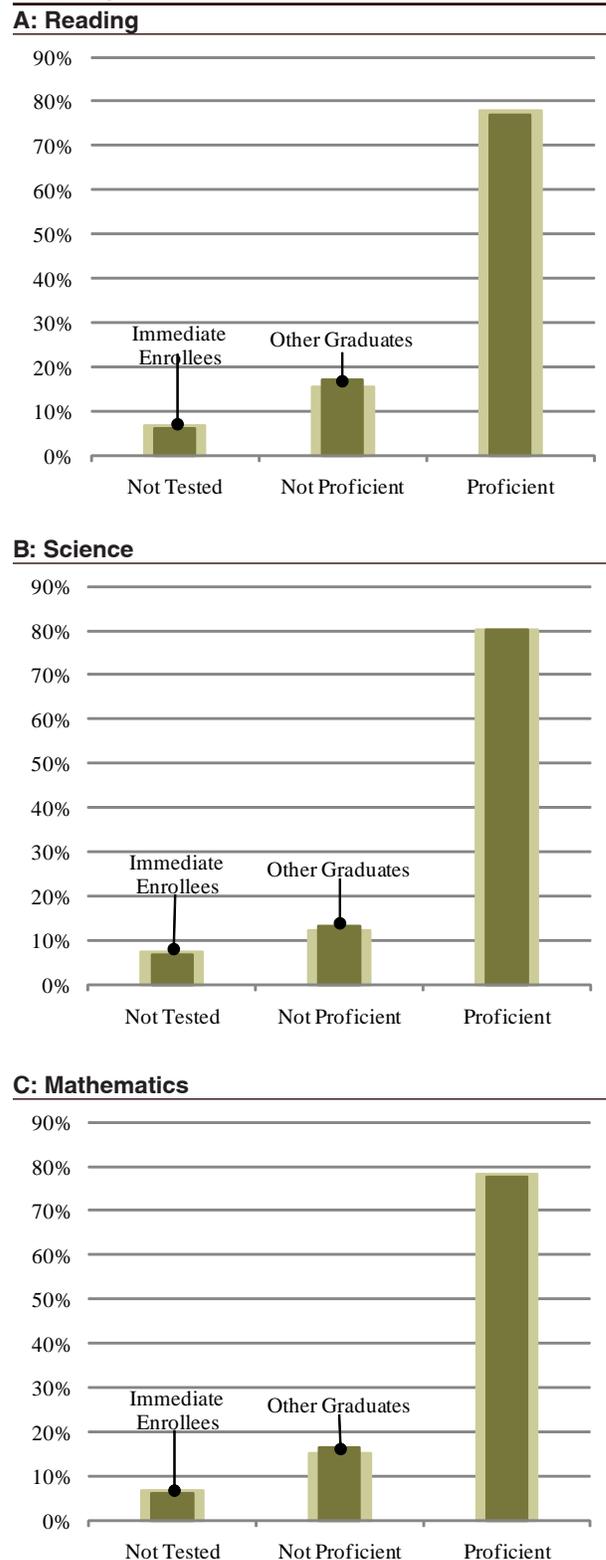

Prior research by the Iowa Department of Education (2010) has shown joint enrollees tend to have above-average ACT scores and usually take liberal arts courses that typically articulate to a four-year college.

Figure 17-3 provides a description of how many immediate enrollees have previously jointly enrolled in a community college. Seventeen percent of students who immediately enrolled had jointly enrolled in community college, compared to 18 percent of other high school graduates. It is interesting to note that at the time of joint enrollment, 39.4 percent of students identified community college as their primary intent after high school graduation (Iowa Department of Education, 2009).

Earned Credit Hours

One potential advantage of joint enrollment is to provide an opportunity for students to enter college with completed credits, saving students money by permitting earlier graduation and lower tuition expense. A previous study has suggested this head start yield a 535 percent return-on-investment (Siegelman and Otto,

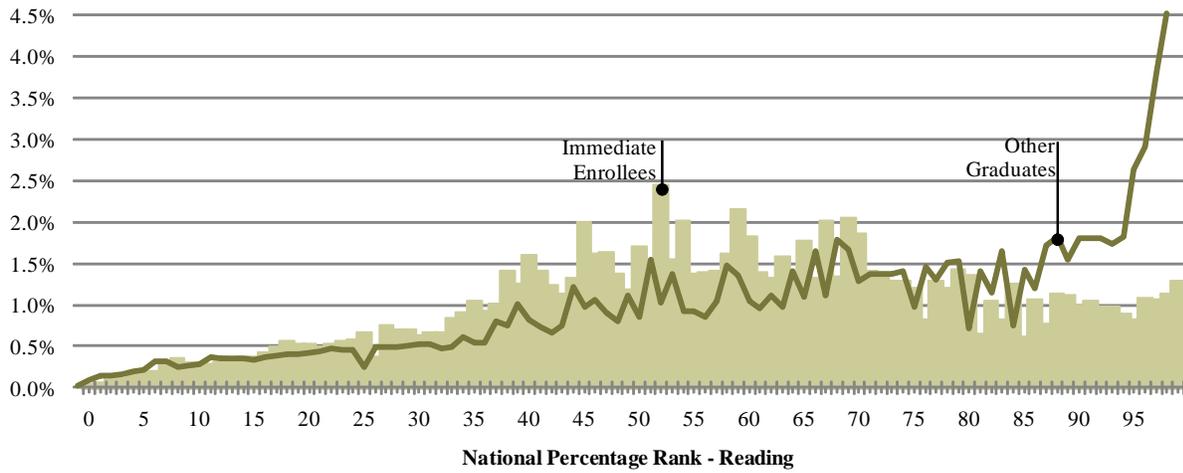

Figure 17-3: Proficiency in 11th Grade ITED by Sub-test

18% for other graduates

AVERAGE EARNED CREDIT HOURS FOR JOINT ENROLLEES:

13.8

2008).

On average, joint enrollees earned 13.8 credit hours through joint enrollment prior to graduating high school. This is roughly equivalent to one semester of full-time enrollment in a community college.

Student Intent

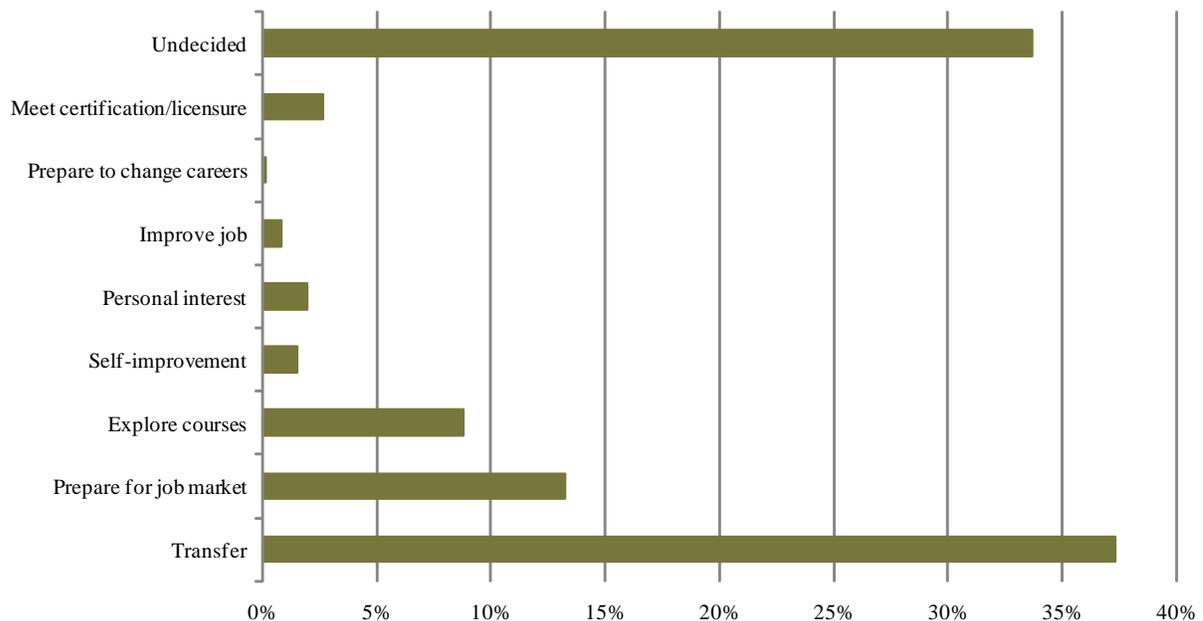

Community colleges can provide a variety of paths. Students may enroll in community colleges with different intents, ranging from wanting to transfer to a four-year college to obtaining employment after graduation.

Iowa's community colleges collect the intent of students. Figure 17-5 shows the student-reported intent of immediate enrollees.

Students most-often identify (37 percent) their intention to transfer to another college or university. This is followed by students who are undecided or have other goals (34 percent). Thirteen percent of students are hoping to prepare for the job market and 3 percent are preparing for occupational licensure or certifications. A further nine percent of students reported they are exploring courses.

National data indicates a third of immediate enrollees in community colleges are unsure about their two-year educational aspirations (Provasnik and Planty, 2008).

Figure 17-5: Student Intent of Immediate Enrollees

SOURCE: Iowa Department of Education, Division of Community Colleges and Workforce Development, Community College MIS and Bureau of Planning, Research, and Evaluation, Project EASIER. See Table 17-9.

Meanwhile, approximately two-thirds of immediate enrollees intend to attend or complete a four-year college.

Program Major

Students who immediately enroll in community colleges tend to enroll into similar majors as the entire community college population. Figure 17-4 shows the enrollment of immediate enrollees in community college majors.

Sixty-six percent of immediate enrollees majored in college parallel, which are intended to lead students to transfer to a four-year university or college. This is similar to the entire community college population, 65 percent of which enroll in college parallel.

Health science was the second most popular major, enrolling nine percent of immediate enrollees. Agriculture and natural resources was third (3.4%), followed by law, public safety, corrections, and security (3.4%); and manufacturing (2.9%).

Fall Credit Hours

Immediate enrollees are substantially more likely to enroll full-time than other community college students. Students are considered full-time if they enroll in 12 or more credit hours. Eighty-seven percent of immediate enrollees are classified as full-time. In the past three years, approximately half of Iowa community college students enroll full-time in the fall.

On average, immediate enrollees enrolled in 13 credit hours for the fall semester. Similarly, half of all these students are enrolled in more than 13 credit hours.

Consequently, immediate enrollees comprised 11

CREDIT HOURS

87%

OF IMMEDIATE ENROLLEES WERE FULL-TIME STUDENTS.

percent of the total credit hours taken in community college. Section 2 noted community colleges enrolled 1,026,134 credit contact hours, 108,395 of which was taken by immediate enrollees.

There does not appear to be a difference in the number of credit hours a student takes in the fall based on joint enrollment history (data not shown). As noted earlier, joint enrollees start their traditional college enrollments with almost 14 credit hours. While it appears joint enrollees have an advantage in terms of completed course hours, these students enroll in a similar community college load as their non-joint enrollee peers.

Developmental Education

Community colleges are known to play a substantial role in developmental education for adults returning to college and for students just out of high school. Nationally, a study of students from 1992 showed 58 percent of first-time community college students enrolled in a developmental education class (Attewel, Lavin, Domina & Levey, 2006). This enrollment also leads to substantial costs. Some estimates show the cost of developmental education is between one and two billion (Breneman & Haarlow, 1998).

Figure 17-7 shows the shows the number of students enrolled in developmental education by departments.

For the purposes of this section, developmental education is defined as course numbers under 100 (e.g., MAT 050) and cannot be taken to make immediate progress towards the completion of a major. Thus, this data reflects developmental and non-developmental courses for students in each major, since developmental is dependent on major.

In sum, 2,679 students, or 33 percent of immediate enrollees, were enrolled in developmental education. Most of these students enrolled in developmental mathematics, 2,082 courses and English courses, 934 instances. In sum, 12,035 credit hours of immediate enrollees were in developmental education, eleven percent of the total credit hours taken by immediate enrollees.

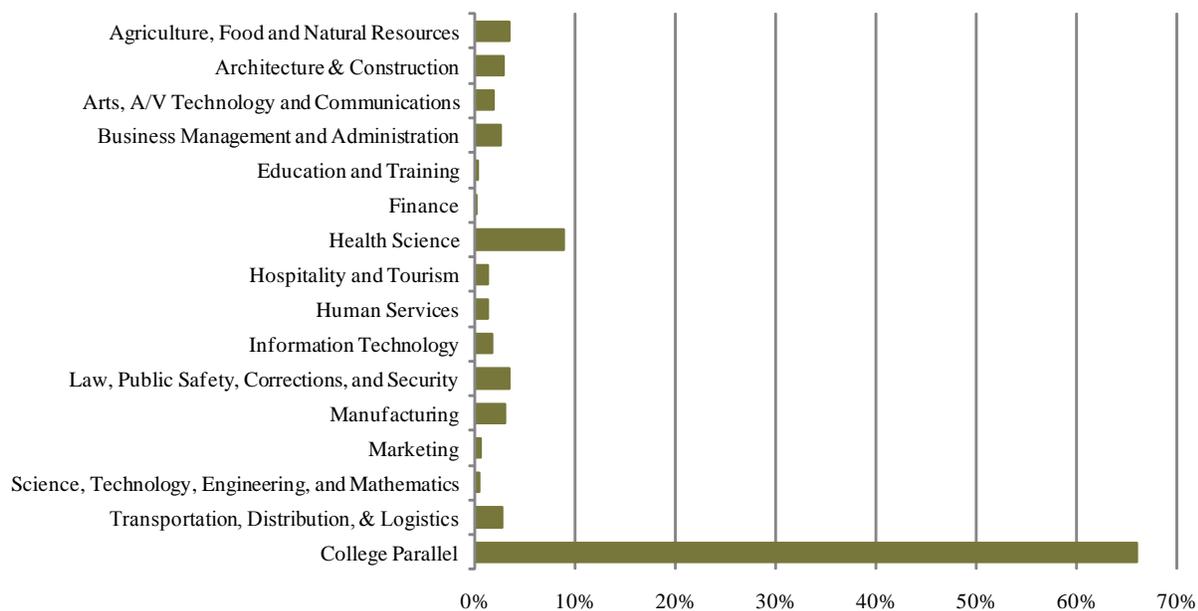

Further analysis (not shown) indicates taking developmental courses is independent from whether students were proficient on reading or mathematics as measured by the 11th grade ITED.

Summary

The data shows immediate enrollees are demographically similar to other high school graduates from the same year. However, immediate enrollees have lower achievement in their high school math and science enrollment in addition to lower scores, on average, than their peers.

However, it is important to note these students have a diverse academic background. Some students are quite accomplished in both course enrollments and achievement test scores. A third of students enrolled in developmental education, either by choice or placement,

Figure 17-6: Enrollment by Program Major: Fall 2010

DEVELOPMENTAL EDUCATION

33%

OF IMMEDIATE ENROLLEES ENROLLED IN AT LEAST ONE DEVELOPMENTAL EDUCATION COURSE IN FALL 2010.

in their first semester.

It is clear that immediately enrollees intensely enroll in community colleges. Many enroll full-time and seem intent on transferring to a four-year college or university.

A relatively small share of immediately enrollees have jointly enrolled before. However, among those that did jointly enroll, the data shows the opportunity has led to a semester's worth of credits.

Because most joint enrollees are full-time students, it is important to note what is already known about full-time students. Section 12 in this report and prior editions has recorded a variety of statistics on student success. Namely, over 53 percent of full-time students achieve measureable success by either graduating or transferring to a four-year university.

It will be several years before we can observe the performance of the spring 2009 high school graduates in community colleges. However, in the meantime, section 12 of this report provides some expectations for these students.

Table 17-13 shows the results of a regression of several key variables on student transition (see Schenk, 2011).

This method disentangles the confounding characteristics of students to isolate the role each characteristics or level of achievement has on the entry into community college.

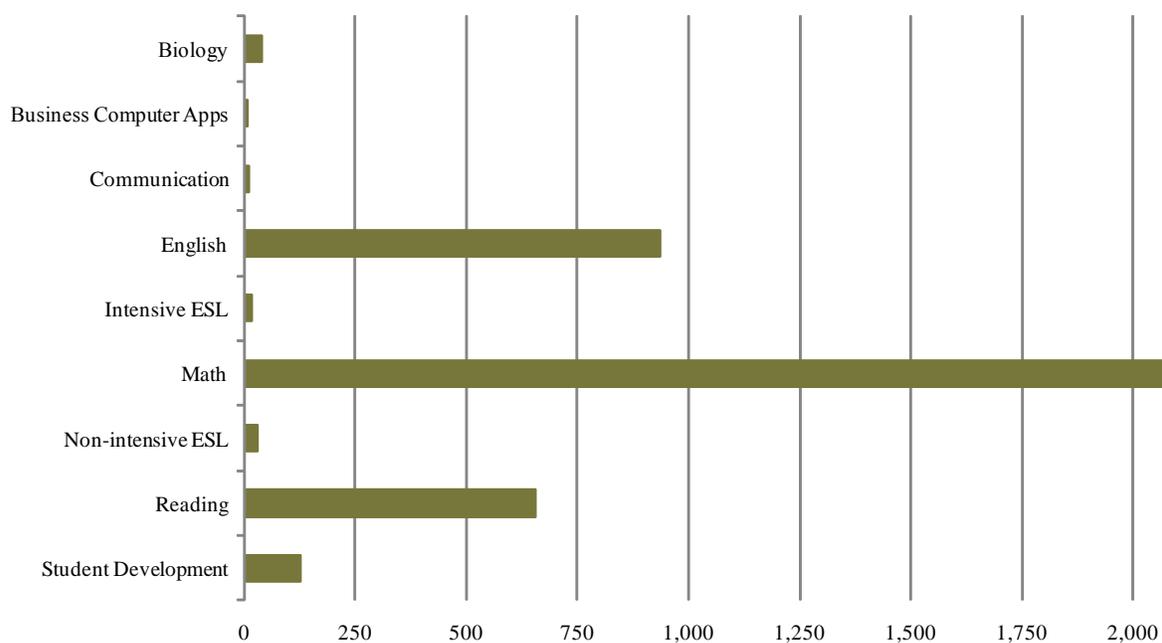

The results confirm some prior findings. Students with higher 11th grade achievement scores have a lower probability of entering community college. However, not all achievement subtests are equal predictors. Each percent increase in national percentage rank lowers the probability of entering community college at a greater rate than math or science scores. Science scores is not a statistically significant predictor of community college entry.

Students who enroll in an algebra 1 course are more likely to immediately enroll in community college than a student who does not. However, the probability of immediately enrolling in community college decreases as a student enrolls in algebra 2, algebra 3, trigonometry, or other advanced math courses.

Science course enrollment is weaker predictor of community college enrollment. Students who enroll in general biology courses are more likely to enroll in community college, but higher level science courses are not strong predictors.

Black and white students are more likely to enroll in community college than other races or ethnicities. Meanwhile, students who are had an IEP during high school or were on free or reduced lunch programs were less likely to enroll in community college.

Figure 17-6: Duplicated Enrollment in Developmental Education Courses by Department

NOTE: Developmental education is defined as courses below 100 and cannot be used for the completion of a major. Students may be enrolled in more than one department.

GLOSSARY

For complete definitions of Community College Management Information System (MIS) data elements, see the Fiscal Year 2010 MIS Data Dictionary available on the Department's website: www.iowa.gov/educate.

Adult High School Diploma

A program of instruction designed for an 18 year old or older individual that culminates in a Community College Adult High School Diploma. Courses are set at a length of 60 contact hours per course, with a maximum of five courses per semester.

Alternative High School

An established environment within or apart from the regular high school with policies and rules, educational objectives, staff and resources designed to accommodate student needs, and to provide a comprehensive high school education consistent with the goals established by school districts in the area. Whether or not an individual student may choose to attend an alternative school may be limited by court order or by approval of the local school district. Community colleges may establish and operate alternative high schools for secondary school districts on a contractual basis. Students are not eligible for postsecondary State General Aid unless such students are taking courses above and beyond the defined programs for high school completion.

Apprentice

A person at least 16 years of age (except where an older minimum age standard is established by law) who enters into any contract of service registered with the appropriate apprentice agency. An apprentice receives instruction from his or her employer in an apprenticeship approved occupation.

Apprenticeship Program

A program registered with the Department of Labor or the state apprenticeship agency in accordance with the National Apprenticeship Act. An apprenticeship program is conducted or sponsored by an employer, a group of employers, or a joint apprenticeship committee representing both employers and labor, and contains all of the terms and conditions for the qualification, recruitment, selection, and training of apprentices. Related instruction courses are often part of the program.

Articulation

The process of mutually agreeing upon courses and programs earned at a sending institution for credit or advanced placement at a receiving institution. Often courses and programs are transferable either from secondary to postsecondary institutions or between postsecondary institutions.

Arts and Sciences

Credit courses contained in the two-year associate degrees transfer program (College Parallel/Liberal General Studies/College Transfer) and College Parallel/Career Option programs.

Arts and Sciences Courses

Credit courses in College Parallel/Liberal General Studies/College Transfer, which are transferable to four-year institutions for completion of a baccalaureate degree and those that are included in career/technical curriculums that are applicable for employment on completion of curriculum.

Associate in Applied Arts (AAA) & Associate in Applied Science (AAS) Degrees

The degree awarded for satisfying the curriculum requirements and demonstrated competence for employment in the occupational field for which the program was designed. Typically, these degrees apply to occupations requiring significant amounts of applied scientific and mathematical knowledge. These degrees require a minimum of 60 semester credit hours (90 quarter hours) in length with a minimum of 12 semester credit hours (18 quarter hours) of general education. Programs awarding these degrees shall not exceed 19 semester credit hours per term (28.5 quarter hours) and shall not exceed 86 semester credit hours (129 quarters hours) in length.

Associate in Arts (AA) & Associate in Science (AS) Degrees

The degrees awarded for satisfying the curriculum requirements of arts and science courses designed as college parallel programs transferable as the first two years of a baccalaureate degree. These programs are referred as college parallel/liberal general studies/college transfer. They include a minimum of 60 semester credit hours (90 quarter

hours) of credit courses designed and acceptable for transfer with the understanding that 16 semester hours (24 quarter hours) of career/technical courses could be included in the total.

Associate in General Studies Degree (AGS)

The degree awarded for satisfying the curriculum requirements of a two-year program other than set forth in Iowa Administrative Code 281—21.2(10) associate of arts or science. The degree requirements are flexible for individual students, not intended for transfer, and include a minimum of 60 semester credit hours (90 quarter hours).

Career and Technical Education

The organized educational activities that offer a sequence of courses that include academic and technical knowledge and skills needed for current employment or further education.

Certificate

The award for satisfying the curriculum requirements of an activity, course, and/or program other than one that is intended for a diploma or a degree. Certificates can be awarded for credit and non-credit offerings.

College Parallel/Career Option Program (CP/CO)

AS or AA degree programs designed as the first two years of transfer credit toward a baccalaureate degree in a specific occupational area which includes a minimum number of skill development courses for immediate employment. Students have a choice of articulating their program to a four-year institution for completion of a baccalaureate degree or seeking employment in curriculum designed occupation or a related field.

College Parallel/Liberal General Studies/College Transfer

See Associate in Arts (AA) & Associate in Science (AS) Degrees.

Contact Hour

The computation of minutes given for an instructional activity. The minimum requirement of one contact hour is 50 minutes.

Continuing Education Unit (CEU)

A uniform unit of measurement given by a college for non-credit activity, course, and/or program. One continuing education unit (CEU) equals 10 contact hours (based on one 50-minute classroom hour) of participation in an organized education experience.

Credit

A unit of measure/recognition given by a college for the completion of an activity, course, and/

or program recognized by higher education. It accounts for instructional activity in standards terms of rationalization of collegiate requirements related to transferability.

Credit Hour

The computation of a single hour of class time per week occurring over a defined instructional period (term). An hour is referred to as 50 minutes to equal one credit hour of instruction, with requirements stated as semester minimums.

Classroom: 800 minutes (533 minutes for one quarter hour) of scheduled instruction plus, when applicable, a scheduled culminating activity.

Laboratory: 1,600 minutes (1,066 minutes for one quarter hour).

Clinical practice: 2,400 minutes (1,599 minutes for one quarter hour).

Cooperative/work experience: 3,200 minutes (2,132 minutes for one quarter hour).

Developmental Education

A non-college transfer course designed to provide assistance (remedial instruction) to an individual so they can successfully complete the regular courses in their program of study.

Diploma

The award granted for satisfying the curriculum requirements of a program that consist of a minimum of 15 semester credit hours (22 quarter hours) with the general education component consisting of a minimum of 3 semester hours (4 quarter hours).

Full-Time Equivalent Enrollment (FTEE)

The equivalent number of students attending a single community college. One FTEE in credit hours equals twenty-four (24) credit hours. One FTEE in non-credit (contact) hours equals 600 contact hours.

General Education

Credit courses designed to broaden student ability to reason, think, compute, communicate and adapt to change. They also include human development in civic, consumer, environmental, and social responsibilities. The general education requirements include courses in communications, humanities, mathematics, science, and social science. The number and type of general education courses is determined by the degree (state requirements) and often varies with different receiving institutions.

Headcount

The actual number of students enrolled in a given instructional category or unit during a given period of time.

Unduplicated headcount means that a person is counted only once during the reporting period even though they may be enrolled in more than

one program. The individual is to be reported in the program in which they were most recently enrolled. If the above criterion discriminates, then the student is to be reported in the program in which they received the most credit or contact hours of instruction. In any case, the student should be counted only once during a specified period of enrollment even though they may be in more than one term during the reporting period.

Human Resources

Community college employees are classified according to position and assignment codes. The staff is usually classified as administration, instructional/faculty, professional, secretarial/clerical, and service.

A **full-time** faculty/instructor is classified full-time according to the college's definition and whose regular assignment is instruction (more than 50 percent), including those with released time for research. Also included are full-time instructional faculty on sabbatical leave, full-time replacements for instructional faculty on leave without pay, and chairs of departments (if they have no other administrative title and hold a full-time faculty rank).

A **part-time** faculty/instructor is classified part-time according to the college's definition and who is employed less than full-time (see above definition). An adjunct faculty/instructor is when a person has an occasional or temporary affiliation with an institution or another faculty member in performing a duty or service in an auxiliary capacity.

Temporary/Seasonal includes individuals who are employed by the college for short-time periods for specific purposes. Such an employee may be full or part-time and often are not provided benefits.

Joint Enrollment

A student who is enrolled in a secondary school and a postsecondary institution at the same time. The credits earned are often applicable for fulfilling the graduation requirements at both levels. Courses offered for joint enrollment are disaggregated into the following categories:

Contracted courses are college credit courses offered to secondary school students through contractual arrangements. These courses often generate supplementary weighting for the local district. Courses generating supplementary weighting are defined as "concurrent enrollment."

Postsecondary Enrollment Options (PSEO) courses are college credit courses offered to secondary school students through the PSEO program.

Tuition courses are college credit courses taken secondary school students independently.

Jointly Administered Program

A program entered into by two or more educational institutions to provide instructional or administrative services jointly, to the mutual advantage of the constituents of each institution.

Leisure/Recreational

Courses that provide instruction in leisure, recreation, casual culture, wellness, and/or self-enjoyment subjects.

Non-Credit

Non-Credit offerings cover a wide range of activities, courses, and programs usually for the adult population. They are recognized for their ability to provide offerings in non-traditional lengths and delivery methods, as well as special "packaging" for individuals and business/industry.

Preparatory Program

Preparatory programs are designed to provide the specific skills and knowledge essential for successful entry into an occupation following completion of a designated curriculum. These programs may be for credit and/or non-credit depending on the intent and requirements of the curriculum.

Full-time programs operate on the average of 15 credit hours per term and at least two terms in length.

Part-time programs operate on the average of less than 15 credit hours per term and at least two terms in length.

Short-term programs are less than 22 credit hours in length.

Secondary High School Diploma Program

Courses provided by community colleges for secondary credit toward a high school diploma granted by a local secondary school district.

Student

A **full-time** student is one who enrolls for 12 or more semester credit hours (18 or more quarter hours) in the most recent regular term of enrollment.

A **part-time** student is one who enrolls for less than 12 semester credit hours (18 quarter hours) in the most recent regular term of enrollment.

Appropriate adjustments for length of summer term are to be used if the student has not attended a regular term during the academic year.

The above definitions are used for uniform state reporting, however community colleges often define full-time and part-time enrollments according to independent local criteria.

The Iowa College Student Aid Commission's full-time definition is a student enrolled for 12 or more semester credits, 12 or more quarter credits, or 24 contact hours a week each term.
